Means an outer wall of a building not being a party wall even though adjoining a wall of another building and also means a wall abutting on an interior open space of any building.

**2.62 Escape Route**

Means any well ventilated corridor, staircase or other circulations space, or any combination of the same, by means of which a safe place in the open air at ground level can be reached.

**2.63 Fabrication Workshop**

Means a small establishment where a manufacturing process is carried on in which an item is made (fabricated) from raw or semi-finished materials instead of being assembled from ready-made components or parts.

**2.64 Farm House**

Means a plot of land including permissible construction in the area designated as agriculture use by the Competent Authority with a minimum land area of 4000sq.mts.

**2.65 Floor**

Means the lower surface in a storey on which one normally walks in a building, and does not include a mezzanine floor.

Ground Floor is the floor at ground level with a direct access to a street or open space. The floor above it with minimum permissible height shall be termed as floor 1, with the next higher floor being termed as floor 2, and so on upwards.

**2.66 Floor Space Index**

Means the quotient of the ratio of the combined gross floor area of all floors including areas of all walls and columns except areas specifically exempted under these Regulations, to the total area of the building unit.

$$\text{Floor Space Index} = \frac{\text{Total floor area including walls and columns of all floors}}{\text{Plot Area}}$$

**2.66.1 Permissible FSI**

Means the base FSI permitted by the Competent Authority as a matter of right.

**2.66.2 Charged FSI**

Means the applicant shall have to pay a portion of charged FSI at a tune of 40% of prevailing Jantri rate or revised from time to time to the SWUDA.

**2.66.3 Maximum Permissible FSI**

Means the maximum permissible FSI which includes permissible FSI and Charged FSI.

**2.66.4 Total Utilised FSI**

Means the total Utilised FSI

**2.67 Fire Protection and Safety****2.67.1 Automatic Fire Detection & Alarm System**

Fire alarm system comprising components for automatically detecting a fire, initiating an alarm of fire and initiating other actions as appropriate. The system may include manual fire alarm call points.

**2.67.2 Automatic Sprinkler System**

Means a system of water pipes with sprinkler heads within a building designed to activate automatically by heat to control and extinguish a fire by discharge of water.

**2.67.3 Combustible Material**

Means a material which burns itself or adds heat to a fire when tested for non-combustion.

**2.67.4 Down Comer**

Means an arrangement of water pipes for fire fighting within a building. It consists of pipes connected to an overhead tank and a terrace pump with air release valve at the terrace level and landing valves. It can be charged with water from ground level by fire brigade on their arrival by making connection via fire brigade inlets provided at the bottom of such down comer.

**2.67.5 Dry Riser**

Means an arrangement of water pipes for fire fighting within a building. It consists of vertical rising mains/pipes with landing valves. It can be charged with water from ground level by fire brigade on their arrival by making connection via fire brigade inlets provided at the bottom of such dry riser.

**2.67.6 Fire Exit**

A way out leading to an escape route having panic bar hardware provided on the door.

**2.67.7 Fire Alarm System (also Emergency Alarm System)**

Means an arrangement of call points or detectors, sounders and other equipment for the transmission and indication of alarm signals working automatically or manually in the event of fire.

**2.67.8 Fire Lift**

Means a lift installed to enable fire services personnel to reach different floors with minimum delay, equipped with all necessary features.

**2.67.9 Fire Proof Door (also Fire Resistant Door)**

Means a self closing door or shutter fitted to a wall opening, and constructed and erected to check the transmission of heat and fire for a specified duration.

**2.67.10 Fire Pump (also Fire Booster Pump)**

Means a mechanical/ electrical device which boosts up the water pressure at the top level of a multi-storied building to supply high pressure water for fire fighting system.

**2.67.11 Fire Resistance**

Means a property of an element of building construction to withstand fire related conditions for a stated period. It is measured by some or all of the following criteria:

Resistance to collapse in case of fire (minimum 2 hours)

Resistance to penetration of flame and hot gases

Resistance to temperature rise on the unexposed face up to a maximum of 180°C and / or average temperature of 150°C

**2.67.12 Fire Resistance Rating**

Means the duration for which a passive fire protection system can withstand a standard fire resistance test.

**2.67.13 Fire Resisting Wall**

A fire resistance rated wall, having protected openings, which restricts the spread of fire and extends continuously from the foundation to at least 1m above the roof.

**2.67.14 Fire Separation**

Means the distance in meters, measured from the relevant external wall of the building to the external wall of any other building on the site or from other site, or from the opposite side of the street or other public space for the purpose of preventing the spread of fire.

**2.67.15 Fire Service Inlet**

Means a connection provided at the base of a building for pumping up water through inbuilt fire-fighting arrangements by fire pumps.

**2.67.16 Fire Stairs**

A vertical enclosure, with a stairway, having the fire endurance rating required by code and used for egress and as a base for fire fighting.

**2.67.17 Fire Stop**

Means a fire resistant material, or construction having a fire resistance rating of not less than the separating elements, installed in concealed spaces or between structural elements of a building to

## General Development Control Regulations

prevent the spread/ propagation of fire and smoke through walls, Horizontal and vertical Piping and cable ducts, ceilings and the like as per the laid down criteria and having fire resistance capacity of at least 2 hours

**2.67.18 Fire Tower**

Means an enclosed staircase which can only be approached from the various floors through landings or lobbies separated from both the floor area and the staircase by fire resistant doors and open to the outer air.

**2.67.19 Pressurization**

Means the establishment of a pressure difference across a barrier to protect a stairway, lobby, escape route, or room of a building from smoke penetration.

**2.67.20 Smoke-Stop Door**

Means a door for preventing or checking the spread of smoke from one area to another.

**2.67.21 Venting Fire**

Means the process of inducing heat and smoke to leave a building as quickly as possible by paths such that lateral spread of fire and heat is checked, fire fighting operations are facilitated, and minimum damage is caused by fire.

**2.67.22 Wet Riser**

Means a fire fighting arrangement within the building provided by vertical rising pipes permanently charged with water from a pressurized supply.

**2.68 Fitness center**

A health club (also known as a fitness club, fitness center, and commonly referred to as a gym) is a place which houses exercise equipment for the purpose of physical exercise.

**2.69 Footing**

**PROCEDURE REGULATIONS**

### 3 DEVELOPMENT PERMISSION AND BUILDING USE PERMISSION

#### 3.1 Development Permission Required

Subject to provisions of Section 26, 27, 28, 34 and 49 of the Act, no person shall undertake any building or development activity in or over any land without obtaining a Development Permission prior to commencement of building or development activity. A Development Permission shall mean Permission for development granted by the Competent Authority.

#### 3.2 Development Permission Not Required

No Development Permission shall be required for undertaking building works listed in Schedule I.

#### 3.3 "Grant of a Development Permission"

Grant of a Development Permission by the Competent Authority shall mean an acceptance by the Competent Authority that the development requirements of the proposed building, for which Development Permission has been granted, conforms to these Development Regulations, and that the person holding the Development Permission may undertake proposed development or construction of the proposed building within the limits of the Development Area in conformity with the Development Plan Proposals.

It does not constitute acceptance of correctness, confirmation, approval or endorsement of:

- (a) Title, ownership, and easement rights of the Building-unit for which the building is proposed;
- (b) Variation in area from recorded areas of a Building-unit;
- (c) Location and boundary of Building-unit;
- (d) Workmanship, soundness of material and structural safety of the proposed building;
- (e) Structural reports and structural drawings

and shall not bind or render the Competent Authority liable in any way in regard to (a), (b), (c), (d) and (e) above.

##### 3.3.1 "Liability"

Notwithstanding any Development Permission granted under the Act and these Regulations, any person undertaking any development work shall continue to be wholly and solely liable for any injury or damage or loss whatsoever that may be caused to anyone in or around the area during such construction and no liability whatsoever in this regard shall be cast on the Competent Authority or any officer/employee to whom power has been delegated

#### 3.4 "Development Requirements"

Development Requirements of the following aspects shall be mandatory and may be examined by the Competent Authority for ensuring compliance of the development to these Regulations:

1. Permissible Ground Coverage
2. Permissible Floor Space Index
3. Permissible Height and the various floors
4. Permissible Open Spaces enforced under these Regulations- Common Plot, Marginal Open Spaces, Setbacks and other open spaces.
5. Permissible Uses of Land and Buildings
6. Arrangements of stairs, lifts, corridors and parking
7. Minimum requirement of sanitary facility

8. Minimum Common Facility
9. Required light and ventilation
10. Minimum requirement of Fire Prevention and Safety, and Clearance from Chief Fire Officer as applicable.

### 3.5 "Lapse of Development Permission"

A Development Permission shall mean to have lapsed if construction of the building is not commenced within the period stipulated in Regulation No. 6.5.2

### 3.6 "Cancellation of Development Permission"

Cancellation of a Development Permission by the Competent Authority shall mean that the Development Permission shall no longer be valid, and that the permission granted by the Competent Authority to undertake construction stands withdrawn.

The Development Permission, if secured by any person by any misrepresentation or by producing false documents, will be treated as revoked and scrutiny fees paid for such development shall be deemed to have been forfeited.

Following Cancellation of a Development Permission, construction may no longer be undertaken on the Building-unit for which the Development Permission was granted. A Notice of Cancellation of Development Permission shall be issued in writing by the Competent Authority.

### 3.7 Unauthorized Building

Any building or development, requiring a Development Permission, undertaken without grant of Development Permission, or undertaken after the Development Permission has lapsed, or, after the Development Permission has been cancelled, revoked or suspended, shall be deemed to be an Unauthorized Building.

#### 3.7.1 Dealing with Unauthorized Building

If the Competent Authority deems the construction of any building to be an Unauthorised Construction, it may, by a written notice, require the person undertaking construction of the building to stop the same forthwith. If the person carrying out such work or doing such thing is

not the owner at the time of giving such notice, such person shall be liable for carrying out the requisitions of the Competent Authority.

In case of unauthorised development, the Competent Authority shall:

- (a) Take suitable action which may include demolition of unauthorised works as provided in the Act.
- (b) Issue directions for the alteration or reconstruction of any works specified that have not been commenced or completed.
- (c) Take suitable action against the Persons on Record.

If within the period specified in such written notice, the requisitions contained therein are not carried out by the said person or owner, as the case may be, the Competent Authority may remove or undo such thing and the expenses thereof shall be paid by such person or owner as the case may be. The cost(s) of undertaking these measures shall be paid by the said person.

If such building is not stopped forthwith, the Competent Authority may direct the person undertaking such construction to be removed from the premises, may seal the Building-unit, and may cause such necessary measures including police intervention to ensure that the person does not re-enter the

Building-unit without written permission of the Competent Authority. Permission to re-enter the building premise shall only be granted for the purpose of carrying out any work of reinstatement.

In cases where development has already started/commenced on site without obtaining Development Permission, but where this development is in accordance with these Regulations, the Competent Authority may grant Development Permission on the merits of each individual case. Such development will be considered unauthorised and over and above the Development Permission Scrutiny fees as leviable and stipulated in Schedule 3, penalty shall be charged as per Schedule 6.

### **3.8 Procedures for Obtaining, Revising and Revalidating a Development Permission**

#### **3.8.1 Obtaining a Development Permission**

On receipt of a duly completed application for Development Permission, the Competent Authority shall scrutinize the application in detail before grant of Development Permission, to verify whether the design and specifications of the proposed building comply with these Regulations.

The procedure for obtaining a Development Permission is specified in Regulation No. 5.1.

#### **3.8.2 Revising a Development Permission**

Changes or revisions in the sanctioned design and specification of a building may be made if a Revised Development Permission is obtained before construction is undertaken on the portion of the building that deviates from the Sanctioned Design Requirements.

Revision of Development Permission shall be mandatory in the following conditions:

1. Change in Ownership
2. Increase in utilised FSI
3. Reduction in Parking area
4. Change in Orientation of the Building
5. Change in size or location of the Common Plot
6. Change in use of Building or part thereof

For any of the above mentioned changes in a building during the course of construction, the owner should apply for a Revised Development Permission for the Building-unit or part of Building-unit as the case may be. The modified Development Requirements may be examined by the Competent Authority for ensuring compliance of the building to these Development Regulations. No deviations in contravention of the provisions of the act, and/or these regulations shall be permitted.

Procedures for obtaining a Revised Development Permission are specified in Regulation No. 5.2.

#### **3.8.3 Revalidating a Development Permission**

A Development Permission may be revalidated provided procedural requirements for revalidating a Development Permission are met with.

A Development Permission that may lapse due to non-commencement of work, may be revalidated for a period of one year. The revalidated period shall in no case exceed three years in the aggregate that is for a total period of four years. The period of validity shall begin from the date of commencement certificate/ development permission.

The procedures for revalidating a Development Permission are specified in Regulation No. 5.3.

### 3.9 Building Use Permission Required

It is mandatory to obtain a Building Use Permission from the Competent Authority prior to occupancy or use being made of any building.

### 3.10 "Grant of Building Use Permission"

Grant of a Building Use Permission by the Competent Authority shall mean an acceptance that the construction of the building has conformed to the sanctioned design requirements as per Regulation No. 3.4 and that the Owner may use the building in conformity with the Sanctioned Use of the building.

Grant of a Building Use Permission does not constitute acceptance of correctness, confirmation, approval or endorsement of and shall not bind or render the Competent Authority liable in any way in regard to:

- (a) Title, ownership, and easement rights of the plot on which building is proposed
- (b) Workmanship, soundness of material and structural safety of the building
- (c) Variation in area from recorded areas of a Building-unit
- (d) Location and boundary of building-unit
- (e) Safety of the users of the building
- (f) NOC from Appropriate Authority
- (g) Structural reports and structural drawings

### 3.11 "Revocation of Building Use Permission"

Revocation of a Building Use Permission shall mean that the Building Use Permission is no longer valid and that the Competent Authority has withdrawn the permission granted to make use of the building.

After the Revocation of a Building Use Permission, use may no longer be made of the building for which the Building Use Permission has been revoked. Notice of Revocation of a Building Use Permission shall be issued in writing.

### 3.12 Unauthorized Use of Building

Use of any building or part of a building, without a Building Use Permission or in a manner that does not conform with its Sanctioned Use or after a Building Use Permission has been revoked, shall be deemed to be Unauthorized Use of Building.

The Competent Authority may declare the use of any building to be an Unauthorized Use if it deems the building to be unsafe for habitation or if its use poses a danger to public health or safety.

#### 3.12.1 Dealing with Unauthorized Use of Building and Unsafe Buildings

If the Competent Authority deems the use of any building or part of a building to be an Unauthorized Use of Building, it shall, by a written notice, communicate the reason and require the person making unauthorised use of building to stop the same. This written notice may be affixed to any part of the premise and shall be deemed a sufficient intimation to the occupier of such building or part of building.

If unauthorised use is not stopped, the Competent Authority may direct the person making such use to be removed from the building and may cause such necessary measures including police intervention to be taken to ensure that the person does not re-enter the building without written permission of the Competent Authority. The owner or occupier may be directed to restore by repairs, demolish or carry out any other modifications. The cost(s) of undertaking these measures shall be paid by the said person.

## General Development Control Regulations

If a use of a building or part of a building is deemed to be Unauthorized Use solely on account of a Building Use Permission not having been obtained prior to use being made of the building or part of a building and if the said use of building is in conformity with Development Regulations prescribed in Section C - Planning Regulations and with Section D - Performance Regulations, the Owner may apply for a Building Use Permission. Further use of building or part of a building may be undertaken after obtaining a valid Building Use Permission. Penalty for undertaking such Unauthorized Use of building or part of a building shall be payable before a Building Use Permission is granted and is stipulated in Schedule 16

### 3.13 Procedure for Obtaining Building Use Permission

#### 3.13.1 Building Use Permission

The Competent Authority, on receipt of Notice of Completion of Construction and a duly completed application for Building Use Permission, shall inspect the constructed building before granting a Building Use Permission, to verify its compliance to the sanctioned design and specifications within 21 days from the date of receipt of the application.

#### 3.13.2 Permission to Change a Sanctioned Use of a Building

No building or premises shall be changed or converted to a use other than the sanctioned use without prior permission of the Authority in writing. Change of use not in conformity with these regulations shall not be permissible.

The Sanctioned Use of a building may be changed provided that the new use complies with these regulations.

The procedure for changing the Sanctioned Use of a building or part of a building is specified in Regulation No. 7.2.

### 3.14 Relaxation

#### 3.14.1 "Grant of Relaxation"

Grant of a Relaxation shall mean grant of permission to deviate from a specific Regulation.

1. In the case of Building-unit/plot owned by :
  - i. - competent authority;
  - ii. government;
  - iii. government undertakings; Competent Authority may for reasons to be recorded in writing relax or waive any of the regulations in the public interest. Provided that no relaxation or waive of any of the development regulations concerning maximum built-up-area on any floor, common plot, common open plot, marginal open space, F.S.I., parking and provisions of buildings taller than 15mts shall be made.
2. Notwithstanding anything contained in foregoing regulations in case where these regulations cause hardships to the owners because of their application to the alterations not involving addition to the existing structures erected prior to the coming into force of these regulations, the competent authority after considering the merits of each individual case may relax or waive, for reasons to be recorded in writing and regulation without causing any adverse effects on the fire and structural safety requirements for the buildings. Provided that this relaxation shall not be made in any regulations for buildings taller than 15mts.
3. In the case of existing Building-units for which the layout and sub-division may have been approved by a Competent Authority; or Building-units affected by road widening; and by the Development Plan proposals made in the Development Plan, if the Competent Authority is of the opinion that

## General Development Control Regulations

such Building-units have become incapable of reasonable development unless all or any of the requirements of Planning Regulations are suitably relaxed or waived the Competent Authority may, for reasons to be recorded in writing, relax the requirement of the above mentioned regulations.

4. No relaxation in FSI shall be made in any of the regulations meant for any Building-unit having height more than 15mts. Irrespective of provisions made above, in case of development for religious building, e.g. temple, church, mosque, agari etc. up to 0.6 FSI only.

### 3.15 Competent Authority to Clarify and Interpret Provisions of the Regulations

Competent Authority shall clarify or interpret provisions of these Regulations, as specified below. Clarifications or interpretations made by the Competent Authority shall be final and binding.

**8.4 Notes:****8.4.1 Use and Zones**

1. No development shall be permitted in area designated for water body, pond and talav in Development Plan. Margins to be maintained from a designated water body shall be as per Regulation No. 23.1
2. The land designated under Section 12(2)(0) of the Act, for public purposes, the uses shall be permissible as per the requirements of concerned department.
3. For land/plot allotted to Appropriate Authority under T.P. Scheme for Public Purpose shall be utilized for uses under 'Public Purpose' irrespective of the applicable Zone or road widths.

## General Development Control Regulations

4. In case of non-conformity use with the proposals of Development Plan of Surendranagar & Wadhwan Urban Development Authority, such uses shall be continued until the useful life of the building. However repairing, structural strengthening and retrofitting shall be permitted within the building-unit. But no further amalgamation shall be permitted.

Fuelling Stations, Public-Institutional and Public Utility shall be permitted in any Zone.

## 8.4.2 Road

1. For Building-units along over-bridge or under-bridge, the total width of the DP/TP Road shall be considered for regulating permissible uses, margins and height for proposed buildings.

## 8.4.3 Building-unit in Non-T.P. Area

1. Where there is no town planning scheme, for a Building-unit/plot abutting on a Government Nalla Road, the right of way/plot boundary shall be considered as minimum 9.0 mts from the centre line of such Nalla Road. Road-side margin shall be considered from this imaginary plot boundary thus established.
2. In Non-T.P. Area and Agricultural Zone, the Development Permission shall be regulated as per the road network proposed by the Appropriate Authority.
3. For plots in Non-T.P. Areas, the applicable Zone, permissible uses and regulations shall be as per the original Survey No. of the owner.

## 8.4.4 Relaxation in Floor Space Index (FSI)

In case of Building-units affected by road widening or construction of new road, the owner may claim compensation or FSI from the Competent Authority for the surrendered land. In case of FSI, the Competent Authority shall permit the FSI of any such land / plot or Building-unit on the basis of the original boundary of the Building Unit. This is subject to conformity with all other requirements mentioned in these Regulations as per the new boundary. Before securing Development Permission on any such Building-units, owner shall have to surrender the affected land.

## 8.4.5 Building Height

1. The height of a Building shall be measured from the established Ground level to the top of the building in all cases.
2. Height for the following shall not be taken in to consideration in determining the total height of the building :
  - (a) Parapet,
  - (b) Stair-case cabin
  - (c) Water storage tank,
  - (d) Lift well, lift cabin with machine room above.
  - (e) Hollow Plinth till it is used as a hollow space.

**8.5 Development Work to be in Conformity with the Regulations**

All development work shall conform to the Development Plan proposals and the provisions made under these regulations. If there is a conflict between the requirements of these Regulations and Regulations for Town Planning Schemes, the requirements of these Development Regulations shall prevail except for the following conditions:

1. Any relaxation or special provisions mentioned against respective final plots shall prevail above these regulations.
2. For any proposed road network, the proposed roads as per Town Planning Scheme shall prevail.

**9 City Area A (Surendranagar and Wadhwan Nagarpalika area)****9—CORE AREA OF SURENDRANAGAR AND WADHWAN****9.1 Minimum Area of a Building-unit**

1. Minimum area of a Building-unit shall be 18sq.mts with no side less than 3.0mts in width.
2. Amalgamation shall be permitted and in such cases 10% of the land shall be kept open on the road side. Amalgamated plot should be 4000 sq.m or more.
3. All the roads of Core area Surendranagar and Wadhwan (other than DP roads) shall be kept 6m in width. Any building permission abutting on this road shall have to keep 3m from the centre of the roads.

**9.2 Permissible Uses****9.2.1 For Areas of Core City**

1. The Permissible Uses in Core Areas are: Residential, Mercantile-1, Educational-1, Education-2, Assembly-1, Religious & Rituals, Parks and Public Amenities; and these are regulated on the basis of the width of the abutting road:

No.	Road Width	Permissible
1	6mts	Residential, Educational-1, Mercantile 1B, Religious & Rituals, Parks
2	More than 6mts and up to 9mts	Residential, Educational-1, Education-2, Religious & Rituals, Parks
3	Above 9mts	Residential, Mercantile-1, Educational-1, Education-2, Assembly-1, Religious & Rituals, Parks and Public Amenities

2. The extent of Mercantile-1 uses permissible in a Building-unit shall be regulated according to the width of the road on which it abuts and as under:

No.	Road Width	Floors on which Mercantile Use
1	9.0m and less than 12.0 m	Ground Floor Only
2	12.0mts and above	All Floors

**9.3 Floor Space Index:**

1. The maximum permissible FSI of a Building-unit shall be 2.53.
2. Mezzanine floor is included in computation of FSI.

**9.3.1 Relaxation in Built-up and FSI**

As per Planning Regulation 8.4.5.

**9.3.2 Areas not counted towards computation of FSI:**

1. All interior open-to-sky spaces such as courtyards and chowk, utility ducts in any form, shape and size required by Regulations.
2. Area used for parking at basement or hollow-plinth.
3. Basement exclusively used for parking shall have minimum height of 2.8mts, and maximum height of 3.8mts, measured from finished basement floor level to finished plinth level. Only in case of mechanised parking, there is no restriction on maximum height or number of basement floors used for parking purpose.

4. For basement provided exclusively for parking, other permissible uses shall be permitted up to a maximum area of 25% of the total built-up area of the basement floor. This non-parking area shall be calculated towards the computation of FSI.
5. Hollow plinth provided for parking with the following conditions:
  - (a) Such hollow plinth shall be provided within the building-unit except on road-side facade.
  - (b) Hollow plinth provided for the purpose of parking shall have maximum height of 3.5mts from finished ground level to finished first floor level and a minimum height of 3.0mts from finished ground level to finished first floor level.
  - (c) Hollow Plinth can have provision for electric meter room, room for telephonedistribution board, bathroom, water room, servant room, and security cabin and entrance foyer if the total area does not exceed 15sqm. This area shall not be considered towards computation of FSI.
6. Loft provided as per Performance Regulation No. 19.1.10 up to a maximum of 30% of the enclosing space.
7. Staircase and stair cabin provided as per Performance Regulation No. 20.0 with the following conditions:
  - (a) Staircase with maximum intermediate landing width equal to the width of stair,
  - (b) Maximum landing width at floor level shall be three times the width of stair (x mts) including additional space (0.5xmts) provided at either side of the stair landing as staircase and staircase lobby (free of FSI)  $x =$  width of one flight of staircase common area (illustrated across).
8. Lift, lift well with lift cabin, stair cabin, lift landing of lift well and water tank, including the walls provided as per Performance Regulation No. 20.0 with the following conditions:
  - a. The width of the lift landing shall be considered equal to the maximum width of the lift well including walls (x mts) with an additional space (0.5x mts) at either side of the lift provided as common area as illustrated across.
  - b. The depth of the lift landing shall be two times the maximum width of the lift well including walls (x mts) as illustrated across.
9. The width of the lift landing shall be considered twice the width of the lift well including walls including additional space provided at either side of the landing, and the depth shall be of twice the width of the lift well as illustrated across.
10. Vehicular ramps and pedestrian ramps provided as per Performance Regulation No. 19.1.15
11. Electric room and electric substation as specified by Competent Electric Company.
12. Open-to-sky space used for solar-water heating system, outdoor units for air-conditioners or mechanical ventilation shall be exempt from FSI.

#### 9.4 Permissible Ground Coverage

##### 9.4.1 For Building-units with area 500 sq.mts or less

In case of open or partially built plot, the ground coverage shall be the entire area of the Building-unit.

##### 9.4.2 For Building-units with area more than 500sq.mts and up to 1500 sq. mts

The permissible ground coverage shall be up to maximum 70% of the entire building-unit area.

##### 9.4.3 For Building-units with area more than 1500sq.mts

The permissible ground coverage shall be up to maximum 60% of the entire building-unit area.

## General Development Control Regulations

**9.5 Maximum Permissible Building Height**

1. The maximum permissible building height shall be regulated according to the width of the road on which it abuts and as prescribed below:

No.	Road Width (in meters)	Maximum Permissible Building Height (in meters)
1	6mts	10.0
2	More than 6mts and up to 9mts 12mts	15.0
3	12.0mts and above	25.0

2. Note: Minimum Road width shall be 6.0 m. For Building-units abutting a khadki, chowk, fadia, alley or cul-de-sac, the maximum permissible Building Height shall be regulated as per the width of the road on which it is abutting to such khadki, chowk, fadia, alley or cul-de-sac as mentioned in table above.
3. For the road width to be extended, additional FSI as incentive may be given to the owner equivalent to the area deducted within the road widening.

**9.5.1 Regulation based on Building Height:**

1. Minimum width of any interior open-to-sky space, which is used for light and ventilation of the room, shall be regulated on the basis of the building height as per provisions of Planning Regulation 9.4.6 and as per table below:

Sr.No.	Building Height (in meters)	Minimum width (in meters)
1	Upto 10 mts	2.0
2	Above 10mts and up to 15mts	3.0
3	15mts and above	4.0

2. This open-to-sky space shall be provided at the level at which the light or ventilation is borrowed.
3. For the purpose of the above Regulations, the depth of the room shall not be more than three times the width of the room which abuts on the air space.

**9.6 Common Plot**

Common Plot shall be provided based on Planning Regulation 12.9 as applicable.

**9.7 Parking:****9.7.1 For Areas in Core City**

1. Parking spaces for vehicles shall be provided within the Building-unit for every new Building and /or extension in existing building constructed for the first use and /or when the use of old building is changed to any of the uses mentioned in Planning Regulation 12.10.
2. For Building-unit with area less than 100sq.mts for residential use, parking shall not be required. For Building-units with area more than 100sq.mts, parking shall be provided as per Planning Regulation 12.10.
3. For Building-unit with area less than 60sq.mts for non-residential use, parking shall not be required. For Building-units with area more than 60sq.mts, parking shall be provided as per Planning Regulation 12.10.
4. In case it is not feasible to provide the required parking as per Regulations due to any constraint, the Competent Authority may recover fees for deficit parking. This fee shall be decided by the Competent Authority and revised from time to time.

**9.8 Basement:**

1. Basement may be provided with adequate structural safety during construction such as shoring and strutting and as per Performance Regulation 22.0.
2. Road-side margin of 3 mts shall be provided and top level of basement slab to be matched with road camber.
3. For margins except Road-side margin, space of 3.0mts shall have to be kept from adjoining building-unit boundary for construction of basement.
4. Basement shall be allowed for parking if the area of Building-unit is more than 600sq.mts.
5. For Building-units with area more than 1500sq.mts, basement shall be allowed for parking at two levels.

**9.8.1 Use of Basement**

1. Permitted uses in Basement are: parking, safe deposit vault, A.C. Plant, storage other than inflammable material.
2. No habitable use shall be permitted in the basement.

**9.9 Addition or Extensions to Existing Structure:****9.9.1 For Other Areas in Core Walled City**

1. The addition shall comply with all Regulations for construction of a new building.
2. No addition or extension to a building shall be allowed unless the addition or extension is such as would be permissible if the whole building were reconstructed from the plinth with the open spaces required under the Regulations applicable to the site of the building at the time of the proposed addition or extension.
3. No addition or extension to a building shall be allowed which would diminish the minimum extent of open air space which is required by the Regulations applicable to the site of the building at the time of the proposed addition or extension.

## General Development Control Regulations

**10- GAMDAL OTHER THAN SURENDRANAGAR AND WADHWAN****10 Gamtal (Gamtal other than Surendranagar and Wadhwan nagarpalika area)**

The following regulations are applicable for Gamtal.

**10.1 Minimum Area of a Building-unit**

1. Minimum area of a Building-unit shall be 18sq.mts with no side less than 3.0mts in width.
2. Amalgamation shall be permitted and in such cases 10% of the land shall be kept open on the roadside. Amalgamated plot should be 4000 sq.m or more.

**10.2 Permissible Uses**

1. The types of uses permissible on a Building-unit shall be regulated according to the width of the road on which it abuts as mentioned below:

No.	Road Width	Building Uses Permissible
1	less than 9 mts	Residential, Mercantile IB
2	9 mts and less than 12 mts	Residential, Mercantile-I
3	12 mts and less than 18 mts	Residential, Mercantile-I, Religious, Public-Institutional
4	18 mts and less than 24 mts	Residential, Religious, Assembly-I, Public-Institutional
5	24 mts and less than 30 mts	Residential, Mercantile-I, Religious, Assembly-I, Public-Institutional, Educational-I
6	30 mts and more	Residential, Mercantile-I, Religious, Educational-2, Institutional, Assembly-I, Public-Institutional,

2. The extent of Mercantile-I uses permissible in a Building-unit shall be regulated according to the width of the road on which it abuts and as under:

No.	Road Width	Floors on which Mercantile Use is Permissible
1	9 mts and less than 12 mts	Ground Floor Only
2	12 mts and less than 18 mts	Ground and First Floor Only
3	18 mts and Above	All Floors

**10.3 Floor Space Index:**

The maximum permissible FSI of a Building-unit shall be 1.53.

**10.3.1 Relaxation in FSI**

As per Planning Regulation No. 8.4.5

**10.3.2 Areas not counted towards computation of FSI:**

As per Planning Regulation No. 9.3.2.

**10.4 Permissible Ground Coverage**

As per Planning Regulation No. 9.4.

## General Development Control Regulations

**10.5 Maximum permissible Building Height**

1. The maximum permissible building height shall be regulated according to the width of the road on which it abuts and as prescribed below:

No.	Road Width (in meters)	Maximum Permissible Building Height (in meters)
1	Up to 7.5mts	Twice the width of the abutting road or open space
2	Above 7.5mts and up to 12mts	15.0
3	12.0mts and above	25.0

2. For building-units abutting a khadki, chowk, fadia, alley or cul-de-sac, the maximum permissible building height shall be regulated as per the width of the road leading to such khadki, chowk, fadia, alley or cul-de-sac as mentioned in table above.
3. The height of a building shall be measured from the established ground level to the top of the building in all cases.
4. Height for the following shall not be taken in to consideration in determining the total height of the building:
- Parapet
  - Stair-case cabin
  - Water storage tank
  - Lift well, lift cabin with machine room above

**10.6 Open-to-Sky Space**

Open-to-sky space shall be provided for natural light and ventilation in conformity with the following Regulations. The location and dimensions of the open space shall be based on the dimensions of the Building-unit and the proposed building height, whichever is higher shall be applicable.

**10.6.1 Regulation based on Building Dimensions**

- For any Building having depth of 9.0mts or more from its front open space, an open-to-sky space with area of 5.6sq.mts with no side less than 1.8mts at plinth level shall be provided for every 9mts depth. If the width of the Building is upto 4.5mts, then the size of this open to sky space shall be 3.0sq.mts with no side less than 1.5mts.
- If the depth of the Building does not exceed 18mts and has openings at least on two sides over a street or open to sky space of 2.4mts or more in width, then above provision shall not be applicable.
- In case additional open-to-sky space is provided beyond the minimum requirements, it shall be counted towards the computation of the FSI.

**10.6.2 Regulation based on Building Height**

- Minimum width of any interior open-to-sky space, which is used for light and ventilation of the room, shall be regulated on the basis of the building height as per provisions of Planning Regulation 8.4.5 and as per table below:

Sr.No.	Building Height (in meters)	Minimum width (in meters)
1	Upto 10mts	2.0
2	Above 10mts and up to 15mts	3.0
3	15mts and above	4.0

- This open-to-sky space shall be provided at the level at which the light or ventilation is borrowed.

## General Development Control Regulations

3. For the purpose of the above Regulations, the depth of the room shall not be more than three times the width of the room which abuts on the air space.

**10.6.3 General Requirement for Open-to-Sky space**

1. Every exterior or interior, open space shall be kept free from any erection thereon and shall be kept open to sky with suitable and sufficient access.
2. No open drain except for rain water shall be constructed in any open space required by these Regulations.
3. Every such interior or exterior open air space, unless the latter is a street, shall be maintained for the benefit of such building exclusively and shall be entirely within the owner's own premises.
4. No construction work on a building shall be allowed if such work operates to reduce an open air space of any other adjoining building belonging to the same owner to an extent less than what is prescribed by any of these Regulations in force at the time of the proposed work to further reduce such open space if it is already less than what is prescribed.
5. Every open space, whether exterior or interior, provided in pursuance of any Regulation, or under an agreement lodged with the Authority shall be paved and be always kept free from any erection thereon and open to the sky, except 23cms cornice or 30cms eave or grill with opening not less than 8cms X 8cms. No weather shade or other protection shall overhang or project over the said open space or over a side set-back so as to reduce the width to less than the minimum provided under these Regulations. No open drain except for rain-water shall be free structure in any open space required by these Regulations.
6. Opening for ventilation shall open into an open to sky space with minimum dimension of 0.9mtsX0.9mts.

**10.7 Common Plot**

Common Plot shall be provided based on Planning Regulation No. 12.9as applicable.

**10.8 Parking**

1. Parking spaces for vehicles shall be provided within the Building-unit for every new Building and /or extension in existing building constructed for the first use and /or when the use of old building is changed to any of the uses mentioned in Planning Regulation No.12.10.
2. For Building-unit with area less than 100sq.mts for residential use, parking shall not be required. For Building-units with area more than 100sq.mts, parking shall be provided as per Planning Regulation No.12.10.
3. For Building-unit with area less than 60sq.mts for non-residential use, parking shall not be required. For Building-units with area more than 60sq.mts, parking shall be provided as per Planning Regulation No.12.10.
4. In case it is not feasible to provide the required parking as per Regulations due to any constraint, the Competent Authority may recover fees for deficit parking. This fee shall be decided by the Competent Authority and revised from time to time.

**10.9 Basement**

1. Basement may be provided with adequate structural safety during construction such as shoring and strutting and as per Performance Regulation No.22.0.
2. Road-side margin of 4.5mtsshall be provided.
3. For margins except Road-side margin, space of 3.0mts shall have to be kept from adjoining building-unit boundary for construction of basement.
4. Basement shall be allowed for parking if the area of Building-unit is more than 600sq.mts.

## General Development Control Regulations

5. For Building-units with area more than 1500sq.mts, basement shall be allowed for parking at two levels.

**10.9.1 Use of Basement**

1. Permitted uses in Basement are: parking, safe deposit vault, A.C. Plant, storage other than inflammable material.
2. No habitable use shall be permitted in the basement.
3. Permitted uses in Basement of a Hospital Building: Radiation-producing device, Radiation Therapy Room, MRI or X-Ray room.

**10.10 Addition to Existing Structure**

1. The addition shall comply with all Regulations for construction of a new building.
2. No addition or extension to a building shall be allowed unless the addition or extension is such as would be permissible if the whole building were reconstructed from the plinth with the open spaces required under the Regulations applicable to the site of the building at the time of the proposed addition or extension.
3. No addition or extension to a building shall be allowed which would diminish the minimum extent of open air space which is required by the Regulations applicable to the site of the building at the time of the proposed addition or extension.

## General Development Control Regulations

**11 GAMTAL EXTENSION**

The following regulations are applicable for Gamtal Extension areas as identified on the zoning map, surrounding the Gamtal Areas.

**11.1 Permissible Uses**

The types of uses permissible in a Building-unit shall be regulated according to the Zoning Table in Planning Regulation No. 8.2 and as per width of the road and as mentioned in Planning Regulation No. 12.1.1, except Industrial Uses.

**11.2 Development of Land**

As per provisions of Planning Regulation No. 12.3

**11.3 Floor Space Index (FSI)**

The maximum permissible FSI of a Building-unit shall be 1.2.

**11.3.1 Relaxation in FSI**

As per Planning Regulation No. 8.4.5.

**11.3.2 Areas not counted towards computation of FSI:**

As per Planning Regulation No. 12.4.3

**11.4 Maximum Permissible Height**

The maximum permissible Building Height shall be regulated as per Planning Regulation No. 8.4.5 according to the width of the road on which it abuts and as prescribed below:

No.	Road Width (in meters)	Maximum Permissible Building Height (in meters)
1	Less than 9 mts	10.0
2	9.0mts and less than 12.0	15.0
3	12.0 mts and above	25.0

**11.5 Margins**

As per provisions of Planning Regulation No. 12.6

**11.6 Permissible Ground Coverage**

Entire area available after providing for the required margins, common plot and other Regulations may be utilized for construction of the super structure.

**11.7 Internal Open Space**

As per provisions of Planning Regulation No. 12.8

**11.8 Common Plot**

As per provisions of Planning Regulation No. 12.9

**11.9 Parking**

As per provisions of Planning Regulation No. 12.10

**11.10 Basement**

As per provisions of Planning Regulation No. 12.11

## General Development Control Regulations

**12 ZONES –Residential Zone-1 & 2, Institutional, Industrial &Traffic and Transport Zone**

The following regulations are applicable for the following zones:Residential Zone-1, Residential Zone-2, Institutional Zone, Industrial Zone, and Traffic and Transport Zone.

**12.1 Permissible Uses**

The specific type of building uses permissible on a Building-unit shall be on the basis of the respective zone and regulated by the road width it abuts on and the area of the Building-unit.

**12.1.1 Permissible Uses by Road width**

- The types of uses permissible in a Building-unit shall be regulated according to the width of the road on which it abuts as under:

No.	Road Width	Building Uses Permissible as per respective Zone indicated in the Zoning table in Regulation No.
1	less than 9 mts	Residential Dwelling-1, Dwelling-2, Mercantile 1B
2	9 mts and less than 12 mts	Residential Dwelling-1, Dwelling-2, Mercantile-1,
3	12 mts and less than 18 mts	Residential Dwelling-1, Dwelling-2, Mercantile-1, 1A, Mercantile-2, Educational-1, Assembly-1, Temporary use, Public-Institutional, Public-Utility.
4	18 mts and less than 24 mts	Residential Dwelling-1, Dwelling-2, Mercantile-2, Educational-1, Educational-2, Institute, Hospitality, Assembly-1, Parks, Service Establishment, Temporary use,
5	24 mts and less than 30 mts	Residential Dwelling-1, Dwelling-2, Mercantile-2, Recreational, Educational-2, Institute, Hospitality, Assembly-1, Service Establishment, Temporary use, Parks,
6	30 mts and more	Residential Dwelling-1, Dwelling-2, Mercantile-2, Mercantile-2A, Mercantile-3, Recreational, Education-2, Hospitality, Assembly-1, Assembly-2, Public-Institutional, Service Establishment, Sports and Leisure, Temporary use,

Note: Public Utility shall not be regulated on the basis of Road Width.

- The extent of Mercantile-1 and Mercantile-2 uses permissible in a Building-unit in all Zones shall be regulated according to the width of the road on which it abuts as under:

No.	Road Width	Floors on which Mercantile Use is Permissible
1	9 mts and less than 12 mts	Ground Floor Only
2	12 mts and less than 18 mts	Ground and First Floor Only
3	18 mts and Above	All Floors

- All permissible non-residential Dwelling-1 and non-Dwelling-2 uses in Residential-1 and Residential-2 zones may be permitted on the ground floor or any other floor in a residential dwelling if provided with separate means of access/staircase.
- Apart of residential Dwelling-1 and Dwelling-2 building may be permitted for use as office in case of professional requirements. This is subject to a maximum 150sq.mts and parking for this purpose shall be provided.

**12.1.2 Permissible Uses by Area of the Building-unit**

No.	Building Use	Area of Building unit
1	Religious	Minimum 500 sq.mts
2	Fuelling Station without Service Station	Minimum 1000 sq.mts

## General Development Control Regulations

No.	Building Use	Area of Building unit
3	Hospitality	Minimum 2000 sq.mts
4	Education-2, Hospitality, Fuelling Station with Service Station	Minimum 2000 sq.mts
5	Education-2, Assembly 1,2, Institute	Minimum 3500 sq.mts
6	High rise building	Minimum 1500 sq.mts.

## 12.2 Regulations based on Area of Building-unit

## 12.2.1 Area and Dimension of a Building-unit

1. Minimum area of a Building-unit shall be 10000 sq.mts.
2. No side of the Building-unit shall be less than 42mts.
3. The above condition of the ratio is not applicable if the smallest side of the Building-unit is 10.5mts or more in length.

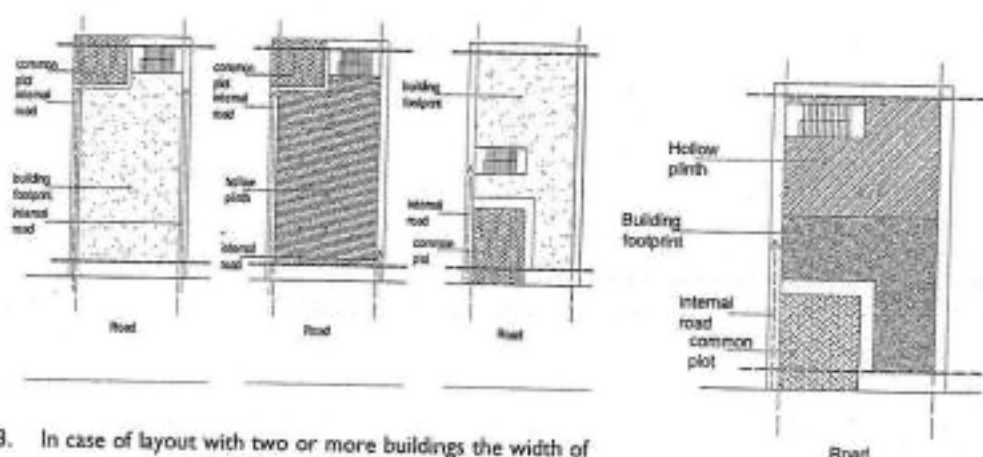

Note: The layout schemes which are sanctioned before formation of SWUDA shall deem to be granted. The plots having minimum Building-unit area of 40 sq.mts. in Wadhwan T.P.scheme and 50 to 80 sq.mts. in rest of SWUDA area which are sanctioned in layout prior to the notification regarding this SWUDA GDCR/Development Plan, shall have the rear side margin relaxation of minimum 1.5 mts. Any scheme after constitution of SWUDA will have to follow published DCRs.

## 12.3 Development of Land

## 12.3.1 Internal Road and Approach to Building and Common Plot

1. Internal road width shall be measured from its origin to the next wider road it meets.
2. In case of single building the width of approach/ internal road shall be measured based on the distance from the TP or DP road up to the edge of the building in case of hollow plinth, or location of the farthest entrance of a building in case of solid plinth.

In case of buildings connected internally or externally the length of internal road shall be considered up to the edge of the hollow plinth of the farthest building (in case of building with hollow plinth) and up to the location of the farthest entrance of the building in case of solid plinth.

3. In case of layout with two or more buildings the width of Internal Road on which the building abuts shall be as applicable for a length of above 45m category. In case of more than two buildings, approach of as applicable width shall be allowed as per table 12.3.1.4

4. The width of the Internal or Approach Road shall be based on the length and use of the Building-unit as under:

No.	Length of Road (meters)	Width of road for Residential Dwelling-1 and Dwelling-2 Use (meters)	Width of road for Non-Residential Dwelling Use (meters)
1	Up to 150mts	7.5	9.0
2	Above 150mts and up to 300mts	9.0	12.0
3	Above 300mts	12.0	18.0

Formatted Table

Note: If margin required is bigger than width of Approach Road or Internal Road whichever is higher shall be applicable.

#### 12.3.2 General Requirements for Internal Roads

- The Internal Road shall be provided up to each individual building.
- Internal road width shall be measured in length from the farthest point of its origin to the next wider road it meets.
- In cases where the road is in continuation with any private road in the adjoining estate or any public road continuous to the estate, the length of the adjoining road of the public road shall be added to the length of the internal road for the purpose of determining the width of such road.
- Curves at the junction:** The curves shall be provided at the junction of roads as prescribed below:

No.	Width of the road in meters	Radius of road curvature (meters)
1	7.5 or less	Half the width of wider road
2	More than 7.5 and up to 18	Half the width of wider road
3	More than 18 up to 30 m	Half the width of wider road
4	More than 30 m	Half the width of wider road

Note: The width of the wider road shall be taken into consideration in determining the radius of the curvature at the junction of roads of different widths.

- The shape of the plots and the junction of the roads, at the corners shall be designed as directed by the Competent Authority.
- The alignment of the internal road or roads shall be regulated to be in continuation of the public or private roads continuous to the applicant's Building Unit; but in case of termination of an internal road or roads; a turning circle with diameter of 13.5mts or 12mts. x 6 mts. turning "T" shall be required at the cul-de-sac. This requirement may be waived for such road with width of 7.5mts if the length does not exceed 110 mts.
- The Development Permission shall be regulated as per the proposed road network by the competent authority.

## General Development Control Regulations

**12.3.3 Amalgamation and Subdivision of Building-unit**

The owner or developer shall be required to get the land reconstituted by the Competent Authority as 'Building-unit' or 'Building-units' before amalgamation or subdivision of the land. Development Permission shall not be granted without fulfillment of this requirement.

**12.3.4 Amalgamation and Subdivision of Building-unit with Existing Structures**

In the case of Building-units with existing buildings, its sub-division or amalgamation shall not be approved unless it fulfils all the requirements under these Regulations.

**12.3.5 Layout for Amalgamation and /or Subdivision of Building-unit**

1. In case of subdivision or amalgamation, the depth of Building-unit shall not exceed twice the width of the proposed Building-unit fronting on the road. However, this condition of ratio will not be applicable if the length of the smaller side of the subdivided Building-unit is equal or more than 10.50mts.
2. Amalgamation of Building-unit abutting on a road with width equal or more than 18.00 mts, shall be permitted if depth of the Building-unit shall not exceed three times the frontage of the Building-unit abutting on road.
3. No side of the sub-divided plot shall be less than 9mts.
4. Building-units with area of 100 sq.mts shall be permitted on road width of 9mts or less.

**12.3.6 Contribution of Land for any development in Non-TP Areas**

1. For development in confirmation with zoning, where the Town Planning Scheme is not declared except Agriculture Zone, the Competent Authority shall enforce owners/applicant to contribute land admeasuring up to 40% in aggregate of its plot/Building-unit to the Competent Authority for providing roads, public purpose and multipurpose activities.
2. The competent authority shall plan for proper access, circulation and mobility in the area, prepare a road network plan, which shall synchronize with any, existing road or development plan.
3. The above contributed land shall be adjusted by preparing TPS.
4. The use of Public Purpose Land shall be applicable irrespective of the zones or road width.

**12.3.7 Development on kabrastan, burial ground etc.**

The land occupied by the graveyards, kabrastans, burial grounds, crematoria and allied actions in the Development Plan shall be kept permanently open. Competent Authority may permit structures to be built for specific purpose.

**12.3.8 Development on Open Space Plots**

1. 20% of the area of the "Open Space Plots" provided under TP Schemes may be utilised for the construction with required margins for the common/institutional/community uses. Such construction shall be permitted with basement, ground floor or a floor on hollow plinth.
2. In case the building is on hollow plinth, in addition to the stair cabins and ramps, 5% of the total permissible built-up area of this plot shall be allowed to be built-upon for the construction for store room, security cabin, toilet etc. at the ground level. The rest of the "Open Space Plot" shall be left to open to sky.

**12.4 Floor Space index (FSI)****12.4.1 Permissible Floor Space Index (FSI)**

1. The maximum permissible FSI shall be regulated as per Planning Regulation No.8.2.
2. Area covered by Atrium and mezzanine floors shall be counted towards computation of FSI.

**12.4.2 Relaxation in Floor Space Index (FSI)**

As per Planning Regulation No.8.4.5

**12.4.3 Areas not counted towards computation of FSI:**

1. Hollow Plinth: Spaces of hollow plinth provided for the purpose of parking with maximum height of 3.5mts and a minimum height of 3.0mts from finished ground level to finished first floor level.
2. Hollow Plinth can have provision for electric meter room, room for telephone distribution board, bathroom, water room, servant room, and security cabin and entrance foyer if the total area does not exceed 15sqm. This area shall not be considered towards computation of FSI.
3. All interior open to sky spaces, utility ducts in any form, shape and size required either by design or Regulations. However, an atrium shall be counted towards the computation of FSI.
4. Open-to-sky space of common plot is not counted towards FSI

5. Loft provided as per Performance Regulation No.19.1.10 up to a maximum of 30% of the enclosing space

6. Basement exclusively used for parking. Such basement shall have minimum height of 2.8mts, and maximum height of 3.8mts, measured from finished basement floor level to finished upper/plinth level. Only in case of mechanised parking, there is no restriction of maximum height or number of basement floors used for parking purpose.

7. In any marginal open space- weather sheds, sun breakers and horizontal or vertical projections shall be permitted up to 0.60mts. These projections may also be part of the facade articulation, but shall in no cases become a part of the habitable space.

8. Staircase, Stair Cabin provided as per Performance Regulation 20.0:
  - a. Staircase with maximum intermediate landing width equal to the width of stair including the wall;
  - b. Maximum landing width at floor level shall be three times the width of stair (x mts) including additional space (0.5x mts) at either side of the staircase provided as common area.
  - c. Staircase provided within an individual dwelling unit in an apartment building, shall be included in computation of FSI.
9. Lift, lift well with lift cabin, lift landing of lift well and water tank, including the walls provided as per Performance Regulation 20.0
  - a. The width of the lift landing shall be considered equal to the maximum width of the lift well including walls (x mts) with an additional space (0.5x mts) at either side of the lift provided as common area (illustrated across).
  - b. The depth of the lift landing shall be two times the maximum width of the lift well including walls (x mts).
10. Vehicular ramps and pedestrian ramps provided as per Performance Regulation No.19.1.15.
11. Skip Floor and Refuge area provided for fire safety as per Performance Regulation No. 24.0. Skip floor shall have a maximum clear floor height of 2.1mts and shall not be enclosed with walls. Skip floor may be used for service area such as provision of air-handling units, etc. Refuge area shall be provided as per National Building Code (NBC).
12. Electrical Sub-station, Transformer room, Box-type transformer, Section Feeder Pillar, Auxiliary Power Back-up System and meter room according to the norms of the Competent Electric Company.
13. Area provided and used for parking at any floor level.
14. Open-to-sky space used for solar-water heating system, outdoor units for air-conditioners or mechanical ventilation shall be exempt from FSI.

## 12.5 Building Height

### 12.5.1 Maximum Permissible Height

The Maximum Permissible Building Height shall be as per provisions of Planning Regulation No.8.4.5 and regulated according to the width of the road on which it abuts as prescribed below:

No.	Road Width (in meters)	Maximum Permissible Building Height (in meters)
1	Less than 9 mts	12.0
2	9.0 mts and less than 18 mts	16.5
3	18.0 mts and above	40.030

## 12.6 Margins

## 12.6.1 Road Side Margins for Residential Dwelling-1 and Dwelling-2 and Non-Residential Dwelling Uses (Except Industrial and Special Buildings)

No.	Road Width (in meters)	Road Side Margin for Building-unit Margins for low rise	Margins for high rise	Formatted Table
1	Up to 9	3.02.5	High rise not permitted	Formatted Table
2	Above 9 and up to 12	4.53		
3	Above 12 and up to 18	6.04.5		
4	Above 18 and up to 30	6.04.5	6.0	Formatted Table
5	Above 30 and up to 60	6.0	9.0	
6	Above 45	9.0	9.0	

- Road Side Margin in a Building-unit shall be regulated by the Road width it abuts on as mentioned in the table above:
- For Building-units with two or more abutting roads, the Road-side margin shall be applicable on all such abutting sides as illustrated below:

## 3. Build-to-Line

- The Build-to-Line shall be considered as the imaginary line formed after leaving the Road Side margin and the required side margins.

## 12.6.2 Minimum Road Side Margin for Industrial Use

The Road Side Margin for Industrial use shall be regulated by the Road width it abuts on as mentioned in the table below:

No.	Width of Road (meters)	Road Side Margins (in meters)
1	Up to 12mts	As per side margin
2	Above 12mts and up to 18 mts	6.0
3	Above 18mts and up to 30mts	7.5
4	Above 30.0mts and more	9.0

## General Development Control Regulations

## 12.6.3 Side and Rear Margins

The minimum Side and Rear (all other than Road side) Margins in a Building-unit shall be regulated on the basis of the area and proposed height of the Building as indicated in the tables Regulation No. 12.6.5. These are not applicable for Special Buildings.

## 12.6.4 Minimum Side and Rear Margins for Building-units up to 500sq.mts for Residential Zones

## 1. Required Side and Rear Margins:

Area of the Building-Unit	Building Use	Required Rear Margins	Required Side Margins
Up to 150 sq.m	Detached & Semi detached dwellings, tenement	2.25 mts	Not Required
	Flats, Apartments, Hostel		1.5 mts
Above 150 sq.m & up to 300 sq.m	Detached & Semi detached dwellings, tenement	2.25 mts	1.5 any one side
	Flats, Apartments, Hostel		1.5 mts
Above 300 sq.mt & up to 500 sq.m	Detached & Semi detached dwellings, tenement	2.25 mts	3.0 mts
	Flats, Apartments, Hostel		

Area of the Building-Unit	Building Unit	Required Rear Margins	Required Side Margins
Up to 120	Low rise	2.5	0.0

## General Development Control Regulations

High rise >30 m	8.0	8.0
-----------------	-----	-----

Note: For Building Unit area above 500 sq. mts., the minimum side and rear margin shall be as per clause no. 12.6.7.

- In case of subdivision of a Survey No./ Final Plot with a sub-divided Building-unit upto 500 sq.mts., Building-unit shall have minimum 3mts margin on the side abutting the adjacent Survey No./ Final Plot. Refer illustration below for further clarity:

#### 12.6.5 Minimum Side and Rear Margins for Industrial Use

Minimum side and rear margin along the periphery of the Building-unit and the minimum margin between two detached structures shall be as stated below:

No.	Area of the Building-unit	Required Side and Rear Margins (in meters)
1	Upto 1000 sq.mts	4.5
2	Above 1000 sq.mts	6.0

Note: A subdivided industrial building unit having area up to 1000sq.m can keep one of the side margins as a zero margin provided with consent from the respective adjacent co-owner.

#### 12.6.6 Minimum Side and Rear Margins for other than Residential and Building-units with area above 500-sq.mts

No.	Building Height	Required Margins (in-meters)
1	Up-to-15mts	3.0
2	Above 15mts and up-to-25mts	4.0
3	Above 25mts and up-to-40mts	6.0

#### 12.6.7/12.6.6 Minimum Margin between Buildings

- Minimum distance between two buildings shall be as per the table below:

No.	Building Height	Required Margins (in meters)
1	Upto 16.5mts	4.5
2	Above 16.5mts and up to 25mts	6.0
3	Above 25mts and up to 40mts	9.0

- If two buildings next to each other have different heights, required margin for taller building shall be applicable. For example- if one building is of 25mts and the adjacent building is of 40mts in height the minimum margin between these two buildings shall be 9.0mts.

## General Development Control Regulations

3. The length of common wall between any two semi-detached buildings shall not be less than 25% of the maximum width of the building parallel to common wall joining together at every floor.

## 42.6.8 | 2.6.7 Margins from Common Plot

No.	Building Height	Required Margins (in meters)
1	Upto 25mts	3.0
2	Above 25 mts	6.0

## 42.6.9 | 2.6.8 Permissible Uses in Margins

1. For Residential Dwelling-I and Dwelling-2: (Except Row House, Cottage Industry and Pre-School)
  - a. Ancillary uses such as parking garage, servant quarter, w.c. and bathroom shall be permitted as a part of the permissible FSI of the Building Unit, in side or rear marginal space but in no case in Road-side margins; with maximum permissible ground coverage of 16.5 sq.mts and maximum permissible height of 3.0 mts.
  - b. Surface water tank up to 1.5mts in height.
  - c. Open, cantilever staircase with maximum width of 1.00mts and landing space of maximum 2.00mts at floor level shall be permitted in side or rear margins except on roadside margin.
  - d. Doors, windows or projections shall not be permitted along the common wall of the adjoining property. No rainwater from the roof shall be drained in the adjoining property.
  - e. Partition wall shall be allowed along the Building Unit boundary on common boundary of semi-detached building and on marginal space between two structures up to a maximum height of 1.5mts.
2. For Residential Dwelling-I and Dwelling-2: Underground water tank, percolation well, bore well and pump room with a maximum size of 2mts X 2mts and with a maximum height of 2mts.
3. For Building-units of all uses other than Industrial and Institute:  
A structure for security cabin including toilet of maximum dimensions of 2.0mts X 4.0mts with maximum height of 2.4mts shall be permitted in the Road-side margin. The area of such construction shall not be counted towards computation of FSI.
4. For Industrial and Institutional use: a security cabin structure up to maximum ground coverage of 15sq.mts with maximum height of 2.4mts shall be permitted in the road-side margin. Such a structure shall be at a minimum distance of 4.5mts from the Building. The area of such construction shall be counted towards computation of FSI.
5. Pedestrian access path and stepped approach as per Performance Regulation No.19.1.5 shall be permissible in the marginal space.
6. Common Plot shall be permitted in the marginal space.
7. Vehicular connecting ground level with basement level shall be permitted in side and/ or rear margin only for:  
Building-unit with area up to 2000 sq.mts; or  
Building-unit with buildings up to 25mts in height  
6 m margin shall be maintained in all sides.

## General Development Control Regulations

8. For a building-unit using marginal space for providing electrical infrastructure such as sub-station (as per Regulation No. 12.6.9 (9)), underground water tanks (as per Regulation No. 23.4 and others) these permissible uses shall be allowed on only one marginal side except Road-side margin. The other marginal spaces shall be kept clear and accessible at ground level as illustrated above.
9. Electrical Infrastructure: Electrical Sub-station, Transformer room, Box-type transformer, Section Feeder Pillar, Auxiliary Power Back-up System and meter room according to the norms of the Competent Electric Company shall be permitted in marginal space except Road-side margin of the Building-unit. The area of such construction shall not be counted towards FSI.
10. Refuge Area for Building with height more than 25mts: Cantilever Refuge area required as per Section D: Performance Regulation No.20.24 may be permitted.
11. Fire Escape Staircase for Building with height more than 45mts: Fire Escape Staircase required as per Section D: Performance Regulation No. 20.0 shall be permitted in marginal space except road-side margin.
12. Pedestrian Ramp: as per Section D: Performance Regulation No.19.1.5 shall be permissible in marginal space.
13. Parking shall be permitted in margins except in Approach Road as illustrated below and as per Regulation No. 12.10.1.7 and 12.10.1.8
14. Basement provided as per Planning Regulation No. 12.11 shall be permitted within side and rear margins.

15. In any marginal open space, weather sheds sun breakers horizontal or vertical projections shall be permitted up to 0.60mts. These projections may also be part of the facade articulation at various

## General Development Control Regulations

levels, but shall in no cases be at the floor level such that they become a part of the habitable space. Such projections shall be allowed above a minimum height of 2.4mts from the ground level.

16. For any Building-units with following uses- Residential Dwelling-1 and Dwelling-2, Assembly-1, Educational-1,2&3, Institute, Public Institutional; the building-unit level may be permitted to be raised up to plinth level. Also steps leading to ground floor on solid plinth shall be permitted.

## 12.6.10 12.6.9 Restricted Use in Margins

1. The required marginal open spaces except permissible uses as per Planning Regulation No. 12.6.10 shall be kept permanently open to sky.
2. This space shall not be used for stocking materials or loose articles for the purpose of trade or otherwise, putting up fixed or movable platforms.
3. Parking shall not be allowed in the marginal space provided as approach road.
4. Vehicular ramp leading to parking in floors above ground level shall not be permitted in the margin. Or the side margin shall be minimum 6.0m wide for putting ramp for vehicles.
5. Pedestrian ramps connecting ground floor with upper floors shall not be permitted in the marginal spaces.
6. The sunk in lower ground floor or basement provided for the purpose of light/ ventilation shall not be permitted in the marginal open space.
7. No difference shall be permitted in the ground level of the marginal space of the building (in cases where the permitted margin of the basement is lesser than the permitted margin of the super structure).

## 12.7 Permissible Ground Coverage

For Residential-1, Residential-2, Traffic and Transport Zone, Public Institutional, Industrial Zones, the entire area available after providing for the required Margins, Common Plot and other Regulations may be utilized for construction of the super structure.

## 12.8 Internal Open-to-Sky Space

The minimum width of any interior open-to-sky space used for light or ventilation of the rooms shall be regulated based on the smaller side of this open-to-sky space as follows:

No.	Building Height	Minimum dimension of the smaller side
-----	-----------------	---------------------------------------

## General Development Control Regulations

1.	Upto 15 mts	1.5mts
2.	Above 15 mts and up to 25mts	2.5mts
3.	Above 15 mts and upto 40 mts	3.0mts

## 12.9 Common Plot

## 12.9.1 Minimum Area of Common Plot

Common Plot is required for Building-units of area 2000sq.mts or more in all zones other than agriculture zone as per following Regulations:

No.	Use	Area of the Building-unit	Minimum Required Area of Common Plot
1	Residential-Dwelling-1, Dwelling-2, Mercantile-1, 2&3, Hospitality, Service Establishment	2000 sq.mts or more	10% of the area of Building-unit
2	Industrial & Traffic and Transport Zone	Up to 5000 sq.mts	-
		Above 5000 sq.mts and up to 20,000 sq.mts	8% of the area of Building-unit
		20,000 sq.mts and above	1,600 sq.mts + 5% of the area exceeding 20,000 sq.mts
3	Religious, Educational-1, 2&3 Institute, Assembly-1&2, Public Institution, Traffic and Transport Zone	2,000 sq.mts or more	20% of the Building-unit area or 400 sq.mts; whichever is more
4	For All Uses	10,000 sq.mts or more	Additional 6% as per Planning Regulation No. 12.9.2.9

**Note:** For Building-units with area less than 2000sq.mts and having buildings with height more than 25mts, a common plot shall be provided of 10% of the area of Building-unit or 200sq.mts, whichever is more.

## 12.9.2 General Requirements for Common Plot

1. The Common Plot area shall be exclusive of approaches.
2. The area of the Common Plot may be sub divided such that the minimum area of the Common Plot shall be 200 sq.mts for Dwelling-1 and Dwelling-2 and 250 sq.mts for Mercantile-1/1A/1B/2/2A/3; with no sides less than 10.0 mts.
3. Angle between adjacent sides of the Common Plot shall be 60 degrees or more.

## General Development Control Regulations

4. No construction shall be permissible in the Common Plot except Electric substation, Transformer room, Auxiliary power generator, Box-type transformer, section feeder pillar, meter room, over and underground water tank and pump room, security cabin, Community/ Society common amenities shall be allowed to be constructed in the Common Plot subject to the following requirements:
  - a. Maximum Ground Coverage of 15% of the respective Common Plot.
  - b. Maximum Height of construction shall be 7.5mts from the level of the Building Unit except in the case of overhead water tank, where more height may be permitted.
  - c. Community/ Society common facility shall be permitted on a Common Plot. The area of this Community/ Society common facility shall be considered towards computation of FSI of the Building Unit.
  - d. Such a building shall be required to maintain the minimum margin requirements between buildings with respect to the adjacent buildings as per Planning Regulation No. 12.6.8 and Road Side Margins as per Planning Regulation No. 12.6.1
5. In case of Residential-Dwelling-1 and Dwelling-2 Use, 50% of the Common Plot may be allowed to be used as parking space including drive way and aisles. Parking in common plot shall be permitted in roadside margin after leaving minimum 1.5mts from the Building unit boundary. This minimum 1.5m shall be utilised for shade giving trees and plantation purpose.
6. In case of 'all other uses except Residential-Dwelling-1 and Dwelling-2 Use', complete area of the Common Plot may be allowed to be used as parking space including driveway and aisles. Such parking shall be permitted in road-side margin after leaving minimum 1.5 mts from the building-unit boundary. This minimum 1.5m shall be utilised for shade giving trees and plantation purpose.
7. In cases where layout or subdivision of Building Unit is sanctioned with provision of required Common Plot, Common Plot shall not be insisted in case of sub-division of such sub-divided new Building-unit and / or amalgamation of such sub-plots and / or further development of such sub-divided new Building-unit irrespective of its area.
8. The Owner shall be required to give an undertaking that the Common Plot shall be used exclusively for the residents / occupants of the Building-unit. On sanction of the Development Permission, the Common Plot shall deem to have vested in the society/ association of the residents/ occupants. The Common Plot shall not be sold to any other person.
9. For a Building-unit having area of 10,000sq.mts or more an additional 6% area of the Building-unit shall be provided for thick plantation. This area shall be exclusive of the margins and Common Plot. The area demarcated for this shall have a minimum dimension of 1.5mts. The types of trees shall be selected such that they are shade-giving trees as mentioned in Schedule 22.
10. Common Plot shall not be allowed within Atrium or any covered space.

**12.10 Parking**

Parking spaces for vehicles shall be provided within the Building-unit for every new Building and /or extension in existing building constructed for the first use and /or when the use of old building is changed to any of the uses mentioned in the table below:

No.	Type of Use	Minimum Parking Required	Visitor's Parking and Remarks
-----	-------------	--------------------------	-------------------------------

## General Development Control Regulations

No.	Type of Use	Minimum Parking Required	Visitor's Parking and Remarks
1	Detached & semi detached dwelling units, Row houses, Tenement, Pre-school	1 car parking - for more than 80 sq.mts and up to 300 sq.mts of plinth area per unit. Additional 1 car parking for every 100 sq.mts additional plinth area per unit. This shall be permitted within the marginal space	Nil
	Apartments, Hostels, Dharmshala	25% of Total Utilised FSI	10% of the required parking space shall be provided as visitors parking
2	Residential Dwelling-1 and Dwelling-2 + Mercantile	(a) For respective Residential Dwelling-1 and Dwelling-2 use, parking shall be provided as Residential as the case may be (b) For respective Mercantile use, parking shall be provided 50% of total Utilised FSI	10% of residential Dwelling-1 and Dwelling-2 parking requirement (a); and 20% of the Mercantile parking in (b) shall be provided as visitors parking
2	Assembly-1,2&3	50% of Total Utilised FSI	20% of the required parking shall be provided as visitors parking
3	Sports Complex	1.0 sq.mts of parking area per person of the Total stadium capacity	
4	Mercantile, Business Building, Religious, Hospitality, Traffic and Transport Zone	50% of Total Utilised FSI	20% of the required parking shall be provided as visitors parking
4a	Institutional Buildings, Public-Institutional Buildings	50% of Total Utilised FSI	In case of Hospitals and nursing homes, additional parking of Ambulance shall be provided at the ground level.
5	Industrial, Storage	10% of the Total Utilised FSI	Nil
6	Educational	(a) Primary & Pre-Primary Schools - 25% of the Total Utilised FSI (b) Secondary & Higher Secondary Schools - 40% of the Total Utilised FSI (c) Colleges and coaching classes - 40% of the Total Utilised FSI	Facility for drop-off and pick-up shall be provided within the premise. 10% of the required parking shall be provided as visitors parking
7	Sports & Leisure	25% of Building-unit Area	
8	Parks	10% of Building-unit Area	

## Note:

- In case the maximum permissible FSI is not utilised, for any extension or additions in the future, additional parking @30% shall have to be provided as required for this additional utilised FSI.

2. Building Unit having area up to 750 sq. mts. shall be permitted to provide 30% of the utilized FSI area for parking in the place of 50% for uses as mentioned in the above table.
3. Building Unit having an area above 750 sq. mts. and upto 2000 sq. mts. shall be permitted to provide 40% of the utilized FSI area for parking in the place of 50% for uses as mentioned in the above table.

#### 12.10.1 General Requirements for Parking

1. Parking requirement for a Mixed-Use development shall be calculated on prorata basis of the FSI consumed specific to the different uses.
2. Parking is permitted at any floor level above ground and at more levels of basement as per required parking, with provision of vehicular ramp.
3. 50% of the required visitors parking shall be provided at the ground level.
4. 50% of all required parking shall be provided for cars.
5. Parking area includes parking space, driveway and aisles but excludes approach road, vehicular lift and vehicular ramps.
6. Parking layouts with minimum size requirements for parking space, driveways and access lanes shall be provided as prescribed in Section D: Performance Regulation No. 19.2 and Regulation No. 19.1.15.
7. Parking shall be permitted in side or rear margins except in Approach Road as per Regulation 12.6.10
8. Provided that parking shall be allowed in any road-side margin having building unit area upto 750 sq. mts.
9. Parking area should be retained as effective parking space and shall be maintained with light and ventilation system if provided in an enclosed area
10. In cases where misuse of parking space is noticed, the use of the entire building shall be discontinued by the Competent Authority. Building use shall be permitted only after the required parking spaces are provided. High penalty shall be levied considering the period of misuse of the parking space and the benefit derived out of misuse as decided by the Competent Authority from time to time.
11. For multi-level parking, a vehicular ramp shall be necessary.
12. If parking is provided on a terrace with vehicular elevator, vehicular ramp is not necessary if parking space is provided with provision of floor sprinklers.
13. Parking shall not be permitted within an Atrium.

#### 12.11 Basement

In a Building-unit, the Basement shall be permitted on the following conditions.

##### 12.11.1 Margins

1. No Basement shall be permitted in the required Road side marginal space.
2. The side and rear side margins for the basement shall be 4.5mts from the Building-unit/Plot boundary. A combined shared basement parking shall be permitted using full marginal space other than road side Road Side margin of building unit with the consent of the adjoining building unit owner for new development.

## General Development Control Regulations

3. For building-units with area less than 500sq.mts, basement shall be permitted with margins as per Planning Regulation No. 12.6.4 from the common wall of adjacent existing building.
4. Basement shall be permitted under common plot, internal road and internal marginal space for exclusive use of parking only.

## 12.11.2 Extent of Basement

1. Basement shall not be allowed for the purpose of parking for Building-units with area less than 600 sq.mts.
2. Basement is permitted, irrespective of size, for all other permissible uses other than parking at only one level. This area shall be counted towards FSI.
3. Basement may be permitted at more levels as per required parking.

## 12.11.3 Height of Basement

Maximum Height of the Basement shall be 3.8mts and minimum height shall be 2.8mts from finished basement floor level to finished upper level.

## 12.11.4 Permissible Uses in Basement

1. Permitted uses in Basement are: parking, safe deposit vault, A.C. Plant, storage other than inflammable material, Sewage Treatment Plant.
2. No habitable use shall be permitted in the basement.
3. Permitted uses in Basement of a Hospital Building: Radiation-producing device, Radiation Therapy Room, MRI or X-Ray room.
4. For basements exclusively for parking, any other permissible use is permitted only in basement level-1 up to a maximum area of 25% of the total built-up-area of the basement floor. This non-parking area shall be calculated towards the computation of FSI.

## 12.11.5 Services

No water connection or drainage connection shall be permitted in the Basement. In no case shall a connection with normal drainage line be provided in the Basement.

## 12.12 Addition to Existing Structure:

1. The addition shall comply with the Regulations for construction of a new building.
2. For approved, individual, existing, detached and semi-detached dwelling units, permissible upper floors may be permitted as per sanctioned margins, staircase and projections.

**12.13 Addition in Building-units with Existing Buildings:**

1. For Building-units with approved existing buildings, additional buildings shall be permitted with compliance to Regulations for construction of a new building.
2. The additional buildings shall be permitted as per remaining FSI (i.e. after deducting the utilised FSI of the approved existing building from the maximum permissible FSI of the entire building-unit) with compliance to respective margins, permissible height, uses and all other applicable regulations.

**12.14 Row Type Buildings**

1. The minimum area of plot on which row houses are to be constructed shall be 1000 sq.mts.
2. The minimum length of common wall between the two adjacent row houses shall be 50% of the depth of the row house.
3. The minimum size of an individual sub-plot of a row house shall be 40 sq.mt. Maximum permissible built up area shall not exceed 60% of an individual sub plot and the minimum width of the plot shall not be less than 4.0 mts.
4. Minimum margin in the front shall be 1.8 mts. and rear margin shall be 1.2 mts. The end plot in a row house shall also have minimum side margin of 2.0 mts. on the side abutting on road.
5. 5.0 mt. wide space open to sky shall be provided at the end of every such 10 continuous houses of row houses.
6. Such row houses shall be ground + two floors structures with a maximum height of 10.0 mts. In case of hollow plinth provided at ground floor for parking the height shall be considered from the top of hollow plinth. A stair cabin, cover for internal courtyard, water tank will be allowed to project beyond this.
7. Requirement for common plot shall be regulated as per the provision of 12.9 irrespective of number of row houses to be developed.
8. There is should be a common outlet for the sewerage from soak pit which can be connected when Sewerage line is implemented. The depth of soak pit shall be minimum 80'-0".
9. All bathrooms and toilets shall have direct ventilation.
10. The width of internal approaches/road for such development shall be regulated as under:
  - The roads and layouts shall be minimum 7.5 mts. Wide.

Sr. No.	Length of Road	Width of Road
1.	Up to 150 mts.	7.5 mts.
2.	More than 150 mts and up to 300 mts	9.0 mts.
3.	More than 300 mts and up to 450 mts	10.5 mts.
4.	More than 450 mts	12.0 mts.

- While determining the width of the road, the length of the road up to the intersection of the road shall only be taken into consideration and the length of the road beyond the intersection shall not be clubbed.
- All internal roads shall have curvatures as per Regulation No. 12.3.2.

**13 AGRICULTURAL ZONES****13.1 For General Agriculture Zone****13.1.1 Minimum Area of a Building-unit**

1. Minimum Area of any block no./ survey no. / Hissa no. / FP no. Only one farm house shall be -4000 sq. mts
2. No sub-division of land shall be permitted.

**13.1.2 Margins**

1. Road-side Margin shall be minimum 30mts from the boundary of Building-unit.
2. Side and Rear Margins shall be applicable as per Planning Regulation No. 12.6.
3. Minimum distance from any water body shall be maintained as specified in Performance Regulation No. 23.1.

**13.1.3 Margins**

Common Plot is not required for Building-units in Agriculture Zone.

**13.1.4 Permissible Uses, FSI, Ground Coverage and Maximum Permissible Height**

No.	Permissible Use	FSI	Ground Coverage	Maximum Permissible Building Height	Remarks
1	Detached Dwelling Unit	0.1	5%	8 mts	1. Only one farm house per building unit shall be permitted. 2. Minimum area of any block no./survey no./Hissa no./FP no. shall be 4000 sq. mts.
2	Agriculture, Sports & Leisure, Parks, Assembly-4	0.1	5%	15mts	Minimum area of any block no./survey no./Hissa no./FP no. shall be 5000 sq. mts. provided that in case of Assembly-4 the minimum area shall be 10000 sq. mts.
3	Religious, Agriculture, Agro Industries, Storage, Public Utility,	0.45	40% <u>15%</u>	15mts	Minimum area of any block no./survey no./Hissa no./FP no. shall be 5000 sq. mts. Except Public Utility & Institutional

**14 SPECIAL BUILDINGS**

In addition to the requirements specified under other Planning Regulations, the following Regulations shall also be applicable for the buildings classified as Special Buildings.

**14.1 Special Buildings**

The following Buildings are classified as Special Buildings:

Cinema Hall, Theatre, Assembly Hall Or Auditorium, Town Hall, Lecture Hall, Exhibition Hall, Museum, Stadium, Convention centre, Club, Golf course, Multiplex, Shopping Mall.

**14.1.1 Location**

**14.1.2 Margins**

1. Minimum margins shall be as per table below:

No.	Minimum Road Side Margin (meters)	Minimum Side & Rear Margin (meters)
1.	12.0	6.0

- The Road side margin may be permitted to be covered up to 6mts. from the building line with a projected cantilever structure (porch) at a height of not less than 3.00mts from the ground level. This cantilever structure shall not be counted towards computation of FSI.
- Parking shall be permitted in road-side margin after leaving minimum 6.0mts from the Building unit boundary. This minimum 6.0m shall be utilised for shade giving trees and plantation purpose.

**15 FUELLING STATIONS**

Building-units for use as Fuelling Stations shall comply with Petroleum Rules 1976 under the Petroleum Act 1934.

**15.1 Area and Frontage**

The minimum area and frontage of a Building-unit for a Fuelling Station or Fuelling with Service Station shall be as follows:

No.	Fuelling Station Type	Minimum Area of Building-unit	Minimum Frontage on Road Side
1	Fuelling Station (without Service Station)	1000 sq.mts	30mts
2	Fuelling with Service Station	2000sq.mts	30mts

**15.2 Location**

1. Fuelling Station shall be permitted only on Roadwidth of 18mts and more in any Zone.
2. The location of Fuelling Station or Fuelling with Service Station shall be at a distance of 50mt, away from the junction of two or more roads. The minimum distance shall be computed from the boundary line of the Building-unit to the edge of the road as indicated in the illustration.
3. In the case the Station is provided along a main road which has a service road or a marginal access road, the access to the Station should be provided from the service road or the marginal access road and not from the main road.

**15.3 Maximum Permissible Ground Coverage**

Maximum Permissible Ground Coverage for Fuelling Station and Fuelling with Service Stations shall be 45% of the Building-unit including the area of the canopy.

**15.4 Margins****15.4.1 For Fuelling Station:**

1. Road side margin from canopy to the plot boundary shall be as per Planning Regulation No. 12.6.1 subject to minimum 6.0mts. On all other sides, margin from canopy to the plot boundary shall be 4.5mts and 6.0mts in the case of canopy having height up to 6.0mts and more than 6.0mts from ground level respectively.
2. Marginal distance from curb site (Fuelling Pedestal) to the plot boundary towards main road shall be minimum 9.0mts and for other sides of the plot, it shall be 6.0mts.
3. Administrative building for the petrol pump shall have minimum road side margin as per planning Regulation No.12.6.1; minimum side and rear margin of 3.0mts and as per Planning Regulation No. 12.6.7. Zero margins can be provided towards canopy but minimum 6.0mts clear drive way shall be provided to any curb site.
4. Minimum 6.0mts clear drive way shall be maintained between every curb site (fuelling pedestal).
5. Minimum width of access road shall be 6.0mts.

**15.4.2 For Fuelling Station with Service Station:**

1. Road side margin from canopy to the plot boundary shall be as per Planning Regulation No. 12.6.1 subject to minimum 6.0mts and all other sides shall be 6.0mts. Provision of above (2) and (4) in Planning Regulation No. 15.4.1 will remain the same.
2. While building of service station can have zero margins towards canopy, subject to minimum 6.0mts towards road side and 3.0mts towards other sides of the plot.
3. Clear 6.0mts drive way between curb site (Fuelling pedestal) and service station building shall be provided.
4. Minimum width of access road shall be 6.0mts.

**15.5 Height**

The maximum allowable height shall be 7.5mts.

**15.6 Floor Space Index**

Subject to other Regulations.

**15.7 Common Plot**

Common Plot shall not be required.

**15.8 Parking**

Every Fuelling Station and Fuelling with Service Station should provide minimum parking spaces on the basis of the Building unit Area as stated in the table below:

No	Fuelling station (area)	Minimum parking
1	Fuelling station up to 1000 sq. mts	3 cars and 5 two-wheelers
2	Fuelling station more than 1000 sq.mts	For every 500 sq.mts more than 1000sq.mts, additional parking for 1car and 2 two-wheelers shall be required.

**15.9 19.9 Basement**

No basement shall be allowed.

**16 ADVERTISING DISPLAY & COMMUNICATION INFRASTRUCTURE**

1. The height of a boundary wall towards the road-side shall not exceed 1.5mts from the crown of the adjacent road and 1.8mts from the crown of the adjacent road for all other sides of the building-unit.
2. For building-units at junction of roads, a grill fence shall be provided with the following provisions:
  - a. At least 50% perforation in the grill.
  - b. The base of the fence shall not exceed 0.8mts from the level of the crown of the adjacent road for a length of 9mts. from the corner of the building-unit at the junction.

**For Industrial Buildings:** The height of a boundary wall on all sides shall not exceed 3mts from the crown of the adjacent road.

**19.1.2 Boundary Gate/ Compound Gate**

1. Boundary gate shall not open outward and shall be provided with a means to prevent the gate from opening outward on the pavement or road.
2. The minimum width of a boundary gate for all uses except Residential shall be 6mts.
3. For building-units at junction of roads, the following shall be applicable:
  - a. A gate shall not be permitted on the curvature of the boundary wall.
  - b. If the adjacent road width is equal or more than 12mts, the opening in the boundary wall shall be located at a minimum distance of 15mts. from the corner of the building-unit at the junction. If the length of the road side edge is less than 15mts, the opening in the boundary wall shall be provided at the farthest end from the junction.

**19.1.3 Level of Building-unit**

The level of the Building shall be established with respect to the average ground level or High flood level, as may be applicable. This level shall in no cases be lower than the crown level of the adjacent road. For Building-units with access from two or more roads, the level shall be considered from the wider road.

In the case of a building-unit where the level of the land is lower than the crown of the road in front and which in the opinion of the Competent Authority, could be drained off in the storm water drainage and sewer, the Competent Authority may permit a suitable lower level.

Any difference between the building-unit level and road level shall be accommodated within the building-unit boundary.

#### 19.1.4 Paving in Building-unit

Maximum of 50% of the total open space including marginal open spaces and common plot of a building-unit shall be paved. The remaining shall be permeable for rain water percolation.

#### 19.1.5 Access Path

1. Access path from the building-unit entry to the building entry or plinth shall have a minimum width of 1.8mts with an even surface and devoid of steps.
2. In case of a sloping access path, the gradient shall not be greater than 1:12.
3. Any difference between the road level and building-unit level shall be accommodated within the building-unit boundary.

#### For all Buildings:

1. Minimum one entrance shall be provided that is accessible by people with disability and accompanied by appropriate signages as per Regulation No. 19.7.
2. Minimum width of this ramped access path shall be 1.2 mts, 1.5mts and 1.8mts for the ramp length of 3.6mts, up to 9mts and more than 9mts respectively. The pedestrian ramp leading main entrance required as per these regulations may be provided in the margin. In case of sloping access path or ramp:
  - a. The gradient shall not be greater than 1:12.
  - b. Minimum width of ramp shall be building-unit boundary. 1.2mts and the maximum continuous length shall be 9mts. Such ramp shall have 800mm high hand rail on both sides extending 300mm beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50mm.
  - c. Entrance landing shall be providing adjacent to ramp with the minimum dimension 1.2mts x 1.5mts.
  - d. The surface material shall adequately guide visually impaired by using colour and brightness that is different from the surrounding floor material or by using 'guiding floor material' that emits different sounds.
  - e. Finishes shall have a non-slip surface with a texture traversable by a wheel chair.
  - f. Curbs, wherever provided, should blend to a common level.
5. For any additional stepped approach:

## General Development Control Regulations

- a. Minimum width shall be 1.35mts.
- b. Size of tread shall not be less than 300mm. and maximum riser shall be 150mm.
- c. The steps shall not have abrupt (square) nosing.
- d. Maximum number of risers on a continuous flight without landing shall be limited to 12.
- e. The stepped approach shall be provided with 800mm high hand rail on both sides. Hand rails shall extend 300mm on the top and bottom flight of the steps.
- f. All steps edges shall have a contrasting colour band of 50mm width stretched entirely across the step width. The edges should also be non-slippery.

## 19.1.6 Plinth

1. The plinth of the habitable area of any building shall be at a minimum height of 0.45mts from the established level of the building-unit.
2. The building may be permitted on hollow plinth at the ground level with the following provisions:
  - a. Has maximum height of 3.5mts from finished ground level to finished floor level and minimum height shall be 3.0mts from finished ground level to finished floor level and is free of enclosures except for staircase and other permitted uses under this Regulation.

## 19.1.7 Entrance

For all buildings other than Residential, entrance with the following specifications shall be provided:

1. Minimum clear opening of the entrance door shall be 900mm and shall not be provided with a step that obstructs the passage of a wheelchair user.
2. Level difference at threshold shall not exceed 12mm.
3. Manual doors should incorporate kick plates 300mm high to withstand impact of wheelchair footrest where doors are glazed.
4. Door handle and locks should be positioned between 900-1000mm above floor and must enable the user to operate it with a single hand.

## 19.1.8 Minimum Clearance Height in Buildings

1. For Dwelling Units or Mercantile Buildings:
  - a. All habitable spaces shall have minimum height of 2.9mts between finished floor levels. Height of room
  - b. All circulation and service spaces such as verandah, bathroom, washroom, toilet, passage, puja room, storeroom and stair cabin shall have a minimum clearance height of 2.1mts.
2. For Industrial Uses, all occupiable spaces shall have a minimum clearance height of 3.0mts.

## General Development Control Regulations

3. In case of folded roof, minimum clearance height shall be 3.0mts (measured from the lowest point of the fold).
4. In case of sloping roof, minimum clearance height shall be 2.2mts (measured from the lowest point of the roof). The average height of the room shall not be less than the minimum clearance height as applicable according to the building use and stipulated above.
5. In case of trussed roof, minimum clearance height shall be measured from the floor level to the bottom of the tie beam and shall be 2.8mts.
6. For Hollow Plinth: Spaces of hollow plinth for the purpose of parking with maximum height of 3.5mts from finished ground level to finished first floor level and minimum height shall be 3.0mts from finished ground level to finished first floor level.
7. For Basement: Basement exclusively used for parking shall have minimum height of 2.8mts, and maximum height of 3.8mts, measured from finished basement floor level to finished upper floor level. In case of mechanical parking more height may be permitted.

**19.1.9 Mezzanine**

Mezzanine floor shall have a minimum clear height of 2.1mts which may be allowed in a room at a minimum clear height of 2.1mts from the floor level if the area does not exceed 30% of the area of the enclosed space.

**19.1.10 Loft**

Loft of a maximum height of 1.2mts may be allowed in a room at a minimum clear height of 2.1mts from the floor level if the area does not exceed 30% of the area of the enclosed space.

**19.1.11 Basement**

1. Basement is allowed within a building-unit as per specifications in Section C: Planning Regulations. The usage of basement to conform to Section C: Planning Regulation No. 12.11.4.
2. The area available after providing the required margins may be utilized for basement.
3. It may be provided at more levels as per Section C: Planning Regulation No. 12.11.2.
4. Basement in a building shall have a minimum clear height of 2.8mts.
5. If basement is used for parking, vehicular ramps shall be provided as specified in Performance Regulation No. 19.1.15.
6. In cases where the permitted margin of the basement is lesser than the permitted margin of the super structure, no level difference shall be permitted in the marginal space of the building. Such marginal space shall be open to sky and motorable as per Regulation No. 20.3.
7. During construction of basement, necessary shoring and strutting including sheet piling shall be required.
8. Provision for drainage or water supply shall not be permitted in the basement.
9. Material used for construction of basement shall be fire resistant. Wood or any other combustible material shall not be used as structural members of a basement.
10. Access to the basement to be provided as per Performance Regulation No. 19.1.14 and 19.1.15

## General Development Control Regulations

## 19.1.12 Railings

1. A parapet/railing with a minimum height of 1.15mts from the finished floor level shall be provided to ensure safety at all accessible edges of a building such as roof edges, staircase, terrace, balcony, floor edges or any large openings and/ or fully glazed window.
2. Railing for staircase shall be as per Performance Regulation No. 20.6.1(8)
3. The maximum dimension of the railing/parapet perforations shall not exceed 0.15mts.
4. In buildings meant for predominant use by children, it will be necessary to suitably alter the height of the hand-rail and other fittings & fixtures.
5. Hand-rail for any level difference shall be provided with a pipe of minimum diameter of 40mm and as illustrated across.

## 19.1.13 Terrace

Terrace of a building shall be accessible by a common staircase and be free from partitions.

## 19.1.14 Staircases

Staircase in a building and its specifications shall be determined as mentioned in the table below. The minimum width of the flight shall be exclusive of parapet and floor-mounted railing.

## General Development Control Regulations

	Use	Height of Building (mts)	Staircase		
			Min. Flight Width (mts)	Min. Tread (mm)	Max. Riser (mm)
1.	Residential Dwelling-1 and Dwelling-2	Three Floors Up to 12m	1.0	250	200
2.	Residential Dwelling-1 and Dwelling-2	Up to 15m	1.2	250	180
2a.	Residential Dwelling-1 and Dwelling-2	More than 15 up to 25m	1.5	250	180
2b.	Residential Dwelling-1 and Dwelling-2	More than 25m	2.0	300	160
3a.	Educational-I&2	Up to 25m	1.5	300	160
3b.	Educational-I&2	More than 25m	2.0	300	160
4a.	Institute, Religious, Public-Institutional	Up to 25m	1.5	300	160
4b.	Institute, Religious, Public-Institutional	More than 25m	2.0	300	160
5a.	Mercantile	Up to 25m	1.5	300	160
5b.	Mercantile	More than 25m	2.0	300	160
6.	Assembly	For all heights	2.0	300	160
7a.	Hospitality	Up to 15m	1.5	300	160
7b.	Hospitality	More than 15m	2.0	300	160
8	Industrial	For all heights	1.5	300	160

**Note:** It shall be permitted to provide two staircases of width 1.5mts as an alternative of one staircase of 2.0mts, two staircases of width 1.2mts as an alternative of one staircase of 1.5mts within the travel distance as specified in table 19.1.14.1.c below.

#### 1. Staircase for Basement:

- The staircase to the basement shall have the same width as the regular staircase leading to upper floors.
- Any staircase leading to the basement shall be as per Performance Regulation No. 20.6.
- A staircase shall be provided from the lowest level of the basement as a means of access or exit at a travel distance mentioned in the table below:

	Building Use	Travel Distance
1.	Residential Dwelling-1 and Dwelling-2 Use	30
2.	Non residential dwelling Use	25
3.	Hazardous Use	20

- 2. Staircase for all Buildings other than detached and semi-detached dwelling units:**  
Separate staircase shall be provided if the ground floor or any other floor in a residential building is used for non-residential purpose.
- For all buildings, staircase shall be compliant with Performance Regulation No. 20.6.

#### 19.1.15 Ramp

- Ramp for Vehicular Access

## General Development Control Regulations

- a. Minimum width and radius for a ramp for two-wheelers, cars and trucks, respectively are specified in the table below:

Vehicle	Minimum width of ramp (meters)	Minimum radius of inner curve (meters)
Two-wheeler	2.0	2.0
Car	3.0	3.0
Truck	6.0	4.0

- b. The maximum slope of ramp shall be 1:7.  
 c. A level platform of width equal to ramp width and length of minimum 4.5mts. shall be provided at end of the ramp at ground level and basement level.  
 d. A minimum clear height of 2.6mts shall be maintained at all points on the ramp.  
 e. For parking in basement/s, the number and width of ramp shall be provided as specified below and as per 19.1.15.1.a (as applicable):

Area of Parking in Basement	Number of Ramps	Width of Ramp
≤ 750 sq.mts	1	3.0 mts
>750 sq.mts	1	6.0mts
	2	3.25mts each

2. Ramp for Pedestrians: For Buildings exceeding 4mts height with following uses: Institutional, Assembly, Public Institutional, Educational-2, Mercantile; a pedestrian ramp shall be provided unless provision for a lift is made as per Regulation No. 19.12. The ramp shall be provided with the following specifications:
- The minimum width of the ramp shall be 1.2mts, 1.5mts and 1.8mts for the ramp length of 3.6mts, up to 9mts and more than 9mts respectively.
  - A landing shall be provided of 1.5mts depth for every 9mts length of the ramp.
  - The slope of a ramp shall not exceed 1 in 12.
  - Surface of the ramp shall be slip-resistant and the edge of the ramp shall be protected with a minimum height of 100mm.
  - Handrails on the ramps shall be on both sides at two levels; at 700mm and 900mm, both ends shall be rounded, grouted and extended 300mm beyond top and bottom of ramp.
  - Entrance landing shall be provided at the starting and ending level of the ramp with the minimum length equal to 1.8mts.
  - Ramps shall lead directly to outside open spaces at ground level or courtyards or other safe places.

## 19.2 Parking

## 19.2.1 Parking to be provided

In any building, provision for parking shall be made as per requirements specified in Section C: Planning Regulations.

## General Development Control Regulations

1. Parking for people with disability shall be provided for all buildings and facilities other than Residential dwelling as per Performance Regulation No. 19.2.2(5).

## 19.2.2 Design of Parking for Cars

Parking layout for cars in all buildings shall conform to the following Specifications:

1. Minimum dimension of a space provided for parking a car shall be 2.5mts x 5.5mts.
2. Each car parking space should be connected to the street providing access to the building-unit by means of an access/exit lane.
3. Minimum width of the access/exit lane for single-sided parking shall be 3mts and for double-sided parking layout, the minimum width of the access lane shall be 5.5mts.
4. A minimum clear height of 2.6mts shall be maintained at all points in the parking space and access/exit lanes.
5. Minimum provision of one accessible car parking space shall be provided for people with disability for every 25 car parking spaces or less. This accessible car parking space shall:
  - a. have a minimum width of 2.5mts.
  - b. have a 1.2mts side transfer bay. This can be shared by two successive parking bays.
  - c. be located within 30mts from the main entrance of the building
  - a. have appropriate signages indicating that the space is reserved for wheel chair that are conspicuously displayed as specified in Regulation No. 19.7
  - b. have guiding floor materials or have a device to guide visually-impaired persons with audible signals or any other devices which serves the above purpose.
  - c. Minimum 50% of the parking reserved for visitors shall be provided at ground level.

## 19.2.3 Design of Parking for Two-Wheelers

Parking layout for two-wheelers in all buildings shall conform to the following specifications:

1. Minimum dimension of a space provided for parking a two-wheeler shall be 0.90mts x 2.0mts.
2. Each two-wheeler parking space should be connected to the street providing access to the building-unit by means of an access/exit lane. Minimum width of the access/exit lane shall be 2.0mts.
3. A minimum clear height of 2.6mts shall be maintained at all points in the parking space and access/exit lanes.

## 19.2.4 Design of Parking for Trucks

Parking layout for trucks in all relevant buildings shall conform to the following specifications:

1. Minimum dimension of a space provided for parking a truck shall be 4.0mts. X 8.0mts.
2. Each truck parking space should be connected to the street providing access to the building-unit by means of

an access/exit lane. Minimum width of the access/exit lane shall be 6.0mts.

### 19.3 Lighting

Adequate natural and artificial lighting as published in the National Building Code of India, Part VIII - Building Services, Section I, shall be provided in all parts of a building to the satisfaction of the Competent Authority.

### 19.4 Ventilation

#### 19.4.1 Ventilation of Rooms

1. Every habitable and usable room shall be equipped for adequate ventilation by provision of windows and/or ventilators that open directly into an open space or semi-open space such as courtyard or verandah. The size of such an open space shall be minimum one-tenth of the floor area of the room.
2. The aggregate of all openings including doors, windows and ventilators in a room shall be minimum one-seventh of the floor area of the room.
3. Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code and to the satisfaction of the Competent Authority.

#### 19.4.2 Ventilation of Basement

Every basement shall be ventilated adequately for its respective use. Vent Duct openings shall be permitted at Building-unit level in accordance with Performance Regulation No. 20.23. Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

#### 19.4.3 Ventilation of Atrium

Any atrium covered from top shall be provided with provision of light and ventilation.

#### 19.4.4 Ventilation of Bathrooms and Water Closets

1. Every bathroom and water closet shall be ventilated adequately.
2. At least one of the walls of a water closet or bathroom or sanitary block shall have an opening of minimum 0.25 sq.mts. for each unit of w.c or bathroom. Such opening shall open into an open to sky space with minimum dimension of 0.9mts X 0.9mts.
3. Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

#### 19.4.5 Ventilation of Staircase for Residential Dwelling-1 and Dwelling-2:

1. **For ventilation by windows:** Every staircase shall be ventilated adequately from an open air space with a minimum area of 1sq.mts. The aggregate area of all windows provided shall be at least 1.2sq.mts at each stair landing or floor in the enclosing wall of the staircase which abuts on such 1sq.mts open air space.
2. **For mechanical ventilation:** Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

**19.4.6 Ventilation of Industrial Buildings**

1. Every usable room shall be equipped for adequate ventilation by provision of windows, ventilators, skylights or artificial means.
2. For natural ventilation, every room in such building shall be lit and ventilated by adequate number of windows, ventilators and sky lights exclusive of doors having clear opening not less than 1/7th of the floor area abutting on open air space of width not less than 1/3rd of the height of the part of the building abutting such open space.
3. Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

**19.4.7 Ventilation of Special Buildings**

1. Every auditorium, halls and other special buildings shall be naturally lit and ventilated by doors, ventilators and windows abutting on an interior or exterior open air space which shall not be less than 1/5th of the total floor area.
2. Any deficiency shall be compensated by use of mechanical system such as exhaust fans or air-conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

**19.4.8 Change of ventilation system**

No permission shall be granted to convert an existing air-conditioned theatre to a non-air-conditioned theatre.

**19.5 Heating and Air Conditioning**

Adequate heating and air conditioning as published in the National Building Code of India, Part VIII - Building Services, Section 3- Air Conditioning, shall be provided in all parts of a building and to the satisfaction of the Competent Authority.

**19.5.1 Air-Conditioning of Special Buildings**

Auditorium or cinema halls shall be air-conditioned as per following specifications:

1. Temperature Range- 22 to 26.5 degrees Celsius (72° F to 80° F).
2. Change of Air per hour-approximately 10 times.
3. Relative Humidity- 50 to 60%
4. Fresh Air Requirement- 7.5 CFM per person.

**19.6 Water-related Requirement****19.6.1 Water Storage Tank**

Water storage tank shall be maintained to be perfectly mosquito-proof condition, by providing a properly fitting hinged cover and every tank more than 1.50 mts. in height shall be provided with a permanently fixed non-ferrous metal ladder to enable inspection by anti-malaria staff.

**19.6.2 Drinking Water Supply**

In all buildings other than residential buildings, suitable provision of drinking water shall be made for the people with a disability near the accessible toilet provided under Performance Regulation No. 19.9.2.

**19.7 Signages**

Signage directly pertaining to the use of the building may be erected on the plot.

**For all Buildings other than Residential Dwelling:**

## General Development Control Regulations

Signages pertaining to the internal building uses shall be provided. Such signage shall comply with the following:

1. The size of lettering shall not be less than 20mm to enable easy legibility.
2. Public Address System may also be provided in busy public areas.
3. The symbols or information should be in contrasting colour and properly illuminated to help people with limited vision to differentiate amongst primary colours.
4. International symbol mark for wheel chair as shown below be installed at the lift, toilet, staircase, parking areas etc., that have been provided for people with a disability.

5. For educational, Institute and government buildings- information board in Braille shall be installed on a wall near the entrance at a suitable height. It should be possible to approach them closely. To ensure safe walking, there should not be any protruding sign which creates obstruction in walking.

#### 19.8 Letter Box

In all case of building having more than two floors including ground floor a letter box for each separate unit shall be provided at ground floor level to facilitate easy mail delivery.

#### 19.9 Sanitation

Minimum sanitary accommodation shall be provided for all proposed buildings and additions and extensions to existing buildings.

##### 19.9.1 For Residential Buildings

The minimum sanitary requirement for a residential dwelling unit shall be one water closet of minimum 0.9sq.mts area.

##### 19.9.2 For All Buildings other than Residential Dwelling

1. Minimum one special water closet shall be provided for the use of persons with disability with provision of wash basin and drinking water at the ground level.
  - a. Minimum size of toilet shall be 1 mts. x 1.75 mts.
  - b. Minimum width of door shall be 900mm with outward door swing.
  - c. Suitable arrangement of vertical or horizontal hand rails with 50mm clearance from the wall shall be provided.
  - d. W.C. seat shall be 500mm from the floor.
2. Water closets shall be provided for each gender with a minimum area of 0.9 sq.mts area. The number of water closets shall be decided on the basis of the maximum number of building users of that gender at any time and as specified in the table below:

## General Development Control Regulations

Building Use	Rate for No. of Users	No. of Users	Min. No. of Urinals	Min. No. of Water Closets	Min. No. of Washbasins or Wash area
Educational	1 user per 1sq.mts per carpet area		5 or 1 per 50 male users or less, whichever is more	2 or 1 per 200 users or less per gender, whichever is more	
Business	1 user per 4sq.mts per carpet area	<20	1 may be provided	1 WC per gender each	
		21-100	1 per 25 male users or less	1 per 25 users or less per gender	
		101-500	1 per 50 male users or less	1 per 50 users or less per gender	
		>500		1 per 100 users or less per gender	
Industrial, Storage	1 user per 25sq.mts of carpet area	1-100	1 per 100 male users or less	1 per 25 users or less per gender	4 sq.mts of wash area
		>100	1 per 50 male users or less	1 per 50 users or less per gender	4 sq.mts of wash area
Special Buildings	1 user per seat		2 per 75 users or less	1 per 100 users or less per gender	1 washbasin per 200 users or less

- Minimum 25% of such water closets and urinals shall be provided in common and accessible locations of the building.
- These sanitation facilities shall be provided with signage indicating the use and the intended users' gender as per Performance Regulation No. 19.7.

**19.9.3 For Special Buildings**

The number of water closets shall be decided on the basis of the number of seats provided. Water closets shall be provided for each gender, apportioned suitably.

**19.10 Drainage**

The manner in which it is intended to connect the drainage system of a building to a public sewer shall be subject to approval by the Competent Authority. Regulations for construction, maintenance, and control of drains, sewers, drainage and sewage works of any description within Development Area shall be as per the norms of Gujarat Pollution Control Board.

**19.10.1 Provision of Septic Tank, Seepage Pit and Soak Well**

In the case where there is no drainage facility available for the land to be developed, the owner shall provide septic tank, soak pit or soak well for disposal of sewage and waste water.

- Location and sub-soil dispersion: A sub-soil dispersion system shall not be closer than 12mts to any source of drinking water, such as a well, to mitigate the possibility of bacterial pollution of water supply. It shall also be as far removed from the nearest habitable building as is economically feasible but not closer than 2mts to avoid damage to the structure.

**2. Dimensions and Specifications:**

- a. Septic tank shall have a minimum inner width of 75cms, a minimum depth of meter below the water level and a per capital minimum liquid capacity of 85 litres. The length of the tanks shall be least twice the width.
- b. Septic tanks may be constructed of brick work, stone masonry, concrete or othersuitable material as approved by the competent authority.
- c. Under no circumstances should effluent from a septic tank or allowed into an openchannel drain or body of water without adequate treatment.
- d. The minimum normal diameter of the pipe shall be 100mm. Further at junction of pipesin manholes, the direction of flow from a branch connection should not make an angleexceeding 45 degrees with the direction of flow in the main pipe.
- e. The gradients of land-drains, under-drainage as well as the bottom of dispersiontrenches and soak wells should be between 1:300 and 1:400.
- f. Every septic tank shall be provided with a ventilating pipe of at least 50mm diameter. The top of the pipe shall be provided with a suitable cage of mosquito proof wire mesh. The ventilating pipe shall extend to a height which would cause no smell or nuisance toany building in the area. Generally, the ventilating pipe should extend to a height of about 2mts above the septic tank building when it is located closer than 15mts.
- g. When the disposal of a septic tank effluent is to a seepage pit, the seepage pit may be ofsectional dimension of 90cms and not less than 100cms in depth below the inner level of the inlet pipe. The pit may be lined with stone, brick and concrete blocks with dry openjoint which should be backed with at least 7.5cms of clean coarse aggregate. The liningabove the inlet level should be narrowed to reduce the size of the R.C.C. cover slabs. Where no lining is used, especially near trees, the entire pit should be filled with loose stones. A masonry ring should be constructed at the top of the pit to prevent damage byflooding of the pit by surface run off. The inlet pipe should be taken down to a depth of 90cms from the top an anti-mosquito measure.
- h. When the disposal of septic tank effluent is to a dispersion trench, the dispersion trench shall be 50 to 100cms wide, excavated to a slight gradient and shall be provided with a layer of shed gravel or crushed stones 15 to 25cms deep. Open, joined pipes placed inside the trench shall be made of unglazed earthenware clay or concrete and shall have a minimum internal diameter or 70 to 100mm. Each dispersion trench should not be longer than 30mts and trenches should not be placed closer than 1.8mts to each other.

The above mentioned Regulations shall be subject to modification from time to time as required by Gujarat Pollution Control Board/ Competent Authority.

**19.11 Electrical Infrastructure**

Adequate electrical infrastructure as published in the National Building Code of India, Part VIII -Building Services, Section 2- Electrical Installations, shall be provided in all buildings to the satisfaction of the Competent Authority.

**19.12 Lifts and Elevators****19.12.1 For Buildings exceeding 4mts height with following uses: Institutional, assembly, Public Institutional, Educational-2**

Minimum one lift shall be provided to access public areas on floors above ground level.

**19.12.2 For Buildings exceeding 15mts height**

1. For buildings with height more than 15mts, lifts shall be required as per the following table:

## General Development Control Regulations

No.	Building Use	Height of Building	Minimum no. of Lifts (whichever is more from column A and B)	
			A	B
1.	Dwelling	Above 15mts	Minimum 1, or	1 lift per Thirty dwelling units (excluding dwelling units on ground level and two upper floors or Hollow-plinth and two upper floors)
		Above 25mts	Minimum 2, or	
2.	Non-residential	Above 15mts	Minimum 1, or	1 lift per 1000 sq.mts. (excluding area on ground floor and two upper floors or Hollow-plinth and two upper floors)
		Above 25mts	Minimum 2, or	

1.2. For buildings with height above 25.0 mts, one of the required lift shall be a fire lift, in conformity with Fire Safety Regulations 20.0

## 19.12.3 General Requirements for Lifts and Elevators

1. Lift shall be provided from the ground level or lower level.
2. Minimum capacity of the lift shall be for six persons.
3. Lifts of 6, 8 and/or 12 person capacity can be permitted, as approved by competent authority by considering the peak hour passenger volume. Where required minimum two lifts shall be provided as applicable as per the regulations.
4. A clear door opening with minimum width of 900mm shall be provided. A clear landing area in front of the lift doors shall have minimum dimensions of 1.8mts x 1.8mts.
5. A handrail of 600mm length shall be provided at a height of 1mts from the floor of the lift car.
6. The duration of an automatic closing lift door shall be minimum 5 seconds with a maximum closing speed of 0.25 m/sec.
7. The interior of the lift cabin shall be equipped with a device that audibly indicates the floor level reached and whether the door of the cabin is open or closed.
8. Number and type of lifts to be provided in different types of buildings shall conform to standards specified in the National Building Code of India, Part VIM -Building Services, Section 5- Installation of Lifts and Escalators.

All lifts shall also meet fire prevention and safety requirements specified in Performance Regulation No. 20.8, as applicable on the basis of height of the building.

## 19.13 External Facade

On the external facade of any building, the glazed surface area of the facade shall be non-reflective and provided up to a maximum of 50% of the total surface area of each facade, with the provision of safety railing up to sill level.

On the North facade, entire surface area may be glazed. 10 degrees deviation may be permitted in consideration of the Northern facade as illustrated.

## 19.14 Display Structures

1. The size and location of permitted billboards along roads shall be permitted as prescribed in Section C: Planning Regulations No. 16.0.

---

General Development Control Regulations

---

2. Every billboard shall be designed as per the requirements for structural safety as prescribed in Regulation No. 22.8.
3. Billboards on roof tops are not permitted unless the entire roof is constructed with non-combustible materials.

**20 FIRE PREVENTION AND SAFETY****20.1 Requirement for Fire Safety Professionals in Buildings****20.1.1 Fire Protection Consultant on Record (FPCOR)**

FPCOR shall be necessary in all buildings listed in Schedule 21 and shall be responsible for a development as per Procedure Regulation No. 4.5.5. The minimum qualifications for Fire Protection Consultant shall be as listed in Schedule 7. Suitable persons shall be registered with the Chief Fire Officer.

**20.1.2 Fire Officer**

The minimum qualifications for Fire Officer shall be as listed in Schedule 24. Suitable persons shall be registered with the Chief Fire Officer.

**20.1.3 Fire Men**

The minimum qualifications for Fire Men shall be as listed in Schedule 24. Suitable persons shall be registered with the Chief Fire Officer.

**20.1.4 Applicability of Fire Safety Professionals**

The applicability of the fire safety professionals for buildings is provided in the table below on the basis of the height, use and area of the proposed building as applicable:

Requirement of Fire Safety Professionals						
No.	Building Use	Criteria	Fire Protection Consultant	Chief Fire Officer's Opinion	Fire Men	Fire Officer

### 20.3 Marginal Open Space

1. For all buildings except Residential Dwelling-1 and Dwelling-2, the marginal space adjacent to the building shall be open-to-sky and motorable with minimum load-bearing capacity as per table below:

No.	Building Height (meters)	Minimum Load Bearing Capacity (tonnage per sq.mts)
1	Less than 45mts	40
2	45mts and above	60

2. The entrance gates from the street shall not be less than 6mts in width.

### 20.4 Corridors and Passageway

1. For all buildings: The minimum clear width of corridors and passageway shall be as under:

Length of corridor (in mts.)	Width of corridor (meters)	
	Residential Dwelling-1 and Dwelling-2	Non-Residential Dwelling

Formatted Table

## General Development Control Regulations

Length of corridor (in mts.)	Width of corridor (meters)	
	Residential Dwelling-1 and Dwelling-2	Non-Residential Dwelling
Up to 6	1.0	1.2
Up to 9	1.2	1.5
Up to 15	1.2	2.0
Above 15 and up to 24	1.5	2.5
24 and above	2.0	3.0

Formatted Table

- Corridor shall be clear of any obstructions. No projection in any form shall be allowed up to a height of 2.1mts from floor level.
- In case of any level difference in a corridor, a slope shall be provided with gradient not more than 1:12. In such case, guiding floor material shall be provided.

## 20.5 Exit Requirements

## 20.5.1 General Exit Requirements for all buildings:

- An exit may be a doorway, corridor, passageway(s) to an internal staircase, or external staircase, or to a verandah or terrace(s), which have access to the street, or to roof of a building or a refuge area. An exit may also include a horizontal exit leading to an adjoining building at the same level.
- Lifts and escalators shall not normally be considered as exits.
- For all occupiable buildings, every exit, exit access or exit discharge shall be continuously maintained free of impediments for full use in the case of fire or other emergency.
- No building shall be so altered as to reduce the number, width or protection of less than that required.
- Exits shall be arranged that they may be reached without passing through another occupied unit.
- Fire doors with 2 hour fire resistance shall be provide at appropriate places along the escape route and particularly at the entrance to lift lobby and stairwell where a funnel or flue effect may be created, inducing an upward spread of fire and smoke.

**20.5.2 Doorways for Special Buildings and Buildings with height more than 25mts:**

1. Every exit doorway shall open into a staircase compartmentalised from rest of building or a horizontal exit of a corridor or passageway providing continuous and protected means of egress.
2. No exit doorway shall be less than 1000 mm in width except assembly buildings where door width shall be not less than 2000 mm. All Doorways shall be not less than 2000 mm in height.
3. Exit doorways shall open outwards, that is, away from the room, but shall not obstruct the travel along any exit. No door, when opened, shall reduce the required width of stairway or landing to less than 900 mm. overhead or sliding doors shall not be installed.
4. In the case of building where there is a central corridor, the doors of rooms shall open outward and flush to the wall to permit smooth flow of traffic in the corridor.
5. Exit door shall not open immediately upon a flight of stairs. A landing equal to at least the width of the door (not less than 900mm) shall be provided in the stairway at each doorway. The level of landing shall be the same as that of floor, which it serves. Manual door should incorporate kick plate 300 mm high to withstand impact of wheelchair footrest where doors are glazed. Door handle and locks should be positioned between 900-1000 mm from floor level.
6. Exit doorways shall be open able from the side, which they serve without the use of a key. (panic bar)
7. Mirrors shall not be placed in exit doors to avoid confusion regarding the direction of exit.

**20.5.3 Horizontal Exits for Special Buildings and Buildings with height more than 25mts:**

Horizontal exit may be a doorway, a corridor, a passageway to an internal or external staircase or to an adjoining building or to a semi-open or open space.

1. The width of horizontal exit shall be same as for the exit doorways
2. A horizontal exit shall be equipped with at least one fire door of minimum two -hour fire resistance or smoke-stop door of self closing type, as illustrated in Performance Regulation No.20.5.2. Further, it should have direct connectivity to the fire escape staircase for evacuation.
3. Where there is a difference in level between connected areas for horizontal exits, ramps, not more than 1 to 10 gradient shall be provided; steps shall not be used.
4. Doors in horizontal exits shall be open-able at all times from both sides.
5. Access to ramps from any floor shall be through a smoke-stop door.

**20.6 Staircase****20.6.1 General Staircase Requirements for all Buildings:**

1. Staircase to abut an outer wall or be external part of the building with natural ventilation. All the space above the parapet wall shall be kept open for ventilation, but may be secured with grill.
2. All staircases shall be constructed of non-combustible materials throughout.

3. No winders shall be provided except in case of individual dwelling unit.
4. The treads shall be constructed and maintained to prevent slipping.
5. A staircase shall not be provided around a lift shaft unless provided with fire stop door of 1 hour rating at every floor level and no other openings in the inside wall as illustrated across.
6. No gas piping, electrical panels or AC ducts shall be allowed in the stairway. However service shafts/ ducts Lobby may be permitted. Electrical Shafts/ ducts shall have not less than 2hour fire resistance. For other service shafts/ ducts, the fire resistance shall be not less than 1hour.
7. All steps, edges must have a contrasting colour band of 50mm width stretched entirely across the step width for uses other than residential Dwelling-1 and Dwelling-2 use.
8. Railing: Continuous handrails shall be provided on both sides including the wall (if any) at two levels: upper at 850mm-900mm and lower at 700mm to be measured from the base of the middle of the treads to the top of handrails. Floor-mounted railing or parapet shall be provided in such a way that the minimum required width of staircase does not reduce. The maximum gap between balusters shall be 150 mm.
9. Soffit (underside/open area under the stairs) of the stairs and ramps should be enclosed or protected with rails or raised curbs or marked with a tactile surface.
10. Headroom: The minimum headroom in a passage under the landing of a staircase and the staircase shall be 2.1mts from finished floor level.
11. No living space, store or other fire risk shall open directly into the staircase.
12. External exit door of staircase enclosure at ground level shall open directly to the open spaces.
13. The main and external staircases shall be continuous from ground floor to the terrace level.
14. Lifts shall not open in staircase.
15. Beams/ columns and other building features shall not reduce the head room/width of the staircase.
16. Individual floors shall be prominently indicated on the wall facing the staircases.

#### 20.6.2 Additional Staircase:

An additional staircase shall be required based on travel distance from the farthest point to the staircase on any floor. The provision of an additional staircase shall be subject to the requirements of travel distance being complied with as specified below:

No.	Building Use	Travel Distance (meters)
1	Residential Dwelling-1 and Dwelling-2 Use	30
2	Uses other than Residential Dwelling & Industrial	25
3	Industrial / High Hazard Use	20

**20.6.3 Staircase for Buildings with height more than 25mts and up to 45mts:**

1. Staircase shall be provided within a stairwell with a fire safe doorway of fire rating of 2 hours on each floor.
2. A common staircase connecting all floors above ground level shall not continue to the basement. A separate staircase shall be required for access to the basement. Common staircase may continue to the basement, if such a staircase opens into an enclosure at basement level with a fire rating of 2 hours with fire safe doorway.

**20.6.4 Staircase for Buildings with height more than 45mts:**

1. The width of the staircase shall not be less than 2 meters.
2. If the staircase is in the centre of the building and is not naturally ventilated, then a fire escape staircase has to be installed on either sides of the building as per Regulation No. 20.6.5, with travel distance as per respective building use and specified in Regulation No. 20.6.2. For such staircase with inadequate natural ventilation, any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.
3. For Buildings with height more than 45mts all staircases shall terminate at the ground floor level and the access to the basement shall be by a separate staircase.
4. Staircase shall be provided within a stairwell with a fire safe doorway of fire rating of 2 hours at every floor level.

**20.6.5 Fire Escape Staircase:**

External Fire Escape Staircase shall be provided for special buildings and buildings with height more than 45mts where the main staircase is located in the centre of the building and is without natural ventilation. Such fire escape staircase is to be installed on either sides of the building with travel distance as per respective building use and specified in Regulation No. 20.6.2. Such Fire Escape Staircases shall comply with the following:

1. Fire Escape Staircase to abut an outer wall or be external part of the building with natural ventilation.
2. External stairs shall have straight flight not less than 1250mm wide with 250mm treads and risers not more than 190mm. The number of risers shall be limited to 15 per flight.
3. No external staircase, used as a fire escape, shall be inclined at an angle greater than 45° from the horizontal.
4. The external staircase shall be constructed of non-combustible materials, and any doorway leading to it shall have the required fire resistance.
5. The route to the external stairs shall be free of obstructions at all time.
6. All external stairs shall be directly connected to the ground.
7. Handrails shall be of height not less than 700mm and not exceeding 850mm-900mm. There shall be provisions of balusters with maximum gap of 150mm.

**20.7 Ramp**

Access to ramps from any floor shall be through a smoke-stop door.

**20.8 Lift****20.8.1 General Requirements of lift in buildings**

1. Walls of lift shaft enclosures shall have a fire rating of 2 hours; lift shafts shall have a vent at the top of area not less than  $0.5\text{mts} \times 0.5\text{mts}$ .
2. Lift motor room shall be located preferably at the top of the shaft and separated from the shaft by the floor of that room.
3. Landing doors in lift enclosures shall have fire resistance of not less than 1 hour.
4. The number of lifts in one row for a lift bank shall not exceed 4 and the total number of lifts in the bank (of two rows) shall not exceed 8. A wall of 2 hour fire rating shall separate individual shafts in a bank. Minimum distance of 10mts shall be provided between two adjacent lift banks.
5. Lift car door shall have a fire resistance rating of half an hour. Lift car shall be ventilated from top.
6. Collapsible gates shall not be permitted for lifts. They shall have solid doors with fire resistance of at least 1 h.
7. If the lift shaft and lobby is in the core of the building, a positive pressure between 25 and 30 Pa shall be maintained in the lobby and a positive pressure of 50 Pa shall be maintained in the shaft. The mechanism for pressurization shall act automatically with the fire alarm; it shall be possible to operate this mechanically also.
8. Exit from the lift lobby, if located in the core of the building, shall be through a self-closing smoke stop door of half an hour fire resistance.
9. Grounding switch, at ground floor level, shall be provided on all the lifts to enable the fire service to ground the lifts.
10. Suitable arrangements such as providing slope in the floor of lift lobby shall be made to prevent water used during fire fighting etc, from entering the lift shafts.
11. A sign shall be posted and maintained on every floor at or near the lift indicating that in case of fire, occupants shall use the stairs unless instructed otherwise. The sign shall also contain a plan for each floor showing the locations of the stairways.
12. Alternate source of power supply shall be provided for all the lifts through a manually operated changeover switch.
13. All lift shall be provided with ceiling hatch for rescue purpose.

**20.8.2 Lift for Buildings with height more than 25mts:**

A lift connecting all floors above ground level shall not continue to the basement. A separate lift shall be required for access to the basement. If, however, common lifts are in connecting with basement, the lift lobby of the basements shall be pressurized, with self-closing door.

**20.8.3 Fire Lift**

Fire Lift is required in the case of emergency for the exclusive use firemen to enable fire personnel to reach the upper floors with the minimum delay.

1. For Buildings with height more than 25mts- one of the total required number of lifts as per Performance Regulation No. 19.12 shall be a dedicated Fire Lift.

## General Development Control Regulations

2. For Buildings with height more than 45mts-
  - i. all the required number of lifts as per Performance Regulation No.19.12 shall be Fire Lifts with provision to ground in case of electrical failure and shall be installed with a panic button and a talk-back system.
  - ii. The lift shall not be installed in the centre of the building and the lift shaft shall be ventilated from the top with smoke extractors. Unless, additionally, at least one fire lift shall be provided at the external edge of the building to be accessible externally by the fire-fighting staff.
3. One fire lift per 1000 sqmts of floor area shall be provided and shall be available for the exclusive use of the firemen in an emergency.
4. In case of buildings with only two lifts, the second lift may be designated as a fire lift.
5. Fire lift shall terminate at the ground level.
6. It shall have loading capacity of not less than 545 KG (8 persons lift) with automatic closing doors of minimum 0.9m width.
7. The electric supply shall be on a separate service from electric supply mains in a building and the cables run in a route safe from fire, that is, within the lift shaft. Lights and fans in the elevators having wooden panelling or sheet steel construction shall be operated on 24 volt supply.
8. Fire lift should be provided with a ceiling hatch for use in case of emergency.
9. In case of failure of normal electric supply, it shall automatically change over to alternate supply. For apartment houses, this changeover of supply could be done through manually operated changeover switch. Alternatively, the lift shall be so wired that in case of power failure, it comes down at the ground level and comes to stand-still with door open.
10. The operation of fire lift should be by a simple toggle or two-button switch situated in glass-fronted box adjacent to the lift at the entrance level. When the switch is on, landing call points will become inoperative and the lift will be on car control only or on a priority control device. When the switch is off, the lift can be used by the occupants in normal times.
11. The words 'Fire Lift' shall be conspicuously displayed in fluorescent paint on the lift landing door at each floor level.
12. The speed of the fire lift shall be such that it can reach the top floor from ground level within one minute.
13. Telephone or other communication facilities shall be provided in lift cars. Communication system for lifts shall be connected to fire control room for the building.

**20.9 Escape Lighting and Signages****20.9.1 Emergency Escape Lighting for Buildings with height more than 25mts and Special Buildings**

1. The emergency escape lighting shall be provided to be put on within one second of the failure of the normal lighting supply and shall be of independent of main supply.
2. Such Lighting shall be on separate circuits and be independently connected so that these can be operated by one switch installation on the ground floor easily accessible to fire fighting staff as any time irrespective of the position of the individual control of the light points, if any. It should be a miniature circuit breaker type of switch to avoid replacement of fuse in case of any crisis.
3. Escape lighting luminaries should be sited to cover the following locations:
  - a. At each exit door,
  - b. Near each staircase,
  - c. Near any other change of floor level,
  - d. Outside each final exit and close to it,
  - e. Near each fire alarm call point,
  - f. Near firefighting equipment and,

## General Development Control Regulations

- g. To illuminate exit and safety signs as required by the enforcing authority.  
For the purpose of this clause 'near' is normally considered to be within 2mts measured horizontally.
4. Suitable arrangement shall be made by installing double throw switches to ensure that the lighting installed in the staircase and corridors does not get connected. Double throw switch shall be installed in the service room for terminating the stand-by supply.
5. Staircase and corridor lighting shall also be connected to an alternative source of supply which may be provided by battery that is continuously trickle charged from the electric mains.
6. Emergency lighting systems shall be designed to ensure that a fault or failure in any one luminaries does not further reduce the effectiveness of the system.
7. The luminaries shall be mounted as low as possible, but at least 2m above the floor level.
8. Sign are required at all exits, emergency exits and escape routes, which should comply with the graphic requirements of the relevant Indian standards.
9. Emergency lighting luminaries and their fitting shall be fire resistance type.
10. It is essential that the wiring and installation of the emergency lighting systems are of high quality so as to ensure their perfect serviceability at all times.
11. The emergency lighting system shall be capable of continuous operation for a minimum duration of 1 hour and 30 minutes even for smallest premises.
12. Illumination of exit: The floors of area covered for the means of exit shall be illuminated to values not less than 1 ft candle (10 lux) at floor level. In auditoriums, theatres, concert halls and such other places of assembly, the illumination of floor exit/ access may be reduced during period of performances to value not less than 1/5 ft candle (2 lux).
13. The emergency lighting system shall be well maintained by periodical inspections and tests so as to ensure their perfect serviceability at all times.

#### 20.9.2 Fire Exit Signages for Mercantile Buildings, Special Buildings and Buildings with height more than 25mts:

1. All exits, corridors and staircase shall have auto glow signs for people to escape in case of fires in darkness. Even the floors shall have guide marks guiding towards the staircase. The colour of the exit signs shall be green.
2. The exit sign with arrow indicating the way to the escape route shall be provided at a height of 1.8 m from the floor level on the wall and shall be illuminated by electric light connected to corridor circuits.
3. All exit way marking signs should be flush with the wall and so designed that no mechanical damage shall occur to them due to moving of furniture or other heavy equipments.
4. Further, all landings of floor shall have floor indicating the number of floor as per regulations. The floor indication board shall be placed on the wall immediately facing the flight of stairs and nearest to the landing. It shall be of size not less than 0.5mts x 0.5mts.

#### 20.10 Fire Alarm System

Fire Alarm System with smoke detection alarm system shall be provided for all non-residential dwellingbuilding having height more than 25mts.

#### 20.11 Smoke and Fire Venting

The provisions for smoke and fire venting for industrial buildings with large floor areas shall conform to regulations given in annex D, Part4-NBC second revision.

The provisions for smoke and fire venting shall be provided for special buildings and for hotel and hospital building more than 25mts height.

**20.12 Electrical Services for all buildings**

These shall conform to those given in C-1.12 Part 4 NBC Second revision and the IS: 1646-1999 and particular attention is drawn to the following:

1. The electric distribution cable/wiring shall be laid in a separate duct. The duct shall be sealed at every floor with non-combustible materials having the same fire resistance as that of the duct. Low and medium voltage wiring running in shaft and in false ceiling shall run in separate conduits.
2. Separate circuits for firefighting pumps, lifts, staircases, corridor lighting and blowers for pressurizing system shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes, so that fire in one circuit will not affect the others. Such circuits shall be protected at origin by an automatic circuit breaker with its no-volt coil removed. Master switches controlling essential service circuits shall be clearly labeled.
3. An independent and well-ventilated electrical service room shall be provided on the ground level or first basement with direct access from outside or from the corridor for the purpose of termination of electric supply from the licensee's service and alternative supply cables. The doors provided for the service room shall have fire resistance of not less than 2 hours.
4. If service room is located at the first basement, it should have automatic fire extinguishing system.
5. Suitable circuit breakers shall be provided at the appropriate points.
6. Electric supply for fire pump/fire lift should be provided separately and not get switched off along with the main supply of building.

**20.13 Electrical Sub-station for all buildings**

1. The sub-station shall have separate fire resisting walls/surroundings and shall necessarily be located at the periphery of the floor having separate access preferably from fire escape staircase. The outside walls, ceiling and floor including doors and windows to the substation area shall be of 2h fire rating.
2. A sub-station or a switch-station with oil-filled equipment must not be located in the building.
3. The Sub-Station area needs to be maintained at negative air pressure and area in substation shall not be used as storage/dump areas.
4. No transformer shall be allowed inside the building. When housed inside the building, the transformer shall be of premises by walls/doors/cut outs having fire resistance rating of 4h.

**20.14 Emergency Power Supply for Buildings with height more than 25mts and Special Buildings**

For every building having height more than 45mts, a stand-by electric generator shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, the stand-by fire pump, pressurization fans and blowers, smoke extraction and damper systems in case of failure of normal electric supply.

The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously. If the stand-by pump is driven by diesel engine, the generator supply need not be connected to the main electrical pump. Where parallel HT/LT supply from a separate sub-station is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with Authority.

**20.15 Electric Supply and Installation for Buildings with height more than 25mts and Special Buildings**

1. Electric supply to the High pressure Fire pump, Fire Lift and Sprinkler pump shall be supplied parallel to the building supply and should not get cut-off if the supply to the building is switched off.
2. All the electric wiring used shall be of 900 volt grading and connected to each enclosure through a MCB for a particular load.

3. Electric cable/wires used shall be of 700 volt grading with Mechanical circuit breaker and earth Leak Circuit Breaker (MCB and ELCB).

#### **20.16 Lightning Arrester for Buildings with height more than 25mts**

The lightning protection for buildings shall be provided as given in Part 8-Building Services section 2 Electrical Installation NBC. Lightning arrester shall be installed and properly earthed.

#### **20.17 Service Ducts / Shafts for Buildings with height more than 25mts and Special Buildings**

1. The Electrical ducts shall have not less than 2h fire resistance and for other services ducts, the fire resistance shall be not less than 1h. All such ducts shall be properly sealed and fire stopped at all floor levels.
2. A vent opening at the top of the service shaft shall be provided having between one-fourth and one-half of the area of the shaft.
3. Refuse chutes shall have opening at least 1m above roof level for venting purpose and they shall have an enclosure wall of non-combustible material with fire resistance of not less than 2 hours. They shall not be located within the staircase enclosure or service ducts, or air-conditioning ducts. Inspection panel and doors shall be tight fitting with 1 hour fire resistance; the chutes should be as far away as possible from exits.

#### **20.18 Ventilation for all Buildings**

1. All enclosures should have open able windows and vents to be opened in case of fire or smoke accumulation.
2. If the floor or the building is centrally air-conditioned, then a provision to stop the functioning of the air handling unit should be provided and it shall be blocked by a damper and the same air duct should act as smoke extractors with the extraction fan switching on automatically, if a fire or smoke is detected.

#### **20.19 Air-conditioning**

For Buildings providing central air-conditioning, the specifications shall be in compliance with the following:

1. Escape routes like staircases, common corridors, lift lobbies, etc, shall not be used as return air passage.
2. The ducting shall be constructed of substantial gauge metal as per IS: 655-1963-Specification for Metal Air Ducts.
3. Wherever the ducts pass through firewalls or floors, the opening around the ducts shall be sealed with materials having fire resistance rating of the compartment.
4. The materials used for insulating the duct system (inside or outside) shall be of non-combustible material. Glass wool shall not be wrapped or secured by any material of combustible nature.
5. The air-handling units and the respective air ducts may be separate for each floor and in no way inter-connected with the ducting of any other floor.
6. If the air-handling unit serves more than one floor, the conditions given below shall be complied in addition to the recommendations above.
  - a. Proper arrangements be way of automatic fire dampers, working on fusible link or smoke detector principle for isolating all ducting at every floor from the main riser, shall be made.
  - b. When the automatic fire alarm operates, the respective air-handling Units of the air-conditioning system shall automatically be switched off.
  - c. Where plenum is used for return air passage, ceiling and its fixtures shall be of non-combustible material.

**20.20 Boiler and Boiler-room**

The boiler shall be installed in a fire resisting room of 4h fire resistance rating, and this room shall be situated on the periphery of the building.

1. Foam inlets shall be provided on the external walls of the building near the ground level to enable fire services or use foam in case of fire.
2. For Industrial Buildings, the Boiler rooms shall be in a separate room or protected by bundwalls at ground floor only.

**20.21 Water Storage Tank**

1. For Building with height less than 25mts and building unit area above 750 sq. mts. - an underground water tank of at least 50,000 litres capacity shall be provided which is accessible for fire fighting vehicles, and may be shared for building use. The covering slab shall be able to withstand the total vehicular load of 45 tons equally divided as a four point load when the slab forms a part of pathway/driveway.
2. For Building with height more than 25mts & up to 40mts- an underground water tank of at least 1,00,000 (one lakh) litres capacity, exclusive for fire-fighting and accessible for fire fighting vehicles. The covering slab shall be able to withstand the total vehicular load of 45 tons equally divided as a four point load when the slab forms a part of pathway/driveway.
3. Requirement of wet riser cum down-comer installation and capacity of fire pumps etc. shall be as per Table 23 part 4 NBC, Second revision. The requirements regarding size of mains/risers shall be as given in Table 24 part 4 NBC, Second revision. The wet risers shall be designed for zonal distribution ensuring that unduly high pressures are not developed in risers and hose pipes.

**20.22 Fire Fighting System****20.22.1 Portable Fire Extinguishers**

Various types of fire extinguishers suitable for different classes of fires shall be provided in buildings. One unit of 5 kg Dry Chemical Powder (DCP), one unit of 4.5 kg of CO<sub>2</sub> shall be provided for every 1000 sq.mts. of built-up area at each floor. This shall be required for residential ~~Dwelling-1 and Dwelling-2~~ buildings with height more than 15 mts and all non-residential ~~dwelling~~ buildings.

**20.22.2 Automatic Sprinkler System**

1. For all non-residential ~~dwelling~~ buildings with height more than 15mts and up to 25mts without basement, dry riser shall be provided with fire service inlet at ground level.
2. For all non-residential ~~dwelling~~ buildings with height more than 15mts and up to 25mts with basement of area more than 200sq.mts, automatic sprinkler system shall be required for the basement.
3. For basements with area more than 200 sq.mts for buildings of all heights, automatic sprinkler system shall be required.
4. For buildings with height more than 25mts & up to 40mts with parking in basement- automatic sprinkler system is necessary.
  - a. The entire building (each floor including the basement, ground and all higher floors) shall be sprinkled.
  - b. One sprinkler head ( 57 degree Celsius for every 10 sq. meters, only A separate line for the sprinklers shall be installed and connected to the base of the terrace tank with ashut-off valve and a NRV.
  - c. The sprinkler system shall be fed from the underground tank with a separate pump and a sprinkler system installed with a gong valve (TYCO or similar type) and an Electrical flow switch for automatic operation.

- d. Farthest end at each floor shall have a drain valve for the system to be tested.
- e. The pump supplying water to the sprinkler system shall be of 1,50,000 liters capacity. Riser or downcomer for the sprinkler shall have hydrant valves and a fire service inlet to the risers.

#### 20.22.3 Internal Yard Hydrants, Hose Reels and Fire Service Inlet

1. At least two yard hydrant and one fire service inlet shall be provided. One hydrant outlet, one hose reel, one set of on/off switch for the fire pump and a set of extinguisher shall be placed inside the building for every 1000 sq.mt floor area.
2. The system shall be with a 150mm. internal dia. Riser with hydrant landing valves at each floor (Basement/ground/all higher floors). An air vent valve at the top most level. The riser shall be of 'C' class pipes and welded to fine finish and coated with anti-corrosive paint and coloured RED. All hydrant valves used shall be of SS. The hydrant pipe shall also be connected to the bottom of the terrace tank with a NRV and a stop valve.

#### 20.22.4 Ultra High-Pressure Fire Fighting System

1. The wet, ultra high pressure system shall comprise of a ultra high pressure (six plunger, 150 lpm@100 bar) pump working at not more than 1000 rpm connected to an electric motor of 1000 rpm. Only, feeding a 25mm. SS. Pipe of seamless construction and joints shall be argon welded.
2. Each floor (Basement/ ground/all higher floor) shall have a 16mm.dia.R-II hose with 40 lpm. Fog gun working at 100 bar pressure and be able to give a throw of 20 meters. There shall be a hose reel at each floor & shall be located at easily approachable place and shall be long enough to reach the extreme end of the floor.
3. The pump shall be fed by a 10,000 liters water tank containing clean drinking quality soft water. The high pressure pump along with the tank may be located at the ground / basement/terrace level there shall be appositive feed to the pump. The discharge line at the pump shall be fitted with a pressure regulator and a high pressure by-pass valve to make the system safe.
4. A quick release adaptor at the ground floor shall be installed where fire service vehicle can be connected to the high pressure system line.

#### 20.22.5 Other Automatic Fire Extinguishing System

For requirements for other fire extinguishing systems like Automatic Medium/High Velocity Water Spray or emulsifying System, Fixed Foam Installations, CO<sub>2</sub> Extinguishing Systems and systems using Halon Alternatives, reference shall be made to sections 5.1.8, 5.1.9, 5.1.10 and 5.3 of part 4 NBC second revision draft as required for special risk.

#### 20.22.6 Compartmentation for Buildings with height more than 45mts

1. The building shall be suitably compartmentation so that fire/ smoke remains confined to the area where fire incident has occurred and does not spread to the remaining part of the building.
2. All floors shall be compartmented with area not exceeding 750 sq.mts by a separation wall with 2 h fire rating. For floors with sprinklers the area may be increased by 50 percent.
3. In long buildings, the fire separation walls shall be at distances not exceeding 40mts.
4. For departmental stores, shopping centers and basements, the area may be reduced to 500sq.mts for compartmentation. Where this is not possible, the spacing of the sprinklers shall be suitably reduced.
5. When reducing the spacing of sprinklers, care should be taken to prevent spray from one sprinkler, impeding the performance of an adjacent sprinkler head.

**20.23 Basement**

These shall conform to those given in C-1.6 Part 4 NBC second revision and particular attention is drawn to the following:

1. The basement shall not open in to the staircase or lift well directly. The basements shall be provided with natural ventilations and more than one basement shall have mechanical smoke extraction installed with a capacity of one air change every 10 minutes.
2. The staircase of basements shall be of enclosed type having fire resistance of not less than 2 hours and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such position that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storeys of the building. It shall communicate with basement through a lobby provided with fire resisting self closing doors of one hour resistance as illustrated in Performance Regulation No. 20. If the travel distance exceeds the desired level, additional staircases shall be provided at proper places.
3. Mechanical Ducted Extractors for smoke venting shall be designed to permit 6 air changes per hour in case of fire or distress call. For normal operations, air changes schedule shall be as given in part 8 NBC building services, section 3.
4. Discharge apparatus of all natural draft smoke vents shall be so arranged as to be readily accessible for opening by fire service personnel.
5. Use of basement for kitchen shall not be permitted.

**20.24 Refuge Area for Buildings with height more than 25 mts**

Following provisions shall apply to refuge area in a building:

1. Refuge area shall be provided on the external walls/ periphery of the floor preferably on a cantilever projection, open to air at least on one side, protected with suitable railings and shall have direct access to fire ladder
2. Minimum area of 15sq.mts. on external wall with minimum width up to 1.2 mts at every 18mts height for floor area up to 1000 sq.mts.
3. If floor area exceeds 1000sq.mts, another Refuge Area on another end of the floor shall be provided.
4. For floors above 25mts and up to 40mts- One refuge area on the floor immediately above 25mts shall be provided
5. Residential Dwelling-1 and Dwelling-2 flats in multi-storeyed buildings with balcony, need not be provided with refuge area, however flats without balcony shall be provided with refuge area as given above.

**20.25 Materials****20.25.1 Materials for Interior of Building**

Only materials conforming to class I flame spread classification as per IS: 12777-1989 shall be used. Materials which are combustible in nature and may spread toxic fumes/gases shall not be used for interior furnishings etc.

**20.25.2 Materials for External Glazing**

Glass of facade for building shall be of 1 hour fire resistance.

**20.26 Fire Prevention and Safety Provisions during Construction**

Adequate fire prevention and safety measures as published in the National Building Code of India, Part VII - Construction Practices and Safety, shall be provided in all buildings during construction in a manner that the Fire Protection Consultant on Record deems necessary.

**20.27 Fire Safety of Existing Buildings**

1. The Owner/ developer/ occupants shall have the assessment of fire safety system of an existing building/structure damaged/undamaged carried out at stipulated periodical intervals through expert(s) chosen from a panel of experts identified by the Competent Authority. The intervals for maintenance and inspection shall be as per Schedule 17.
2. The owner/developer/occupant on advice of such expert(s) shall carry out such repair/restoration and strengthening/retrofitting of the building found necessary so as to comply with the safety standards laid down in the national building code and the Indian standards as specified.
3. In case, the owner/developer/occupant does not carry out such action, the Competent Authority or any agency authorized by the competent authority may carry out such action at the cost of owner/developer/occupant.
4. The Competent Authority may direct the owner/developer/occupant, whether the building could be occupied or not during the period of compliance.

**20.28 Classification of Buildings for Fire Prevention and Safety Provisions****20.28.1 Classification of Buildings**

The types of construction for industrial buildings according to fire resistance shall be classified in to four categories as per Table 1 given under 3.3.1 Part 4 NBC-second revision:

1. Type 1 construction- 1hr resistance
2. Type 2 construction- 2hr resistance
3. Type 3 construction- 3hr resistance
4. Type 4 construction- 4hr resistance

**20.28.2 Fire Resistance Test**

The Fire resistance test for structural elements shall be done in accordance with IS-3808:1979.

**20.28.3 Steel Framed Construction**

Load bearing steel beams and columns of buildings having total covered area of 500 m<sup>2</sup> and above shall be protected against failure/ collapse of structure in case of fire. This could be achieved by covering the exposed steel supporting members by suitable fire resistance rated materials like concrete, vermiculite(Hydrous silicate of Aluminium, Magnesium or Iron) etc as per IS-15103:2002.

**21 SPECIAL BUILDINGS PERFORMANCE REGULATIONS**

The following regulations shall be applicable for all Special Buildings in addition to the other performance regulations.

**21.1 Visibility**

Auditorium or cinema halls shall provide minimum visibility requirements as per following specifications:

1. The seat nearest to the screen shall not be nearer than the effective width of the normal picture (ratio 1:1.33). This distance shall be 3/4 in case of cinema scope and other wide angles techniques and one half in case of 70mm presentations.
2. The elevation of the balcony seats shall be such that line of sight is not inclined more than 30° to the horizontal.
3. The seats should preferably be staggered side-ways in relation to those in front, so that a spectator in any row is not looking directly over the head of the person immediately in front of him.
4. The position and height of the screen shall be regulated in such a way that the maximum angle of the line of vision from the front seat to the top of the screen shall not exceed 50.

**21.2 Mixed Occupancy**

1. Places of assembly in buildings of other occupancy, such as all rooms in hotels, restaurants in stores and assembly rooms in schools, shall be so located, separated or protected as to avoid any undue danger to the occupants of the place of assembly from a fire/smoke originating in the other occupancy. No mix development shall be permitted with the buildings having height more than 40m. OR Mercantile and residential Dwelling-1 and Dwelling-2 use shall be separated by provision of skip floor/service floor.
2. Every place of assembly, every tier of balcony, and every individual room used as a place of assembly shall have exits sufficient to provide for the total capacity therein as required such that door width for assembly building shall not be less than 2000 mm. for every 600 person
3. Every place of assembly shall have at least four separate exits as remote from each other as practicable
4. Atleast one row of seating area shall be made accessible by ramps or elevators for disabled visitors.
5. Clear aisles not less than 1.2m in width shall be formed at right angles to the line of seating in such number and manner that no seat shall be more than seven seats away from an aisle. Rows of seats opening to an aisle at one end only shall have not more than seven seats. Under the condition, where at these aisles do not directly meet the exit doors, cross- aisles shall be provided parallel to the line of seating so as provide direct access to the exit, provided that not less than one cross aisle for every 10 rows shall be required. The width of cross-aisles shall be minimum of 1 m. Steps shall not be placed in aisles to overcome differences in levels, unless gradient exceeds 1 in 10.
6. The fascia of boxes, balconies and galleries shall have substantial railings not less than 1000mm high above the floor. The railings at the end of aisles extending to the fascia shall be not less than 1000 mm high for the width of the aisle or 1100mm high at the foot of steps.
7. Cross aisles except where the backs of seats on the front of the aisle project 600mm or more above the floor of the aisle shall be provided with railings not less than 900mm high.
8. No turnstiles or other devices to restrict the movement of persons shall be installed in any place of assembly in such a manner as to interfere in any way with the required exit facilities.
9. In theatres and similar places of public assembly where persons are admitted to the building at a time when seats are not available for them are allowed to wait in lobby or similar place until seats are available, such use of lobby or similar space shall not encroach upon the required clear width of exits. Such waiting shall be restricted to areas separated from the exit ways by substantial permanent partition or fixed rigid railing not less than 105cm high. Exits shall be provided for such

## General Development Control Regulations ]

waiting spaces on the basis of 1 person for each 0.3m<sup>2</sup> of waiting space/ area. Such exits shall be in addition to exits specified for the main auditorium area and shall conform in construction and arrangement to the general rules of exits given above.

10. No display or exhibit shall be so installed or operated as to interfere in any way with access to any required exit, or with any required exit sign.  
All displays or exhibits of combustible material or construction and all booths and temporary constructions in connection therewith shall be so limited in combustibility or protected so as to avoid any undue hazard of fire which might endanger occupants before they have opportunity to use the available exits, as determined by the authority.
11. Places of assembly in buildings of other occupancy may use exits common to the place of assembly and the other occupancy, provided the assembly area and the other occupancy are considered separately, and each has exits sufficient to meet the requirements of the code.
12. Exits shall be sufficient for simultaneous occupancy of both the place of assembly and other parts of the building, unless authority determines that the simultaneous occupancy will not occur.
13. At least half the required means of exit shall lead directly outdoors or through exit ways completely separated from exits serving other parts of the building.
14. The decoration of place of assembly shall be of non-flammable materials. Fabrics and papers used for such purpose shall be treated with an effective flame retardant material. Stage settings made of combustible materials shall likewise be treated with fire retardant materials of class I flame spread.
15. Seats in places of public assembly, accommodating more than 300 persons, shall be securely fastened to the floor except as permitted in (o) below. All seats in balconies and galleries shall be securely fastened to the floor, except that in nailed-in enclosures like boxes with level floors and having not more than 14 seats, the seats need not be fastened. Tapestry of the seats shall be fire resistance.
16. Chairs not secured to the floor may be permitted in restaurants, night clubs and other occupancies where fastening of seats to the floor may not be practicable, provided that in the area used for seating, excluding dance floor, stage, etc, there shall be not more than one seat for each 1.4m<sup>2</sup> of floor area and adequate aisles to reach exits shall be maintained at all times.
17. Seats without dividing arms shall have their capacity determined by allowing 450 mm per person.
18. The spacing of rows of seats from back shall neither be less than 850 mm nor less than 700mm plus the sum of the thickness of the back and the inclination of the back. There shall be a space of not less than 350mm between the back of one seat and the front of the seat immediately behind it as measured between plumb lines.
19. Rooms containing high-pressure boilers, refrigerating machinery other than domestic refrigerator type, or other service equipments subject to possible explosion shall not be located directly under or adjacent to required exits. All such rooms shall be effectively cut off from other parts of the building and provided with adequate vents to the outer air.
20. All rooms or areas used for storage of any combustible material or equipment, or for painting, refinishing, repair or similar purposes shall be effectively cut off from assembly areas or protected with a standard system of automatic sprinklers. They shall be located away from staircases.
21. Every stage equipped with fly galleries, grid irons and rigging for movable theater type scenery shall have a system of automatic sprinklers over and under such stage areas or spaces and auxiliary spaces, such as dressing rooms, store rooms and workshops. The proscenium opening shall be provided with a fire-resisting curtain, capable of withstanding a lateral pressure of 4 KN/ m<sup>2</sup> over the entire area. The curtain shall have an emergency closing device capable of causing the curtain to close without the use of power and when so closed, it shall be reasonably tight against the passage of smoke.
22. The stage roof of every theatre using movable scenery or having a motion picture screen of highly combustible construction shall have a ventilator or ventilators in or above it, open able from the

## General Development Control Regulations

stage floor by hand and also opening by fusible links or some other approved automatic heat/smoke actuated device, to give a free opening equal to at least one-eighth the area of the floor of the stage.

23. The proscenium wall of every theatre using movable scenery or decorations shall have exclusive of the proscenium opening, not more than two openings entering the stage, each not to exceed 2 m<sup>2</sup> and fitted with self-closing fire resistant doors.
24. Automatic smoke vents actuated by smoke detectors shall be installed above the auditorium or theatres, including motion picture houses, with capacity of 8 air change per hour.

**21.3 Institutional Buildings**

These shall conform to those given in 6.3 Part 4NBC second revision, and particular attention is drawn to the following:

1. In building or sections occupied by bed-ridden patients where the floor area is over 280 m<sup>2</sup>, facilities shall be provided to move patients in hospital beds to the other side of a smoke barrier from any part of such building or section not directly served by approved horizontal exits or exits from first floor (floor 2) of a building to the outside.
2. Not less than two exits of one or more of the following types shall be provided for every floor, including basements, of every building or section:
  - a. Doors leading directly outside the building.
  - b. Stairways
  - c. Ramps.
  - d. Horizontal Exits and
  - e. Fire Escape Staircase.
3. All required exits as per table in Performance Regulation No. 20.4 of corridor width.
4. No building constructed in whole or in part of combustible materials shall be used to confine inmates in cells or sleeping quarters, unless automatic sprinkler protection is provided.

**21.4 Public Safety**

Closed Circuit Television (CCTV) Network shall be installed in public areas of assembly buildings and other places of entertainment as per protocols laid down by the Appropriate Authority.

**22 STRUCTURAL SAFETY****22.1 Applicability**

The following structural and seismic safety regulations shall apply to all buildings.

**22.2 Structural Stability and Maintenance of Existing Buildings**

1. The Owner/ developer/ occupants and registered appointed Person on Record shall have the assessment of structural safety of an existing building/structure damaged/undamaged carried out at stipulated periodical intervals through expert(s) chosen from a panel of experts identified by the Competent Authority. The intervals for maintenance and inspection shall be as per Schedule 17.
2. The owner/developer/occupant on advice of such expert(s) shall carry out such repair/restoration and strengthening/retrofitting of the building found necessary so as to comply with the safety standards laid down in the national building code and the Indian standards as specified.
3. In case, the owner/developer/occupant does not carry out such action, the Competent Authority or any agency authorized by the Competent Authority may carry out such action at the cost of owner/developer/occupant.
4. The Competent Authority shall specify the period within which such compliance is to be carried out.
5. The Competent Authority may also direct the owner/developer/occupant, whether the building could be occupied or not during the period of compliance.

**22.3 Additions and Alterations to Existing Buildings**

An alteration or addition to an existing building that is not structurally independent shall be designed and constructed such that the entire structure conforms to the structural and seismic safety requirements for new buildings, unless the following three conditions are complied with:

1. The alteration or addition complies with the requirements for new buildings.
2. The alteration or addition does not increase the seismic forces in any structural element of the existing building by more than 5% unless the capacity of the element subject to the increased force is still in compliance with the requirements for new buildings.
3. The alteration or addition does not decrease the seismic resistance of any structural element of the existing building unless the reduced resistance is equal to, or greater than, that required for new buildings.

**22.4 Change of Use of Buildings or Part of a Building**

When a change of use results in a structure being reclassified to a Higher Importance Factor (I) as defined in the IS: 1893-2002 "Criteria for Earthquake Resistant Design of Structures (Fifth Revision)", the building shall conform to seismic requirements for a new building with the Higher Importance Factor.

**22.5 Structural Safety Provisions during Construction**

1. The quality of all materials and workmanship shall conform to accepted standards and Indian Standard Specifications and Codes as included in Part V: Building Materials and Part VII Constructional Practices and Safety, National Building Code of India.
2. All borrow pits dug in the course of construction and repair of buildings, embankments, etc. shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly stepped for discharge into a river, stream, channel or drain, and no person shall create any isolated borrow pit which is likely to cause accumulation of water that may breed mosquitoes.

## General Development Control Regulations

3. Alternative materials, method of design and construction and tests:-The provisions of the regulations are not intended to prevent the use of any material or method of design or construction not specifically prescribed in them provided any such alternative has been approved. Nothing of the provisions of these regulations is intended to prevent the adoption or architectural planning and layout conceived as an integrated development scheme, the competent authority may approve any such alternative if it conforms to the provisions of the relevant parts of the national building code, regarding material, design and construction, and the material, method, or work offered is, for the purpose intended, at least equivalent to that prescribed in these regulations in quality, strength, compatibility, effectiveness, fire and water resistance, durability and safety.
4. All buildings shall be constructed on quality control requirements.
5. In case of buildings under construction based on approved development permission, structural safety requirements shall have to be observed. However, due to such structural work of strengthening/retrofitting in the event of natural disaster if certain setbacks and margin get reduced, special permission may be granted by the Competent Authority on case to case basis.

**22.6 Structural Safety Tests for Special Buildings**

Whenever as per an opinion of panel experts there is insufficient evidence of compliance with the provisions of the regulations or evidence that any material or method of design or construction does not conform to the requirements of the regulations, in order to substantiate claims for alternative materials, design or methods of construction, the competent authority may require tests, sufficiently in advance, as proof of compliance. These tests shall be made by an approved agency at the expense of the owner as follows:

1. Test Methods:-test methods shall be as specified by the regulations for the materials or design or construction in question, if there are no appropriate test methods specified in the regulations, the competent authority shall determine the test procedure, for methods or tests for building materials, reference shall be made to the relevant Indian standards as given in the national building code of India published by the bureau of Indian standards.
2. Test result to be preserved:- copies of the result of all such tests shall be retained by the Competent Authority for not less than two years after the acceptance of the alternative material
  - a. the testing of the materials as per Indian standards shall be carried out by laboratories approved by the competent authority on this behalf.
  - b. the laboratory/agency shall work out in consultation with the construction agency a testing programme of materials such as cement, steel and quality of concrete including its mixing, laying and strength at site as well as in the laboratory.
  - c. this should cover various stages of construction from foundation to completion as per regulation, the laboratory shall maintain a duly authenticated report in a bound register, copy of which will be submitted to the construction agency, which will in turn forward the testing report to the competent authority.

**22.7 Design for Structural and Seismic Safety****22.7.1 Design Standards**

The structural design of foundations, elements of masonry, timber, plain concrete, reinforced concrete, pre-stressed concrete and structural steel shall conform to:

1. The provisions of the National Building Code of India, Part VI - Structural Design (Section - I Loads, Section - 2 Foundation, Section - 3 Wood, Section - 4 Masonry, Section - 5 Concrete and Section - 6 Steel), and,
2. The following Indian Standards:

**Structural Safety:**

1. IS: 456: 2000 "Code of Practice for Plain and Reinforced Concrete"
2. IS: 800:1984 "Code of Practice for General Construction in Steel"
3. IS 875 (Part 2): 1987 "Design loads (other than earthquake) for buildings and structures" Part 2 Imposed Loads
4. IS 875 (Part 3): 1987 "Design loads (other than earthquake) for buildings and structures" Part 3 Wind Loads
5. IS: 883:1966 "Code of Practice for Design of Structural Timber in Building"
6. IS: 1904:1987 "Code of Practice for Structural Safety of Buildings: Foundation"
7. IS:1905:1987 "Code of Practice for Structural Safety of Buildings: Masonry Walls"

**Seismic Safety:**

1. IS: 1893-2002 "Criteria for Earthquake Resistant Design of Structures (Fifth Revision)"
2. IS:13920-1993 "Ductile Detailing of Reinforced Concrete Structures subjected to Seismic Forces - Code of Practice"
3. IS:4326-1993 "Earthquake Resistant Design and Construction of Buildings - Code of Practice (Second Revision)"
4. IS:13828-1993 "Improving Earthquake Resistance of Low Strength Masonry Buildings -Guidelines"
5. IS:13827-1993 "Improving Earthquake Resistance of Earthen Buildings - Guidelines"
6. IS:13935-1993 "Repair and Seismic Strengthening of Buildings - Guidelines"
7. "Guidelines for Improving Earthquake Resistance of Buildings", by Expert Group, Government of India, Ministry of Urban Affairs & Employment, published by Building Materials and Technology Promotion Council, 1998.

**Cyclone/ Wind Storms:**

1. IS 875 (3): 1987 "Code of Practice for Design Loads (other than Earthquake) for Buildings and Structures, Part 3, Wind Loads"
2. "Guidelines (based on IS 875 (3): 1987) for Improving the Cyclonic Resistance of Low-rise Houses and Other Building", by Expert Group, Government of India, Ministry of Urban Affairs & Employment, published by Building Materials and Technology Promotion Council, 1998.

**Note:** Wherever an Indian Standard including those referred to in the National Building Code or the National Building Code is referred, the latest revision of the same shall be followed except specific criteria, if any, mentioned above against that Code.

**22.7.2 Structural Inspection Report**

A Structural Inspection Report (SIR) shall be prepared for all buildings specified in Schedule 17 and submitted as specified in Form No. 15.

**22.8 Structural Safety of Display Structures**

Every display structure such as billboard shall be designed to ensure safety and be installed in compliance of National Building Code.

**23 ENVIRONMENTAL MANAGEMENT****23.1 Minimum Distance from Water body**

1. Minimum clearance of 30mts shall be provided between the boundary of the bank of a river where there is no embankment and any development work or part thereof.
2. Minimum clearances of 15mts to be provided between the embankment of a river and any building or part thereof or any other clearance as may be prescribed under any other general or specific orders of Government and appropriate Authority whichever is more.
3. Minimum clearances of 12mt shall be provided between the boundaries of any other waterbody such as lake (talav). Distance to be kept from canal shall be as follows:

Sr. No.	Types of Canal	Distance from Canal
1	Main Canal	25 m
2	Branch Canal/Sub Branch Canal	15 m
3	Distributory Canal	10 m
4	Branch Minor	5 m
5	Sub Minor	0 m

4. Where a water course passes through a low lying land without any well defined bank, the applicant may be permitted by the Competent Authority to restrict or re-direct the water course to an alignment and cross-section determined by the Competent Authority.

**23.2 Rain Water Management****23.2.1 Rain Water Disposal**

1. The roof (terrace) of a building and the remaining area of the building-unit shall be provided with an effective rain water drainage system so as to ensure that the rain water is not discharged into adjacent building units and no dampness is caused in any walls or foundation of adjacent buildings.
2. Rain water pipes shall be affixed to the outside of the walls of the building or in recesses or formed in such walls or in such other manner as may be approved by the Competent Authority.
3. No roof or terrace abutting on a public street shall be constructed without providing sufficient number of down take pipes and such pipes shall be so fixed as to discharge the rain water at a level not higher than 0.6 metre above the street level.
4. The manner of channeling rain water discharge from a building-unit to a public storm water drain, if available, shall be determined by the Competent Authority.

**23.2.2 Rain Water Harvesting**

Rain water harvesting is mandatory for all buildings with ground coverage 80 sq.mts and above. The system of storm water drainage and storage in reservoirs and recharge should conform to one of the following specifications:

- a. For Buildings with ground coverage above 80 sq.mts and below 500sq.mts: Percolation Pit or Bore Recharge shall be provided in the marginal space around the building. Such pits shall be filled with small pebbles, brick jelly or river sand and covered with perforated concrete slabs as illustrated below:

- b. For Buildings with building-unit area above 500sq.mts and up to 1500 sq.mts: Percolating Well with Rain Water Harvesting System shall be provided as illustrated below (up to ground first river):

## General Development Control Regulations

- c. For Buildings with building-unit area above 1500 sq.mts and up to 4000 sq.mts: Percolating Well with Rain Water Harvesting System shall be provided for every 4000sq.mts as illustrated above (up to ground second river).
- d. For Buildings with building-unit area above 4000 sq.mts: One Percolating Well shall be provided as per Regulation No.23.2.2(c) for every 4000sq.mts land area. As an alternative to providing multiple percolating wells, a Water Retention Pond with minimum capacity of 300,000 litres with a percolating well for every five percolating wells or part thereof shall be permitted as an alternative.

### 23.2.3 Rain Water Storage

For all building-units with area more than 1000sq.mts, Rain water storage tank shall be mandatory with adequate storage capacity.

### 23.3 Solid Waste Management

All buildings shall provide facilities for solid waste management. Standards and specifications of facilities shall conform to the following requirements:

#### 23.3.1 Solid Waste Bin for Residential Dwelling-1 and Dwelling-2 Use

1. Community bin shall be provided in the road-side marginal open space.
2. The size of the bin container shall be calculated at the rate of 10 litres capacity per dwelling unit with a maximum size of bin of 80 litres. The numbers of bins shall be calculated on the basis of total no. of dwelling units/tenements.

#### 23.3.2 Solid Waste Bin for Non-Residential Dwelling Use

1. Community bin shall be provided in the road-side marginal open space.
2. The size of the bin container shall be calculated at the rate of 20 litres capacity per 100sq.mts of floor area with a maximum size of bin of 80 litres.
3. The bin shall be provided with an air-tight lid.
4. For Hospitals, Hotels and Restaurants-disposal of solid waste shall be carried out as per the norms decided by the Competent Authority from time to time.
5. For Clubs, Community Halls and Party Plots- garbage container shall be provided with a minimum capacity of 4 tonnes. Such a container shall be placed along a paved area abutting the road of minimum dimensions of 6mt by 7.5mt. For such a place, used according to provision of this

## General Development Control Regulations

regulation, Competent Authority can collect security deposit from the plot owner as may be decided time to time.

**23.4 Grey-water Recycling****23.4.1 Applicability**

Any owner applying for approval for construction of a new set of buildings of category and total built-up area mentioned below shall make provision for reuse of recycled water:

No.	Building Use	Built-up Area (sq.mts)
1	Hospitals and Nursing Homes	More than 5,000
2	Hospitality: Hotels, Lodges, Guest houses	
3	Hostels for Schools, Colleges, Training Centres	More than 10,000
4	Community Centre, Banquet Halls, and similar uses	
5	Mercantile-2,3	
6	All hazardous, water-polluting, chemical industries	

**23.4.2 Provisions of Recycling System**

The applicant shall along with his application submit the designs, plans, calculations and the references used for the calculations etc to provide the system to recycle the grey water. Such system shall include the provisions to facilitate the following:

1. Treated grey water is pumped to a separate tank on the roof from where grey water will be supplied to water closets, garden taps, car washing taps etc.
2. Only water from water closets should be let in to sewerage system.
3. Wherever arrangements from reuse of recycled water is provided additional arrangements for carrying the excess grey water to the sewerage system may also be provided.
4. In a nature or manner or in a way that shall not constitute a nuisance of foul gases or cause a public hazard or otherwise in compliance of these regulations.
5. The recycled water shall be used for non potable, no contact purposes within premises and shall not be connected to sewage/waste water system of local authority. However the waste generated by the recycle plant can be connected to local authority sewer network if it is of the accepted quality as mentioned in Regulation No. 18.4.3
6. Separation of grey water:
  - a. The wastes from toilets in the premises will be separated from grey water that is of bathroom and kitchen wastes by means of separate down take discharge system.
  - b. The grey water shall be recycled by providing recycling plant and shall be reused for nonpotable purposes after storing the same in distinctly separate tank by means of purple colored down take pipes.
  - c. The water quality shall conform to standards of non potable water. The recycled water shall be tested once in six months and results shall be made available to competent authority whenever demanded.
  - d. The make-up connection to the system will be done at the collection tank of the treated water, through a free fall if from Municipal water connection.

3. Copy of Sanctioned Layout including date of sanction and Reference No.;
4. Soil Test Report for buildings with more than 3 floors or frame structures;
5. Certified part plan and Zoning Certificate from the Authority;
6. Form No 5/8: Application for Obtaining/Revising a Development Permission;
7. Form No. 2/2A: Certificate of Undertaking by the Architect on Record or Engineer on Record as applicable;
8. Form No. 2B: Certificate of Undertaking by the Structural Engineer on Record;
9. Form No. 2C: Certificate of Undertaking by the Clerk of Works on Record;
10. Form No. 2D: Certificate of Undertaking by the FPCOR, if applicable;
11. Form No. 6A: Area Statement for Buildings;
12. NOC from Appropriate Authority as per Regulation No. 30.0, as applicable;
13. Calculation statement for payment of all relevant Development Permission Fees or any other charges;
14. Photographic Identity Proof of Owner or Developer and person on records;
15. Photograph of Building-unit
16. Certificate, NOC, opinions as may be required by competent authority.

**C. LIST OF DRAWINGS**

**1. Key Plan**

- A key plan shall be drawn to scale of minimum 1:8000 and shall explain the boundary and location of the site with respect to neighborhood landmarks.

**2. Site Plan**

- The site plan shall be drawn to scale of minimum 1:500 for plots less than 10 hectares and to scale minimum 1:1000 for plots more than 10 hectares and shall show the following details:

## General Development Control Regulations

- a. Boundaries of the plot and of any contiguous plots belonging to the Owner;
- b. Position of the plot in relation to the neighbouring streets and street names;
- c. Direction of north point relative to the plan of buildings;
- d. Building-Unit Level in relation to the neighboring street level;
- e. Building number or Plot No. of the plot on which the building is intended to be erected;
- f. All existing buildings standing on, over or under the plot;
- g. Any existing natural or manmade physical features, such as wells, drains, trees, high tensionline, gas pipeline, railway line, etc.
- h. Proposed use of every building
- i. The position of building(s) and construction which the applicant intends to erect in relation to:
  - i. The boundaries of the plot and in case where the plot has been partitioned, the boundaries of the portion owned by the applicant and also of the portions owned by others;
  - ii. All buildings (with number of stories and height) and premises adjacent to the plot and of the contiguous land, if any, referred to in (a); and;
  - iii. Any street prescribed under the Act and passing through the Building-unit/s clearly indicating the regular line of streets;
  - iv. The area within the regular line of the street not to be built upon but to be added to the street, hatched in green together with its measurements;
  - iv. Building lines and margins of streets.
- j. The width and level of the street in front, and of the street, if any, at the side or rear of building clearly indicating the regular line of streets;
- k. The means of access from the street to the site and all existing and proposed buildings;
- l. Open space to be left around the building to secure free circulation of air, admission of light and access;
- m. Open space to be provided under these Development Regulations;
- n. The area of the whole plot and the break-up of Total built-up area on each floor;
- o. Area classified for exemption of built-up area calculations;
- p. Dimensions and areas of common plot, as required under these regulations;
- q. Parking layout, indicating the parking spaces, access lane, driveway or ramp;
- r. Layout and details of rain water harvesting required under the Development Regulations, if any;
- s. The position of every water closet, privy, urinal, bathrooms, cess pool, well or cistern in connection with the building other than those shown in the building plan.
- t. The lines of drainage of the building, the size, depth and inclination of every drain and the means to be provided for the ventilation of the drains;
- u. The position and level of the outfall of the drain, any existing facilities regarding water supply, sewerage etc, diameter and gradient of water supply line, drainage lines for the disposal of storm water as well as for sewerage.

**2A. Detail Drawings**

Detailed Drawings shall be submitted showing the boundary walls and gates.

**3. Landscape Plan**

The landscape plan shall be drawn to scale of minimum 1:100 for plots less than 500 sq.m. and to scale minimum 1:500 for plots more than 500 sq. m. and shall show the following details:

- a. the space for circulation and parking;
- b. paved pathways;
- c. existing trees;
- d. proposed tree plantation;
- e. green areas;
- f. Unpaved areas.

**4. Building Plan**

The plans, elevations and sections of the proposed building shall be drawn to a scale of 1:100 showing the following details, wherever applicable:

- a. all floor plans together with the covered area, size and spacing of framing members, size of rooms and the position and width of staircases, ramps and other exit ways, lift wells, lift machine room and lift pit details;
- b. Built-up area of each dwelling unit, or shop or office space at every floor level;
- c. the use or occupancy of all parts of the building;
- d. exact location of essential services, like W.C., sink, bathroom, kitchen, cesspool, water tank, cistern, etc.
- e. Section drawings showing clearly the size of the footings, thickness of basement wall, wall construction, sizes and spacing of structural members, floor slabs and roof slabs with their materials. The section shall indicate the heights of building and rooms and also the height of the parapet, and the drainage and the slope of the roof. At least one section should be taken through the staircase. Access to the various parts of the building and its appurtenances also should be shown in one section.
- f. Levels of the site and all floors in relation to the datum or crown level of the access street;
- g. all elevations;
- h. details of service privy, if any;
- i. dimensions of the projected portions beyond the permissible building line;
- j. terrace plan including cabin structure;
- k. parking spaces provided and the parking layout;
- l. direction of north point relative to the plan of buildings;
- m. such other particulars as may be required to explain the proposed building clearly.

**5. Additional Fire Prevention and Safety Provisions**

Additional fire prevention and safety provisions to be provided in buildings eligible for a Development Permission are specified in Schedule 23 according to different uses and the height of the building. Details of these shall be indicated in the drawings as required.

**6. Specifications**

General specifications of the proposed building giving type and grade of material shall be signed by the Architect on Record and the Structural Engineer on Record.

**D. DEVELOPMENT PERMISSION FEES**

Receipt of Development Permission Scrutiny Fees paid as per Schedule 3 and of other charges leviable on the Building-unit shall be attached with the application

**Schedule 4b : Drawings, Specifications and Documents to besubmitted with Application for Obtaining/Revising Development Permission for Sub-division and Amalgamation****(Refer Regulation No. 5.1.3 and 5.2.3)**

The Owner / Developer shall submit to the Competent Authority the following documents, drawings and specifications along with application for obtaining and revising a Development Permission.

**A. COPIES OF DOCUMENTS, DRAWINGS AND SPECIFICATIONS**

1. 5 copies of all plans and statements shall be made available along with the notice. Soft copy of the drawings in cad format shall also be submitted.
2. All documents, drawings and specifications to be submitted along with the notice shall be duly signed by the Owner and the appropriate Person on Record and shall indicate their names, address, and Registration number.
3. Every drawing, document and report shall be signed by the Owner and the Architect on Record or Engineer on Record, and the Clerk of Works on Record as the case may be and in accordance with the Development Regulations. If copies of original maps or drawings are submitted, they shall be true copies.

**B. LIST OF DOCUMENTS**

1. Satisfactory documentary legal evidence of the Right to Develop or Build on the Building-unit, including photocopies of the relevant extract from the Property Register for City Survey Lands or Record of Rights for Revenue Lands or Index of Registered Sale Deed as applicable.
2. Certificate of approved sub-divisions or layout of the final plot from the concerned Authority as the case may be showing:
  - a. City Survey No. or Revenue No.
  - b. Area and Measurements of the Building-unit
3. Copy of Sanctioned Layout including date of sanction and Reference No.
4. Certified part plan and Zoning Certificate from the Authority
5. Form No 5/B: Application for Obtaining/Revising a Development Permission
6. Form No. 2/2A: Certificate of Undertaking by the Architect on Record or Engineer on Record as applicable
7. Form No. 2C: Certificate of Undertaking by the Clerk of Works on Record
8. Form No. 6B: Area Statement for Sub-Division and Amalgamation;
9. NOC from Appropriate Authority as per Regulation No. 26.0, as applicable
10. Calculation statement for payment of all relevant Development Permission Scrutiny Fees or any other charges;
11. Photographic Identity Proof of Owner or Developer
12. Photograph of Building-unit
13. Certificate, NOC, copy of soil testing report and opinions as may be required by competent authority.

**C. LIST OF DRAWINGS**

1. Key Plan:

A key plan shall be drawn to scale of minimum 1:8000 and shall explain the boundary and location of the site with respect to neighborhood landmarks.

**2. Site Plan**

**Annexure I : Structural Safety and Services****I. STRUCTURAL DESIGN**

The structural design of foundation, elements made of masonry, timber plain concrete, reinforced concrete, pre-stressed concrete and structural steel shall conform to the provisions of part VI structural design Section-1 loads, Section-2 Foundation, Section-3 Wood, Section-4 Masonry, Section-5 Concrete, Section-6 Steel, National building code of India, taking into consideration the Indian Standards and Guidelines for hazard safety as given below;

**a. For earthquake protection**

- i. IS:1893-1984 "Criteria for earthquake resistant design of structures (fourth revision)"
- ii. IS:13920-1993 "ductile detailing of reinforced concrete structures subjected to seismic forces- code of practice"
- iii. IS:4326 -1993 "Earthquake resistant design and construction of the buildings-Code of Practice (second revision)"
- iv. IS:13828-1993 "Improving earthquake resistance of low strength masonry buildings-guidelines"
- v. IS:13827-1993 "Improving earthquake resistance of earthen buildings guidelines"
- vi. IS: 13935-1993 "Repair and seismic strengthening of buildings -guidelines".
- vii. "Improving the earthquake resistance of buildings -guidelines" by expert groups, Government of India, Ministry of Urban Affair & Employment, published building material and technology promotion council 1998.

**b. For Cyclone /Wind Storm Protection**

- i. IS 875 (3) -1987 "Code of practice for design loads(other than earthquake) for buildings and structures, part 3 wind loads".
- ii. "Improving wind/cyclone resistance buildings-guideline" by expert group, Government of India, Ministry of Urban Affair & Employment, published building material and technology promotion council 1998.

Note: Whether an Indian Standard including those referred in the National Building code or the National Building Code is referred, the latest version of the same shall be followed.

- iii. In pursuance of the above, a certificate as indicated in the in Form-2 (shall be submitted along with building plans/drawings and other building information schedule annexed thereto.

**2. QUALITY CONTROL REQUIREMENTS**

- i. The quality of all the materials and workmanship shall conform to the accepted standards and Indian standard specifications and codes as included in Part V Building Materials and Part VII Constructional Practices and Safety, National Building Code of India.
- ii. All borrow pits dug in the course of construction and repair of buildings, embankments etc. shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly stepped for discharge into a river, stream, channel or drain, and no person shall create any isolated borrow pit which is likely to cause accumulation of water that may breed mosquitoes.
- iii. Alternative materials, method of design and construction and tests:-

The provision of the regulations are not intended to prevent the use of any material or method of design of construction not specifically prescribed in them provided any such

## General Development Control Regulations

alternative has been approved. Nothing of the provisions of these Regulations is intended to prevent the adoption or architectural planning and layout conceived as an integrated development scheme. The competent authority may approve any such alternative if it conforms to the provisions of the relevant parts of the National Building Code, regarding material, method or work offered is, for the purpose intended at least equivalent to the prescribed in these regulations in quality, strength, compatibility, effectiveness, fire and water resistance, durability and safety.

- iv. All buildings shall be constructed on a quality control requirement
- v. In case of existing building under construction based on approved building permission, structural safety requirements shall have to be observed. However, due to such structural work of strengthening/retrofitting if certain setbacks and margin get reduced, special permission may be granted on case to case basis.

**3. TESTS:**

Whenever there is insufficient evidence of compliance with the provision of the regulation or evidence that any material or method of design or construction does not conform to the requirements of the regulations, in order to substantiate claims for alternative materials, design or methods of construction, competent authority may require tests, sufficiently in advance, as proof of compliance. These tests shall be made by an approved agency at the expense of the owner as follows:

- i. **TEST METHODS:** test methods shall be as specified by the regulations for the materials or design or construction in question. If there are no appropriate test methods specified in the regulations, the competent authority shall determine the test procedure. For method or tests for building materials, reference shall be made to the relevant Indian Standards as given in the National Building Code of India published by the bureau of Indian Standards.
- ii. **TESTS RESULT TO BE PRESERVED:** Copies of the result of all such tests shall be restrained by the competent authority for not less than two years after the acceptance of the alternative material.

The testing of the material as per Indian Standards shall be carried out by the laboratories approved by the competent authority on this behalf.

The laboratory/agency shall work out in consultation with the construction agency a testing programme of materials such as cement, steel and quality of concrete including its mixing, laying and strength at site as well as in the laboratory.

This should cover various stages of construction from foundation to completion as per Regulation. The laboratory shall maintain a duly authenticated report in a bound register, copy of which will be submitted to the construction agency, which will in turn forward the testing report to the competent authority.

**4. STRUCTURAL STABILITY AND FIRE SAFETY OF EXISTING BUILDINGS**

- i. The competent authority shall have the assessment of structural and / or fire safety of an existing building / structure damage / undamaged carried out at stipulated periodical

## General Development Control Regulations

intervals through expert (s) chosen from a panel of experts identified by the Competent Authority.

- ii. The owner/ developer/ Applicant on advice of such expert(s) shall carry out such repair/ restoration and strengthening / retrofitting of the building found necessary so as to comply with the safety standards laid down in National Building Code and the Indian Standards as specified.

In case, the owner/ Developer/ Occupant do not carry out such action, the competent authority or any agency authorized by the competent authority may carry out such action at the cost of owner/Developer/ Occupant.

- iii. The Competent Authority shall specify the period within which such compliance is to be carried out.
- iv. The Competent Authority may also direct the owner/Developer/ Occupant. Whether the building would occupied or not during the period of compliance.
- v. In case of existing building under construction based on approved building permission, structural safety requirements shall have to be observed. However, due to such structural work of strengthening / retrofitting if certain setbacks and margin get reduced, special permission.

5. The structural safety of the building shall be responsibility of the developer. The developer shall, at his cost, get an audit of the structural stability and safety through any independent Competent Authority or a structural expert of adequate experience and good reputation identified and advised by the competent authority.

**Annexure 2 :Regulation for Re-use of water****2.1. Definitions**

- 2.2.1. 'Domestic waste water' means either waste water that is typically discharged from premises that are used solely for residential activities or waste water of the same character discharged from other premises.
- 2.2.2. 'Grey water' means involving non-potable water from sinks, tubs, showers and washing.
- 2.2.3. 'pre-treatment' means any processing of industrial waste or waste designed to reduce any characteristic in waste, before discharge to the waste water system
- 2.2.4. 'premises' means either
- a) A property which is held under a separate card of title or for which a separate title card may be issued and in respect to which a building plans have been or may be issued, or a building which is in possession as an individual unit by a cross- lease, unit title or company lease and for which a certificate of title is available, or,
  - b) Land held in public ownership, for a particular purpose, or
  - c) Separately assessed to local authority taxes, individual unit within building.
- 2.2.5. 'Non – potable water' means the use of water for non-contact uses, non domestic consumption like car washing , toilet flushing, gardening, construction purposes, landscaping, drip irrigation of trees/shrubs, sub surface irrigation of lawns and recharge of ground water and uses is for bidden by virtue of powers vested with government.
- 2.2.6. 'Prohibited industrial waste' means a industrial waste having physical and chemical characteristics in excess as decided by GPCB.
- 2.2. **Applicability:** Re-use of water shall be provided in case of following categories of buildings
- 2.2.1. All new buildings under the following use

- a) Any low rise/ high rise building having number of units 10 or more or having total built-up area more than 750 sq meters.
- b) Hospital and Nursing homes
- c) Hotels , lodges and guest houses
- d) Hostels of schools, Colleges, Training centers
- e) Barracks of armed forces, paramilitary forces and police
- f) Individual residential Dwelling-1 and Dwelling-2 buildings having more than 150 sq. mts plinth area
- g) Functional buildings of railway stations and airports like waiting rooms, retiring rooms, rest rooms, inspection bungalows and catering units
- h) Community centers, banquet halls and buildings of similar use
- i) Commercial establishments having total built up area of 2000 sq. mts or more
- j) All hazardous /water polluting/ chemical industries

**Note – In Case of category of mentioned in "b,c,g,h and j" above it shall not be mandatory to provide solar assisted heating system.**

**2.2.2. Exemptions could be accorded under following circumstances, as decided by the authority.**

- a. In case the existing premises cannot permit the provision of additional overhead tank for the purpose of the use of treated water.

## General Development Control Regulations

- b. If, in the existing structure, there is no space for installation of treatment facility and collection chamber.
- c. In exceptional cases due to dearth of land or water logged areas exempted (with the approval from competent authority) from providing facility for recycling the grey water.

**2.2.3. Installation of the system for the reuse of water:**

- (1) **New Buildings** – Clearance of plan for the construction of new buildings of the aforesaid categories shall only be given if they have a provision in the building design itself for.
  - (a) Every developer/builder shall provide with the provision of down take plumbing for grey water, recycling water plant, storage and reuse fitting in purple colour.
  - (b) Provide additional arrangement for carrying the excess grey water to the sewerage system may also be provided
  - (c) No nuisance of foul gases/public hazard or any other aspect endangering life
  - (d) There shall not be cross connection of fitting of the potable and not potable water at any point. The recycled water system shall be maintained at a lower water pressure than that of the portable water system. Precaution should be taken at the make-up connection to prevent cross contamination.
- (2) **Old Buildings**: in case of additions and alterations, systems for the Re-use of water shall be provided in accordance to these regulations.

**2.2.4. Quality of water, treatment and specifications:**

- (1) The water quality shall conform to standards of non potable water. The recycled water shall be tested once in six months and results shall be made available to competent authority whenever demanded.
- (2) Every existing building/residential ~~dwelling~~ structure shall provide with the provision of recycle water plant and relevant adequate separate plumbing for grey water and reuse fitting.
- (3) The testing of wastes and the submission of the results shall be done in a manner in accordance with the terms and conditions prescribed by the Municipal Commissioner or the Gujarat Pollution Control Board/ the competent authority.
- (4) Installations for Re-use of water shall conform to relevant codes of practices

**2.2.5. General Provisions:**

- (1) **Mandatory Disclosure**: An occupier/owner of premises shall inform the competent authority of any change in the quality, nature of the wastes discharged from his plant or premises, the manner of their discharge of water likely to cause variations or violation under these regulations.
- (2) **Corrective action**: In the event it is found any person violating the provisions of these regulations, the competent authority shall issue notice and after inquiry and personal hearing take necessary corrective action.
- (3) **Rebate**: The competent authority may satisfy itself on the performance of recycling of the water and thereafter can give rebate on the taxes / fees leviable for the development. The competent authority may give such rebate on the capital or recurring recoveries which the developer is liable to pay.
- (4) **Dispute Resolution**: All the disputes arising in the enforcement of this by these rules shall be referred to Municipal Commissioner who in turn will resolve the disputes in advise with his authorized the technical officer or any experts and intimate to the occupier/builder/developer. The decision of the competent authority will be final and binding on the occupier.
- (5) **List of Authorized Laboratories** shall be as authorized by Gujarat State Pollution Control Board or the Municipal Corporation.

**Annexure 3 : Regulation / Bye - Laws for Installation of Solar Assisted Water Heating System**

- 3.1. Solar assisted water heating system shall be provided in case of following categories of building
- Hospital and Nursing Home
  - Hotels, Lodges and Guest Houses
  - Hostels of schools, colleges, training centers
  - Barracks of armed forces, paramilitary forces and police
  - Individual residential Dwelling-1 and Dwelling-2 buildings having more than 150.00 sq mts. plinth area
  - Functional buildings for Railway Stations and Airports like waiting rooms, retiring rooms, rest rooms, inspection bungalows and catering units
  - Community centers, Banquet hall, Barat Ghars, Kalyan Mandaps and buildings for similar use

**Note:** In case of category as mentioned in "e" above it shall not be mandatory to provide the solar assisted heating system

- 3.2. "No new buildings in the category mentioned in 3.1 above in which there is a system for installation for supplying hot water shall be built unless the system or the installation is also having an auxiliary solar assisted water heating systems.

**SCHEDULE****I. Definitions :**

- |      |                                     |   |
|------|-------------------------------------|---|
| i.   | Solar Assisted Water Heating System | : a device to heat water using solar energy as heat source  |
| ii.  | "Auxiliary backup"                  | : electrically operated or fuel fired boilers/ systems to heat water coming out from solar water heating system to meet continuous requirement of hot water |
| iii. | "New Building"                      | : Such building of above said Categories for which construction plans have been submitted to competent authority for clearance.                             |
| iv.  | "Existing Building"                 | : Such building which are licensed to perform their respective business   |

**2. Installation of Solar Water Heating System**

- a. **New Buildings:** Clearance of plan for the construction of new buildings of the aforesaid categories shall only be given if they have a provision in the building design itself for an insulated pipeline from the rooftop in the building to various distributions from the rooftop in the building to various distribution points where hot water is required. The building must have a provision for continuous water supply to the solar water heating system. The building should also have open space on the rooftop, which receives direct sun light. The load bearing capacity of the roof should at least be 50 kg. per sqm. All new buildings of above said categories must complete installation of solar water heating systems before obtaining necessary license to commence their business.

---

General Development Control Regulations

---

- b. **Existing Buildings:** Installation of Solar Assisted Water Heating System in the existing building shall be made mandatory at the time of change of use to above said category provided there is a system of installation for supplying hot water.
- 2.1. **Capacity:** The capacity of solar water heating system to be installed on the building of different categories shall be decided in consultation with the local bodies. The recommended minimum capacity shall not be less than 25 litres per day for each bathroom and kitchen subject to the condition that maximum of 50% of the total roof area is provided with the system.
- 2.2. **Specification:** Installation of Solar Assisted Water Heating Systems shall conform to BIS (Bureau of Indian Standards) specification IS 12933. The solar collectors used in the system shall have the BIS certification mark.
- 2.3. **Auxiliary System:** Wherever hot water requirement is continuous, auxiliary heating arrangement either with electric elements or oil of adequate capacity can be.

**Note:** Provision of Regulation of Reuse of Water and Installation of Solar Assisted Heating System shall be applicable to the developments as mentioned in this regulation.

The earnest money deposit shall be the 10 percent of the upset price or Rs. 5,000/- whichever is more. The Sealed cover shall be produced with the demand draft of non-refundable fee of Rs. 500/-.

(12) The Taxation Authority may take note of such sealed cover in the register as per the instructions of the Commissioner of Transport issued from time to time. The Commissioner of Transport may from time to time issue instructions to all the Taxation Authorities regarding the particulars require to be mentioned in sealed cover.

(13) The sealed cover received shall be opened before the Taxation Authority, committee and all bidders. If any bidder shall not remain present, the decision of the auction shall be binding to him.

(14) After opening the sealed cover the person, who shall have offered the highest price more than upset price out of all bidders, shall be declared as the successful purchaser. Taxation Authority shall issue the order of sell of vehicle by auction to successful purchaser. The demand draft of earnest money deposit shall be returned to all unsuccessful bidders.

(15) The successful purchaser shall be liable to pay offered amount by demand draft within three days from the receipt of the order of sell of vehicle by auction which shall be adjusted against the amount of principal amount of tax first and thereafter it shall be adjusted against the penalty and interest accordingly:

Provided that where the successful bidder fails to pay the offer amount within such time, his earnest money deposit shall be forfeited and deposited in the Government Treasury.

(16) After opening of the sealed cover if there are two or more than two bids for the same value, the Taxation Authority shall provide an opportunity to such bidders to submit new offers immediately.

(17) Where it appears that the quoted price is lower than the upset price, then in that case, the bid shall be liable to be cancelled. Where quoted price in bids of all participants shall be lower than the upset price, the auction shall be cancelled, and the demand draft of earnest money deposit will be returned to all bidders; and fresh auction process shall be undertaken by the Taxation Authority as per manner stated above.

(18) The Taxation Authority may intimate the successful purchaser to take over the possession of vehicle within 7 days. The possession of vehicle shall be delivered to the successful bidder as on where basis. The successful bidder shall take the vehicle at his own cost.

(19) The Taxation Authority shall transfer the vehicle in the name of purchaser at the time of delivery of Motor Vehicle, if motor vehicle is in road worthy condition.

(20) All the applicable taxes, duties or any other levy applicable after the date of taking delivery, the purchaser shall be responsible for all legal liabilities occurred after taking over the possession by auction.

(21) Where, the auctioned price of successful purchaser is more than tax, penalty interest, the taxation authority may give opportunity to the registered owner or person who is in possession or control of the vehicle by registered post AD (RPAD) to receive such excess amount:

Provided that where such excess amount is not claimed within 30 days from the date of receipt of intimation, it shall be deposited in the Government Treasury and no person shall have any right over that amount:

Provided further that where the vehicle is registered under the hypothecation agreement or lease agreement with financier and after auction it appears that the amount paid by the successful purchaser is excess than the outstanding amount of arrears of tax, penalty and interest, the Taxation Authority may intimate the financier in accordance with section 12C of the Gujarat Motor Vehicles Tax Act, 1958 to receive such excess amount within 30 days from the receipt of such letter after producing necessary proof. The Taxation Authority shall deposit such amount in Government Treasury if no financier come forward to receive such amount and no person shall have right over that amount:

Provided also that the Taxation Authority may give opportunity of being heard to the registered owner or person in possession or control of vehicle before remitting such amount to the financier.

(22) Where no person shall come forward to take part in second auction, the Taxation Authority shall send a report to the Commissioner of Transport and who may take appropriate decision for the disposal of vehicle by any other manner as he may deem fit.

(23) Where before or during the process of the auction if the Taxation Authority has reason to believe that the participants of auction are acting in a cartel or syndicate or for any other administrative reason in public interest, the Taxation Authority shall be empowered to cancel the auction at any stage without stating any reason. An order of cancellation of the auction shall be published on the notice board of the office. The Taxation Authority shall intimate to the Commissioner of Transport reasons of canceling the auction and bid received, if any, shall be returned to the applicants after cancellation of auction.

(24) Where after auction it appears that the outstanding tax, penalty and interest are not recovered fully, the taxation authority shall have a right to recover such amount in accordance with the provisions of the Gujarat Motor Vehicles Tax Act, 1958.

(25) The Taxation Authority shall have right to cancel the auction at any stage without stating any reason.

By order and in the name of the Governor of Gujarat,

**S. R. SONI,**

Deputy Secretary to Government.

ક્રમાંક: જીએચકેએચ/૪૩/૨૦૧૬/એપીએમ/૧૦.૨૦૧૫/૨૦૮૨/ગ.- ગુજરાત ખેત ઉત્પન્ન બજાર અધિનિયમ, ૧૯૬૩ (સને ૧૯૬૪ ના ગુજરાત અધિનિયમ-૨૦) જેનો આમાં હવે પછી સદરહુ અધિનિયમ તરીકે ઉલ્લેખ કર્યો છે. તેની કલમ-૫૨ તથા કલમ-૫ થી મળેલ સત્તાની રૂએ ગુજરાત સરકારના કૃષિ અને સહકાર વિભાગના તા.૨૧-૧૨-૨૦૧૫ ના જાહેરનામા ક્રમાંક: જીએચકેએચ/૧૨૮/એપીએમ/૧૦.૨૦૧૫/૨૦૮૨/ગ (જેનો આમાં હવે પછી સદરહુ જાહેરનામા તરીકે ઉલ્લેખ કર્યો છે.) મહીસાગર જિલ્લાની ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-સંતરામપુર વિસ્તારનો બે જુદા-જુદા બજાર વિસ્તારો એટલે કે, મહીસાગર જિલ્લાના (૧) સંતરામપુર તાલુકાના બનેલા બજાર વિસ્તાર અને (૨) કડાણા તાલુકાના બનેલા બજાર વિસ્તારના વિભાજન કરવાનો ઈરાદા સામે ગુજરાત સરકારને મળેલ વાંધાઓ/સુચનો વિચારણામાં લેવામાં આવેલ છે. અને વાંધા સુચનોની કાળજીપૂર્વક વિચારણાને અંતે સૂચિત વિભાજન કરવું જરૂરી અને યોગ્ય જણાય છે.

આથી ગુજરાત ખેત ઉત્પન્ન બજાર અધિનિયમ, ૧૯૬૩ કલમ-૫૨ થી મળેલ સત્તાની રૂએ ગુજરાત સરકાર સદરહુ જાહેરનામામાં નિર્દિષ્ટ કરેલ ખેત ઉત્પન્નના ખરીદ અને વેચાણના સંબંધમાં ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-સંતરામપુર જિલ્લો-મહીસાગર બજાર વિસ્તારને બે જુદા-જુદા બજાર વિસ્તારો એટલે કે, (૧) સંતરામપુર તાલુકાની બનેલા બજાર વિસ્તાર અને (૨) કડાણા તાલુકાના બનેલા બજાર વિસ્તારમાં વિભાજન કરેલ છે. હવે તેથી સદરહુ અધિનિયમની કલમ-૫૪ અન્વયે મળેલ સત્તાની રૂએ ગુજરાત સરકાર આથી (ક) ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-સંતરામપુર જિલ્લો-મહીસાગરનું વિસર્જન કરે છે અને (ખ) આદેશ કરે છે કે, (૧) વિસર્જન ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-સંતરામપુર જિલ્લો-મહીસાગરના સભ્યોએ હુકમની તારીખથી તેમના હોદ્દા ખાલી કરવા. (૨) એ રીતે વિસર્જિત ખેતીવાડી ઉત્પન્ન બજાર સમિતિના બજાર વિસ્તારનું વિભાજન કરવામાં ઓલ છે. તેવા બંને ખેતીવાડી ઉત્પન્ન બજાર સમિતિઓના બે જુદા-જુદા બજાર વિસ્તાર માટે એટલે કે સંતરામપુર તાલુકાનો બનેલો બજાર વિસ્તાર તથા કડાણા તાલુકાના બનેલા બજાર વિસ્તાર માટે એક એક બજાર

સમિતિ રચવી. (ગ) આ હુકમથી નીચે દર્શાવેલ અનુસૂચિ-૧માં નિર્દિષ્ટ કરેલ વ્યક્તિઓને ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-સંતરામપુર અને અનુસૂચિ-૨ માં નિર્દિષ્ટ કરેલ વ્યક્તિઓને ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-કડાણા વ્યવસ્થાપક સમિતિના સભ્યો તરીકે નિયુક્ત કરે છે. (ઘ) ઉપર્યુક્ત ખેતીવાડી ઉત્પન્ન બજાર સમિતિઓમાં એવી રીતે નિયુક્ત કરાયેલ સભ્યો આ હુકમની તારીખથી બે વર્ષથી વધુ નહીં તેટલી મુદત સુધી હોદ્દો ધરાવશે.

#### Gujarat Tax on Luxuries (Hotels and Lodging Houses) Act, 1977

**No. GHT/2016/15/SSA-102016/47/A :-** WHEREAS, certain draft rules were published as required by sub-section (3) of section 21 of the Gujarat Tax on Luxuries (Hotels and Lodging Houses) Act, 1977 (Guj. 24 of 1977), at pages 337-1 to 337-13 in the Gujarat Government Gazette, Extraordinary, Part IV-B [Ex.-337] dated the 4<sup>th</sup> May, 2016 under the Government Notification; Information & Broadcasting Department No.GHT/2016/12/SSA-102016/47/A, dated the 2<sup>nd</sup> May, 2016, inviting objection and suggestion from all persons likely to be affected thereby, within a period of thirty days from the date of publication of the said notification in, the *Official Gazette*.

AND WHEREAS, no objection or suggestion has been received by the Government in respect to the said draft notification;

NOW, THEREFORE, in exercise of the powers conferred by section 21 read with section 4A of the Gujarat Tax on Luxuries (Hotels and Lodging Houses) Act, 1977 (Guj. 24 of 1977), the Government of Gujarat hereby makes the following rules further to amend the Gujarat Tax on Luxuries (Hotels and Lodging Houses) Rules, 1978, namely:-

1. These rules may be called the Gujarat Tax on Luxuries (Hotels and Lodging Houses) (Amendment) Rules, 2016.
2. In, the Gujarat Tax on Luxuries (Hotels and Lodging Houses) Rules, 1978 (hereinafter referred to as "the said rules") for the rule 2A, the following shall be substituted, namely:-

**2A. Registration of Hotels: -** (1) Every proprietor liable to pay Luxury Tax under the Act shall apply for Certificate of Registration in Form-IB through the website of Commissioner of Entertainment Tax (<http://cet.gujarat.gov.in/>) or any other website as may be prescribed by the Government from time to time; to the Collector within thirty days from the date from which such proprietor commences to provide luxury to a person in the hotel;

Provided that proprietors who are already providing luxury on the date of the commencement of the Gujarat Tax on Luxuries (Hotels and Lodging Houses) (Amendment) Rules, 2016, shall apply for Certificate of Registration in Form IB through the website of Commissioner of Entertainment Tax (<http://cet.gujarat.gov.in/>) to the Collector within thirty days from the date of commencement of the Gujarat Tax on Luxuries (Hotels and Lodging Houses) (Amendment) Rules, 2016.

(2) Every such application for registration except covered under the proviso to sub-rule (1) above shall be accompanied by a fee of rupees five thousand to be paid online through the website of Commissioner of Entertainment Tax (<http://cet.gujarat.gov.in/>) or any other website as may be prescribed by the Government from time to time.

3. In, the said rules, in rule 2B;

(i) for sub-rule (1) the following shall be substituted, namely:-

"(1) On receipt of duly completed application under rule 2A, the Collector after making such inquiry as he deems fit and is satisfied that the applicant has complied with the provisions of the Act and Rules, shall issue a Certificate of Registration in Form-IC not later than 30 days from the date of receipt of duly completed application."

(ii) after sub-rule (2) the following shall be added, namely:-

"(3) The Certificate of Registration issued shall be uploaded on website of Commissioner of Entertainment Tax. (<http://cet.gujarat.gov.in/>)"

4. In, the said rules, for rule 3, the following shall be substituted, namely:-

"3. *Period within which and manner in which tax shall be paid.*- The amount of tax payable by a proprietor shall be paid by him into the Government Treasury within five days after the end of the month to which the tax collected by the proprietor relates, which shall be paid online in Form-IA, through the website of Commissioner of Entertainment Tax (<http://cet.gujarat.gov.in/>) or any other website as may be prescribed by the Government from time to time. In the event of failure of the system of online payment through the website due to any long term technical reason/s which must be confirmed by the respective website maintenance expert, cyber treasury portal maintenance expert and the respective bank in writing, the Collector may allow to accept payments by a challan in Form-L (in quadruplicate) for a particular period or a particular case until the system of online payment resumes its normal functioning. Such manual payments must be appropriately recorded in the online system immediately after resuming the normal functioning of the online payment system to maintain the continuity of the online payment system."

5. In, the said rules, for rule 5 the following shall be substituted, namely:-

"5. *Form of return to be submitted under section 5.* - (1) Every proprietor liable to pay tax under this Act shall submit monthly returns online in Form-VII through the website of Commissioner of Entertainment Tax (<http://cet.gujarat.gov.in/>) or any other website as may be prescribed by the Government from time to time, to the Collector within fifteen days after the expiry of the month to which the return relates.

(2) Every proprietor submitting the online return shall subscribe on solemn affirmation that the facts mentioned in the return submitted online are true to the best of his information and belief.

(3) The Collector shall verify the submitted online returns from the registers maintained under rule 4."

6. In, the said rules, for rule 6, the following shall be substituted, namely:-

" 6. *Proprietor to issue bills etc.*- Every Proprietor liable to collect and pay the tax, shall issue a bill or cash memorandum to every person in respect of any luxury provided in the Hotel to such person and shall specify in such bill on the top of the bill or cash memorandum, the Entertainment TIN number issued under the rule 2B(1), the license number, full name of hotel, charges for lodging recovered, the amount of tax recovered, name of the person from whom such charges or tax are recovered, and where the charges or tax are recovered in any foreign exchange the name of the currency."

Means a passage, channel or means of egress from any building, storey or floor area to a street or other open space of safety.

**a. Horizontal Exit**

Means an exit which is a protected opening through or around a fire wall or bridge connecting two or more buildings.(An arrangement which allows alternative egress from a floor area at or near the same level in an adjoining building or an adjoining part of the same building with adequate fire separation.)

**b. Outside Exit**

Means an exit from a building to a public way, to an open area leading to a public way or to an enclosed fire resistant passage leading to a public way.

c. Vertical Exit

Means an exit used for ascending or descending between two or more levels, including stairways, smoke-proof towers, ramps, escalators and fire escapes.

2.63. External Wall

Means an outer wall of a building not being a party wall even though adjoining a wall of another building and also means a wall abutting on an interior open space of any building.

2.64. Fabrication Workshop

Means a small establishment where a manufacturing process is carried on in which an item is made (fabricated) from raw or semi-finished materials instead of being assembled from ready-made components or parts.

2.65. Farm House

Means a plot of land including permissible construction in the area designated as agricultural use by the Competent Authority with a minimum land area of 4000sq.mts.

2.66. Fire Protection and Safety

1. Automatic Sprinkler System

Means a system of water pipes with sprinkler heads within a building designed to activate automatically by heat to control and extinguish a fire by discharge of water.

2. Combustible Material

Means a material which burns itself or adds heat to a fire when tested for non-combustion.

3. Down Comer

Means an arrangement of water pipes for firefighting within a building. It consists of pipes connected to an overhead tank and a terrace pump with air release valve at the terrace level and landing valves. It can be charged with water from ground level by fire brigade on their arrival by making connection via fire brigade inlets provided at the bottom of such down comer.

4. Dry Riser

Means an arrangement of water pipes for fire fighting within a building. It consists of vertical rising mains/pipes with landing valves. It can be charged with water from ground level by fire brigade on their arrival by making connection via fire brigade inlets provided at the bottom of such dry riser.

5. Fire Alarm System (also Emergency Alarm System)

Means an arrangement of call points or detectors, sounders and other equipment for the transmission and indication of alarm signals working automatically or manually in the event of fire.

6. Fire Lift

Means a lift installed to enable fire services personnel to reach different floors with minimum delay, equipped with all necessary features.

7. Fire Proof Door (also Fire Resistant Door)

Means a self-closing door or shutter fitted to a wall opening, and constructed and erected to check the transmission of heat and fire for a specified duration.

8. Fire Pump (also Fire Booster Pump)

Means a mechanical/ electrical device which boosts up the water pressure at the top level of a multi-storied building to supply high pressure water for firefighting system.

9. Fire Resistance

Means a property of an element of building construction to withstand fire related conditions for a stated period. It is measured by some or all of the following criteria:

- Resistance to collapse in case of fire (minimum 2 hours) Resistance to penetration of flame and hot gases
- Resistance to temperature rise on the unexposed face up to a maximum of 180°C and / or average temperature of 150°C

10. Fire Resistance Rating

Means the duration for which a passive fire protection system can withstand a standard fire resistance test.

11. Fire Separation

Means the distance in meters, measured from the relevant external wall of the building to the external wall of any other building on the site or from other site, or from the opposite side of the street or other public space for the purpose of preventing the spread of fire.

12. Fire Service Inlet

Means a connection provided at the base of a building for pumping up water through in-built fire-fighting arrangements by fire pumps.

13. Fire Stairs

A vertical enclosure, with a stairway, having the fire endurance rating required by code and used for egress and as a base for fire fighting.

14. Fire Stop

Means a fire resistant material, or construction having a fire resistance rating of not less than the separating elements, installed in concealed spaces or between structural elements of a building to prevent the spread/ propagation

of fire and smoke through walls, Horizontal and vertical Piping and cable ducts, ceilings and the like as per the laid down criteria and having fire resistance capacity of at least 2 hours

15. Fire Tower

Means an enclosed staircase which can only be approached from the various floors through landings or lobbies separated from both the floor area and the staircase by fire resistant doors and open to the outer air.

16. Pressurization

Means the establishment of a pressure difference across a barrier to protect a stairway, lobby, escape route, or room of a building from smoke penetration.

17. Smoke-Stop Door

Means a door for preventing or checking the spread of smoke from one area to another.

18. Venting Fire

Means the process of inducing heat and smoke to leave a building as quickly as possible by paths such that lateral spread of fire and heat is checked, firefighting operations are facilitated, and minimum damage is caused by fire.

19. Wet Riser

Means a fire fighting arrangement within the building provided by vertical rising pipes permanently charged with water from a pressurized supply.

---

2.67. Fitness Center

Means a health club (also known as a fitness club, fitness center, and commonly referred to as a gym) is a place which houses exercise equipment for the purpose of physical exercise.

2.68. Floor

Means the lower surface in a storey on which one normally walks in a building, and does not include a mezzanine floor. Ground Floor is the floor at ground level with a plinth- hollow or solid, and direct access to a street or open space. The floor above it with minimum permissible height shall be termed as floor 1, with the next higher floor being termed as floor 2, and so on upwards.

2.69. Floor Area

Means the net enclosed area of a floor in the building including circulation spaces like lobby or corridors, service areas and semi-open spaces such as verandah or balcony.

---

## 2.70. Floor Space Index

Means the quotient of the ratio of the combined gross built-up area of all floors, to the total area of the Building-unit.

$$\text{Floor Space Index} = \frac{\text{Total built-up area of all floors}}{\text{Area of the Building-unit}}$$

## 1. Permissible FSI

Means the basic FSI permitted by the Competent Authority as a matter of right.

## 2. Base FSI

Means the base FSI permitted in a Base Zone by the Competent Authority as a matter of right.

## 3. Chargeable FSI

Means the FSI available by payment

## 4. Maximum Permissible FSI

Means the maximum permissible FSI which includes permissible FSI and Chargeable FSI.

## 5. Utilised Chargeable FSI

Means the amount of FSI used, that is paid for and purchased by the applicant.

## 6. Total Utilised FSI

Means the total Utilized FSI

## 2.71. Footing

Means a foundation unit constructed in brick work, stone masonry or concrete under the base of a wall column for the purpose of distributing the load over a large area.

## 2.72. Foundation

Means the part of the structure which is in direct contact with and transmitting loads to the ground.

#### 2.73. Front

Means the main frontage of a Building-unit on the road-side. For Building-units abutting two or more roads, the side along the wider road shall be considered as the front.

#### 2.74. Fueling Station

Means a place for retail business engaged in supplying and dispensing of fuel products to consumers, essential for the normal operation of automobiles.

#### 2.75. Gamtal

Means all land that has been included by the Government/ Collector within the site of village, town or city on or before the date of declaration of intention to make a Town Planning Scheme or publication of Draft Development Plan-2021. ## 2.81. Grey Water

Means involving non-potable water from sinks, tubs, showers and washing.

## 2.82. Ground Coverage

Means the ground area covered by a building including cantilevered portion on any floor, excluding cut-out (open-to-sky) if any.

## 2.83. Ground Level

Means the level of the crown of the existing adjacent constructed road or the existing ground level or the high flood level, whichever is higher as may be decided by Competent Authority.

Note :- High flood level shall be decided by Competent Authority.

## 2.84. Guest House

Means a commercial establishment, typically larger than 'bed and breakfast' accommodation, offering facilities like lodging and meals.

## 2.85. Guiding Floor Material

Means flooring material used to give the directional effect or warn a person at critical places

and attract the attention of visually impaired persons. The material may be guiding by colour and brightness that is conspicuously different from that of the surrounding floor material or by texture that emits different sounds.

#### 2.86. Habitable Room

Means a room occupied or designed for occupancy for human habitation and uses incidental thereto, including a kitchen if used as a living room, but excluding a bath-room, water closet compartment, laundry, serving and storing, pantry, corridor, cellar, attic, store-room, pooja-room and spaces not frequently used.

#### 2.87. Hazardous Building or Industry

Means a building or place or part thereof used for-

- (i) storage, handling, manufacture or processing of radio-active substances or of highly combustible or explosive materials or products which are liable to burn with extreme rapidity and/or producing poisonous fumes.
- (ii) storage, handling, manufacture or processing of, which involves highly corrosive, toxic obnoxious alkalis, acids, or a other liquids, gases or chemicals producing flame, fumes, and explosive mixtures or which result in division of matter into fine particles and capable of spontaneous ignition.

#### 2.88. Hazardous Material

Means any of the following materials: Radioactive substances, Inflammable, combustible or explosive materials that may produce poisonous fumes or explosions on storage, handling, processing or manufacturing. Corrosive, toxic, obnoxious alkalis or acids, Chemicals which may produce irritant, corrosive or poisonous gases on explosion or spontaneous combustion.

#### 2.89. Height of Building

Means the vertical distance measured from the average ground level/ high flood level/plot level and up to the top of the finished level of the top most floor slab or in case of flat roofs up to the midpoint of the height of the sloping roof excluding the genuine stair cabin, water tank, and lift room. The height of the sloping roof shall be taken as an average height of the relevant floor.

#### 2.90. Height of a Room

Height of a Room means the vertical distance measured from the finished floor surface to the finished floor

surface of the upper floor. The height of a room with a pitched roof means the average height between the finished floor surface and the bottom of the eaves and the bottom of the ridge.

2.91. Hollow Plinth

Refer Plinth

2.92. Hospital

Means an institution that provides medical, surgical, or psychiatric care and treatment for the sick or the injured.

2.93. Hostel

---

An establishment that provides inexpensive food and lodging for a specific group of people, such as students, working women.

In cases where development has already started/commenced on site without obtaining Development Permission, but where this development is in accordance with these Regulations, the Competent Authority may grant Development Permission on the merits of each individual case. Such development will be ~~considered~~ unauthorised and over and above the Development Permission ~~existing fees as in force~~ and stipulated in Schedule 3, penalty shall be charged as per Schedule 6.

### 3.8. Procedures for Obtaining, Revising and Revalidating a Development Permission

#### 3.8.1. Obtaining a Development Permission

On receipt of a duly completed application for Development Permission, the Competent Authority shall scrutinize the application in detail before grant of Development Permission, to verify whether the design and specifications of the proposed building comply with these Regulations.

The procedure for obtaining a Development Permission is specified in Regulation No. 5.1.

#### 3.8.2. Revising a Development Permission

Changes or revisions in the sanctioned design and specification of a building may be made if a Revised Development Permission is obtained before construction is undertaken on the portion of the building that deviates from the Sanctioned Design Requirements.

Revision of Development Permission shall be mandatory in the following conditions:

1. Change in Ownership
2. Increase in utilised FSI
3. Reduction in Parking area
4. Change in Orientation of the Building
5. Change in size or location of the Common Plot
6. Change in use of Building or part thereof

For any of the above mentioned changes in a building during the course of construction, the owner should apply for a Revised Development Permission for the Building-unit or part of Building-unit as the case may be. The modified Development Requirements may be examined by the Competent Authority for ensuring compliance of the building to these Development Regulations. No deviations in contravention of the provisions of the act, and/or these regulations shall be permitted.

Procedures for obtaining a Revised Development Permission are specified in Regulation No. 5.2.

### 3.8.3. Revalidating a Development Permission

A Development Permission may be revalidated provided procedural requirements for revalidating a Development Permission are met with.

A Development Permission that may lapse due to non-commencement of work, may be revalidated for a period of one year. The revalidated period shall in no case exceed three years in the aggregate that is for a total period of four years. The period of validity shall begin from the date of commencement certificate/ development permission.

The procedures for revalidating a Development Permission are specified in Regulation No. 5.3.

### 3.9. Building Use Permission Required

It is mandatory to obtain a Building Use Permission from the Competent Authority prior to occupancy or use being made of any building.

### 3.10. "Grant of Building Use Permission"

Grant of a Building Use Permission by the Competent Authority shall mean an acceptance that the construction of the building has conformed to the sanctioned design requirements as per Regulation 3.4 and that the Owner may use the building in conformity with the Sanctioned Use of the building. Grant of a Building Use Permission does not constitute acceptance of correctness, confirmation, approval or endorsement of and shall not bind or render the Competent Authority liable in any way in regard to:

- (a) Title, ownership, and easement rights of the plot on which building is proposed
- (b) Workmanship, soundness of material and structural safety of the building
- (c) Variation in area from recorded areas of a Building-unit

- (d) Location and boundary of building-unit
- (e) Safety of the users of the building
- (f) NOC from Appropriate Authority
- (g) Structural reports and structural drawings

### 3.11. "Revocation of Building Use Permission"

Revocation of a Building Use Permission shall mean that the Building Use Permission is no longer valid and that the Competent Authority has withdrawn the permission granted to make use of the building.

After the Revocation of a Building Use Permission, use may no longer be made of the building for which the Building Use Permission has been revoked. Notice of Revocation of a Building Use Permission shall be issued in writing.

### 3.12. Unauthorized Use of Building

Use of any building or part of a building, without a Building Use Permission or in a manner that does not conform with its Sanctioned Use or after a Building Use Permission has been revoked, shall be deemed to be Unauthorized Use of Building.

The Competent Authority may declare the use of any building to be an Unauthorized Use if it deems the building to be unsafe for habitation or if its use poses a danger to public health or safety.

#### 3.12.1 Dealing with Unauthorized Use of Building and Unsafe Buildings

If the Competent Authority deems the use of any building or part of a building to be an Unauthorized Use of Building, it shall, by a written notice, communicate the reason and require the person making unauthorised use of building to stop the same. This written notice may be affixed to any part of the premise and shall be deemed a sufficient intimation to the occupier of such building or part of building.

If unauthorised use is not stopped, the Competent Authority may direct the person making such use to be removed from the building and may cause such necessary measures including police intervention to be taken to ensure that the person does not re-enter the building without written permission of the Competent Authority. The owner or occupier may be directed to restore by repairs, demolish or carry out any other modifications. The cost(s) of undertaking these measures shall be paid by the said person.

If a use of a building or part of a building is deemed to be Unauthorized Use solely on account of a Building Use Permission not having being obtained prior to use being made of the building or part of a building and if the said use of building is in conformity with Development Regulations prescribed in respective competent authority General Development Control Regulations, the Owner may apply for a Building Use Permission. Further use of building or part of a building may be

undertaken after obtaining a valid Building Use Permission. Penalty for undertaking such Unauthorized Use of building or part of a building shall be payable before a Building Use Permission is granted and is stipulated in Schedule 15.

### 3.13. Procedure for Obtaining Building Use Permission

#### 3.13.1 Building Use Permission

The Competent Authority, on receipt of Notice of Completion of Construction and a duly completed application for Building Use Permission, shall inspect the constructed building before granting a Building Use Permission, to verify its compliance to the sanctioned design and specifications within 21 days from the date of receipt of the application.

#### 3.13.2 Permission to Change a Sanctioned Use of a Building

No building or premises shall be changed or converted to a use other than the sanctioned use without prior permission of the Authority in writing. Change of use not in conformity with these regulations shall not be permissible.

The Sanctioned Use of a building may be changed provided that the new use complies with these regulations. The procedure for changing the Sanctioned Use of a building or part of a building is specified in Regulation No. 7.2.

### 3.14. Relaxation

#### 3.14.1 "Grant of Relaxation"

Grant of a Relaxation shall mean grant of permission to deviate from a specific Regulation.

1. In the case of Building-unit/plot owned by:

- i. competent authority;
- ii. Government;
- iii. Government undertakings;

Competent Authority may for reasons to be recorded in writing relax or waive any of the regulations in the public interest. Provided that no relaxation or waive of any of the development regulations concerning maximum built-up-area on any floor, common plot, common open plot, marginal open space, F.S.I., parking and provisions of buildings taller than 15mts shall be made.

2. Notwithstanding anything contained in foregoing regulations in case where these regulations cause hardships to the owners because of their application to the alterations not involving addition to the existing structures erected prior to the coming into force of these regulations, the competent authority after considering the merits of each individual case

may relax or waive, for reasons to be recorded in writing and regulation without causing any adverse effects on the fire and structural safety requirements for the buildings. Provided that this relaxation shall not be made in any regulations for buildings taller than 15mts.

3. In the case of existing Building-units for which the layout and sub-division may have been approved by a Competent Authority; or Building-units affected by road widening; and by the Development Plan proposals made in the Development Plan, if the Competent Authority is of the opinion that such Building-units have become incapable of reasonable development unless all or any of the requirements of Planning Regulations are suitably relaxed or waived the Competent Authority may, for reasons to be recorded in writing, relax the requirement of the above mentioned regulations.
4. No relaxation in FSI shall be made in any of the regulations meant for any Building-unit having height more than 15mts. Irrespective of provisions made above, in case of development for religious building, e.g. temple, church, mosque, *agari* etc. up to 0.6 FSI only.

### 3.15. Competent Authority to Clarify and Interpret Provisions of the Regulations

Competent Authority shall clarify or interpret provisions of these Regulations, as specified below. Clarifications or interpretations made by the Competent Authority shall be final and binding.

1. Decide on matters where it is alleged that there is an error in any order, requirement, decision or determination made by any Competent Authority under delegation of powers in Regulations or Interpretation in the application of these Regulations.
2. Interpretation of road alignment as per site situation.
3. Authorize the erection of a building or the use of premises for a public service undertaking for public utility purposes only, where he/she finds such an authorization to be reasonably necessary for the public convenience and welfare, even if it is not permitted in any land use classification.
4. In specific cases where a clearly demonstrable hardship is caused, the Competent Authority may, for reasons to be recorded in writing by special permission, permit any of the dimensions prescribed in these Regulations to be modified, except those relating to Floor Space Indices unless otherwise permitted under these regulations, provided that the relaxation shall not affect the health, safety, fire safety, structural safety and public safety of the inhabitants of the building and its neighbourhood.

### 3.16. Development Undertaken on Behalf of Government and Appropriate Authority

Where an appropriate authority intends to carry out development of land for its own purpose in the exercise of its powers under any law for the time being in force, such development shall be in conformity with the development plan and of the regulations relating to construction of buildings.

As per the provisions of Section 39 of the Act and Rule 15 of the Rules, the Office-in-Charge of a

Government Department shall inform in writing to the Competent Authority of the intention to carry out development for its purpose along with such development or construction along with other required documents and drawings as stipulated in Schedule 21.

### 3.17. Penalties

Any person contravening any of the Regulations or Provisions of the Development Plan shall on such contravention be liable to a punishment as provided in the Gujarat Town Planning & Urban Development Act-1976 and Rules framed there under as in force from time to time.

## 5. PROCEDURE FOR OBTAINING, REVISING AND REVALIDATING A DEVELOPMENT PERMISSION

---

### 5.1. Obtaining a Development Permission

#### 5.1.1 Application

Application for Development Permission shall be made by the Owner of the Building units/land on which the building is proposed in the format prescribed in:

Form No. 5 for Buildings, and for Sub-division and Amalgamation and Form No. 5A for Brick Kiln, Mining and Quarrying

#### 5.1.2 Scrutiny Fees

Scrutiny Fees and other charges for obtaining a Development Permission shall be determined by the Competent Authority and are listed in Schedule 3.

---

#### 5.1.3 Drawings, Specifications and Documents

Drawings, specifications and documents to be submitted along with Application for Obtaining a Development Permission shall be determined by the Competent Authority and are listed in: Schedule 4a for Building, Schedule 4b for Sub-division and Amalgamation and Schedule 4c for Brick Kiln, Mining and Quarrying. The format for submission of drawings, specifications and documents is specified in Schedule 5.

#### 5.1.4 Scrutiny of Application

On receipt of the application for Development Permission, the Competent Authority shall undertake scrutiny of the Application for Development Permission and communicate to the applicant.

Lack of compliance with Development Regulations and/or queries pertaining to the Building-unit shall be communicated.

Acceptance or rejection of compliant modifications in the design and specifications of the proposed building and responses to queries shall be communicated. Acceptance or rejection of further compliant modifications in the application and responses to queries shall also be communicated.

#### 5.1.5 Grant or Refusal of a Development Permission

Development Permission shall be granted to the applicant when the Competent Authority is satisfied that the design and specification of the proposed building comply with the Development Regulations. On receipt of the application for Development Permission, the Competent Authority may grant or refuse permission to the applicant, as per the provisions of the Act within ninety days from the date of payment of the Scrutiny fees. The permission may be granted with or without conditions or subject to any general or special orders made by the State Government in this behalf.

The Development Permission shall be in the format of Form No.7 and it shall be issued by an officer authorised by the Competent Authority in this behalf. Reasons for rejection of application shall be communicated to the applicant.

In cases where the building design requirements are as per regulations but the co owner of the property or Chairman/Secretary of the Cooperative Society are not giving consent at the time of

---

development permission, the Competent Authority may issue permission after giving opportunity of hearing to the co owner of the property or Chairman/Secretary of the Cooperative Society considering the merits and demerits of individual case.

#### **5.1.6 Penalties**

Penalties for not complying with Regulation No. 5.1 are stipulated in Schedule 6.

### **5.2. Revising a Development Permission**

#### **5.2.1 Application**

Application for Revising a Development Permission shall be made by the Owner or Developer of the Building-unit, in the format prescribed in Form No.8.

#### **5.2.2 Fees**

Development Permission Fees and other charges for revising a Development Permission shall be determined by the Competent Authority and are listed in Schedule 3.

#### **5.2.3 Drawings, Specifications and Documents**

Drawings, specifications and documents to be submitted along with Application for Revising a Development Permission shall be determined by the Competent Authority and are listed in Schedule 4a, 4b and 4c for the respective uses. The format for submission of drawings, specifications and documents is specified in Schedule 5.

#### **5.2.4 Scrutiny of Application**

The Competent Authority shall undertake scrutiny of the Application for Revising a Development Permission.

Lack of compliance with Development Regulations and/or queries pertaining to the Building-unit shall be communicated. Acceptance or rejection of compliant modifications in the application, modifications made in the design and specifications of the proposed building and responses to queries shall be communicated. Acceptance or rejection of further compliant modifications in the application and responses to queries shall also be communicated.

#### **5.2.5 Grant or Refusal of a Revised Development Permission**

A Revised Development Permission in the format prescribed in Form No. 7 shall be issued to the applicant when the Competent Authority is satisfied that the design and specification of the proposed Building-unit comply with Development Regulations. Reasons for rejection of application shall be communicated to the applicant.

#### **5.2.6 Penalties**

Penalties for not complying with Regulation No. 5.2 are stipulated in Schedule 6.

### **5.3. Revalidating a Development Permission**

#### **5.3.1 Application**

Application for Revalidating a Development Permission shall be made by the Owner or Developer of the building, before the expiry of the Development Permission. The revalidated period shall in no case exceed three years in the aggregate that is for a total period of four years.

Lapsed Development Permission may be revalidated after the expiry of the original Development

Permission, within a period of six months, with payment of penalty charges.

Revalidation of a Lapsed Development Permission after one and half year from the issue of the original Development Permission shall not be permitted. New application for Development Permission shall have to be made.

#### **5.3.2 Fees**

Development Permission Revalidation Fees for revalidating a Development Permission shall be determined by the Competent Authority and are listed in Schedule 9.

For revalidating a lapsed Development Permission, penalty charges shall be applicable and are listed in Schedule 9.

#### **5.3.3 Documents**

Documents to be submitted along with Application for Revalidating a Development Permission shall be determined by the Competent Authority and are listed in Schedule 10. The format for submission of documents is specified in Schedule 5.

#### **5.3.4 Scrutiny of Application**

The Competent Authority shall undertake scrutiny of the Application for Revalidating a Development Permission, in context of proposals of Draft Development Plan-2021, and communicate queries pertaining to the application.

Acceptance or rejection of responses to queries shall be communicated to the applicant.

#### **5.3.5 Grant or Refusal of a Revalidated Development Permission**

A Revalidated Development Permission in the format prescribed in Form No. 7 shall be issued to the applicant when the Competent Authority is satisfied that the design and specification of the proposed development comply with the Development Regulations. Reasons for grant or refusal of Revalidating a Development Permission shall be communicated to the applicant.

In case of any change to the Building-unit which affects the approved layout or building blocks, Development Permission may not be revalidated. New application for Development Permission shall have to be made.

#### **5.3.6 Penalties**

Penalties for not complying with Regulation No. 5.3 are stipulated in Schedule 6.

### **5.4. Common Protocol**

For Facilitation to investor under Investment Facilitation Portal (IFP) following procedure must be adopted by competent authority where ever procedure is narrated in this document.

1. Competent Authority must made all procedure, protocols and checklist available online.
2. Application received online by competent authority and Investor Facilitation Portal
3. Compliance at any time shall be available online on competent authority website and Investor Facilitation Portal
4. Competent Authority must display the grant of permission or rejection or suspension online in public domain on Competent authority website and Investor Facilitation Portal at time new permission ,renewal and revalidation of application.
5. Inspected report of each time must be online on respective website and Investor Facilitation Portal

by competent authority within 48 hrs.

6. Competent authority allocates the inspector randomly and it must be on computerize.
7. Integrate the payment gateway online.
8. For any development permission, if site inspection is required for different purposes, all the officers or the inspectors required, to carry out inspections shall visit jointly on a prescribed date. The competent authority shall ensure that such date of joint inspection is communicated to applicant at least three days in advance and also ensure that the inspectors carry out the inspection on specified date.
9. Interchange Fee:

## 6. PROCEDURE DURING CONSTRUCTION

---

### 6.1. Inspection of Construction

#### 6.1.1 Inspection of Construction at Any Time

All buildings for which Development Permission is required are subject to inspection by the Competent Authority and the Competent Authority reserves the right to inspect such buildings at any time during the Period of Construction without giving prior notice of its intention to do so. Owner of the Building-unit and/or any person undertaking construction shall Permission authorized officers of the Competent Authority to enter the Building-unit and inspect the building for the purpose of enforcing these Regulations.

#### 6.1.2 Inspection where Development Permission is Granted

All buildings for which Development Permission has been granted shall be subject to periodic inspection by the Competent Authority during construction. It shall be the responsibility of the Owner, the Architect on Record or Engineer on Record, and the Clerk of Works on Record for the building to report commencement, progress at various stages, and completion of construction to the Competent Authority as specified in Regulation No. 6.5.

#### 6.1.3 Inspection for Fire Safety and Protection of Building under Construction

For buildings listed in Schedule 23, the Chief Fire Officer (CFO) shall carry out inspections at appropriate intervals, to ensure that the fire protection requirements and measures for such building under construction are adequate and operational. CFO shall also satisfy himself that all elevators including fire lifts are duly tested and their test certificates are submitted to his satisfaction. If the above work is entrusted to a registered Fire Protection Consultant on Record, his reports shall be countersigned by the Chief Fire Officer.

In case of inadequacy of these Regulations, he shall issue a notice to the owner or occupier of such building directing him to rectify the shortcomings/ contraventions within a specified period. Copies of all such notices shall be endorsed by the Competent Authority also.

### 6.2. Information to be Prominently Displayed on Site

It shall be the responsibility of the Clerk of Works on Record and the Owner to erect a notice board on the Building-unit displaying key information pertaining to the building. The notice board should be prominently visible, easily readable and should be located next to the primary access to the plot. The notice board/s should be maintained for the entire Period of Construction up to issue or grant of Building Use Permission. Failure to comply with this Regulation may result in revocation of the Development Permission. The information to be displayed is specified in Schedule 11.

### 6.3. Documents and Drawings to be Maintained on Site

It shall be the responsibility of the Clerk of Works on Record and the Owner for the building to keep all the documents and drawings listed in Schedule 12 on the site; at all times after issuing Notice of Commencement of Construction to the Competent Authority up to the issue or grant of

---

**Building Use Permission.** These documents should be made available to any authorised officer of the Competent Authority inspecting the site for the purpose of enforcing these Regulations. Failure to comply with this Regulation may result in revocation of the Development Permission.

#### 6.4. Reducing Inconvenience and Ensuring Safety during Construction

##### 6.4.1 Stacking, Storing and Disposal of Building Material

It shall be the responsibility of the Clerk of Works on Record for the Building and the Owner or Developer to ensure that no building material, building equipment or building debris is stacked, stored, left or disposed off outside the Building-unit for which Development Permission has been granted, on any public street or space.

It shall be the responsibility of the Architect on Record or Engineer on Record and Clerk of Works on Record to convince the Competent Authority of adequacy of additional barricading and safety measures that shall be taken to ensure public safety and reduce public inconvenience.

##### 6.4.2 No Damage or Undue Inconvenience during Construction

It shall be the responsibility of the Clerk of Works on Record and the Owner or Developer to undertake all necessary measures to ensure that no damage is caused to adjoining properties due to construction. It shall also be the responsibility of the Clerk of Works on Record and the Owner or Developer to undertake all necessary measures to ensure that no undue inconvenience is caused to the public, due to factors such as noise, dust, smell or vibrations. It shall also be the responsibility of the Clerk of Works on Record and the Owner or Developer to undertake all necessary measures to ensure that traffic is not disrupted due to construction.

##### 6.4.3 Liability for Ensuring Safety during Construction

The Owner or Developer and the Clerk of Works on Record shall be responsible for ensuring that all necessary measures for safety for all are taken on site. Grant of Development Permission, grant of Building Use Permission for part of a building, or issuing of any instructions to ensure public safety or reduce inconvenience, does not render the Competent Authority liable for any injury, damage or loss whatsoever that may be caused to any one in or around the area during the Period of Construction.

#### 6.5. Progress of Construction and Inspection - Development Permission

##### 6.5.1 Notice for Commencement of Construction

The Owner and the Architect on Record for the building shall notify the Competent Authority their intention to commence construction at least 7 working days prior to commencing construction by filing a Notice of Commencement of Construction, in the format prescribed in Form No. 10. Failure to notify the Competent Authority before commencing construction may result in lapse of the Development Permission.

A set of detailed working drawings including structural details based on approved building plans shall be submitted along with the Form. In the case of individual residential buildings up to G+2 on a plot not more than 500 sq.mts in size, the Competent Authority shall not enforce, on request of the owner/developer, to submit such details.

The Notice of Progress of Construction shall not be necessary in the following cases:

- i) Alteration in Building not involving the structural part of the building.

- ii) Extension of existing residential building on the ground floor up to maximum area of 40 sq.mts.

On receipt of the Notice of Progress of Construction from the owner or developer, it shall be the duty of the Competent Authority, if found necessary, to check any deviation from the sanctioned plan and convey decision within 7 days to the owner or developer accordingly for compliance.

**6.5.2 Development Permission may Lapse if Construction Not Commenced on Time**

If the Competent Authority is not informed of commencement of work on a proposed building within twelve months of grant of Development Permission, the Development Permission shall lapse. Application for revalidation of Development Permission should be made within twelve months of grant of Development Permission. The extended period shall in no case exceed three years in the aggregate that is for a total period of four years.

Procedure for obtaining a Revalidated Development Permission is specified in Regulation No.

5.3.

**6.5.3 Competent Authority to be Notified of Progress of Construction**

The Owner or Developer and the Architect on Record or Engineer on Record shall be responsible for notifying the Competent Authority of progress of construction having been completed up to the stages stipulated in Schedule 13. Notice of Progress of Construction shall be made in the format prescribed in Form No. 11 and approved by the Persons on Record.

**6.6. RISK BASED CHECKS INSPECTIONS**

The competent authority shall carryout the checking of the development permission application and the site inspection based on the consequence class specified.

**6.6.1. consequences class.**

Any development carried out by the owner or the developer attracts risk during the design and construction. Risk is defined, in the context of construction stages, as the likelihood of non-compliance with building regulations and the potential extent of harm to current and future users of building and the environment associated with non-compliance. The competent authority can, based on the extent carry out inspections based on the consequences class.

**6.6.2. Principles of Risk Categorization**

The different Consequences Classes is specified Table 6.1: Principles of Risk Categorization (Definition of Consequence Class)

**6.6.3. classification of the buildings & Control at the Design Stage (Design Supervision Levels, or DSL)**

Based on the classification of the buildings specified in Table 6.2 the persons on record (POR) shall carryout the design supervision and the checks as specified in Table 6.2: Control at the Design Stage (Design Supervision Levels, or DSL)

**6.6.4. Design Supervision Levels, or DSL**

The competent authority shall as carryout the inspection and other requirements as specified in Table 6.2: Control at the Design Stage (Design Supervision Levels, or DSL)

## 7. PROCEDURE FOR OBTAINING A BUILDING USE PERMISSION

### 7.1. Obtaining Building Use Permission

#### 7.1.1 Notice of Completion of Construction and Building Use Permission

The Owner and the Architect on Record for the building shall be responsible for notifying the Competent Authority of completion of construction and for certifying that the construction complies with the sanctioned design and specifications. Notice of Completion of Construction and Compliance Certification shall be made in the format prescribed in Form No. 12, and shall be accompanied by documents and drawings as prescribed by the Competent Authority in Schedule 14. The format for submission of drawings, specifications and documents is specified in Schedule 5.

Subsequent to notifying the Competent Authority about the completion of construction in compliance to the regulations, application for Building Use Permission may be made to the Competent Authority in the format stipulated in Form No. 13.

#### 7.1.2 Fees

Building Use Permission Fees shall be determined by the Competent Authority and are listed in Schedule 15. It shall be the responsibility of the Owner to deposit Building Use Permission Fees with the Competent Authority along with the Application for Obtaining a Building Use Permission.

#### 7.1.3 Final Inspection

Following receipt of the Notice of Completion of Construction and Compliance Certification, the Competent Authority shall undertake final inspection of construction for ensuring compliance to sanctioned design, specifications and other aspects of the building as stated in Schedule 22. The Competent Authority shall inform the applicant within 21 days of receipt of Notice of Completion of Construction.

If, on inspection, the Competent Authority is satisfied that the construction of the building complies with the sanctioned design and specifications, it shall grant a Building Use Permission.

If the construction is found not to comply with sanctioned design and specifications, the Competent Authority shall communicate queries regarding the construction and/or directions to ensure compliance to the Owner and the Architect on Record or Engineer on Record. Failure to comply with directions, as may be issued by the Competent Authority, may result in revocation of the Development Permission. The Architect on Record or Engineer on Record shall respond to queries and notify the Competent Authority of having undertaken compliant modifications.

#### 7.1.4 Grant / Refusal of Building Use Permission

The final inspection of the work and communication of the decision about the grant of the Building Use Permission shall be made by the concerned Competent Authority within 21 days from the date of receipt of Notice of Completion of Construction and Compliance Certification. If the Competent Authority is satisfied that the construction of the building complies with the sanctioned design and specifications and other requirements as per Schedule 22, it shall grant a Building Use Permission in the format stipulated in Form No. 14. Reasons for grant/refusal of Building Use Permission shall be communicated to the applicant.

In cases where the building construction is as per regulations but the Owner of the adjoining Building or Chairman/Secretary of the Cooperative Society are not giving consent at the time of Building Use permission, the Competent Authority may issue permission after giving opportunity

of hearing to the Owner of the adjoining Building or Chairman/Secretary of the Cooperative Society considering the merits and demerits of individual case.

#### **7.1.5 Penalties**

Penalties for not complying with Regulation No. 7.1 are stipulated in Schedule 16.

### **7.2. Obtaining Permission to Change Sanctioned Use of Building**

#### **7.2.1 Application**

Application for obtaining Permission to Change Sanctioned Use of Building shall be made by the Owner, for which a change in use is proposed and the Persons on Record, in the format prescribed in Form No. 13.

#### **7.2.2 Drawings, Specifications and Documents**

Drawings, specifications and documents to be submitted along with Application for Permission to Change Sanctioned Use of Building are listed in Schedule 14. The format for submission of drawings, specifications and documents is specified in Schedule 5 and Schedule 22.

#### **7.2.3 Fees**

Fees and other charges for obtaining Permission to Change Sanctioned Use of Building are listed in Schedule 15.

#### **7.2.4 Scrutiny of Application**

The Competent Authority shall undertake scrutiny of the Application to Change Sanctioned Use of Building. Lack of compliance with Development Regulations and/or queries pertaining to the application shall be communicated. #### Gujarat Essential Services Maintenance Act, 1972.

No. GST/06/2016/GSW/112016/ESMA/IT : Whereas, the Government of Gujarat is of the opinion that strike in all employment in relation to the working of State Data Centre or the working of Gujarat State Wide Area Network would pre-judicially affect the maintenance of both intranet as well as the internet services at various offices under the Government of Gujarat, and would in turn pre-judicially affect or disrupt the access to various e-governance applications which provide services to the citizens and which facilitate transacting of Government business, and that such a strike would in turn result in grave hardship to the community and citizens of the State for lack of access to the service delivery infrastructure from the State Government;

Now therefore, in exercise of the powers conferred by sub-clause (ii) of clause (a) of sub-section (i) of section 2 of the Gujarat Essential Services Maintenance Act, 1972 (the Gujarat 23 of 1972), the Government of Gujarat hereby declares all employment – whether direct or contractual, or as a representative of an outsource agency to whom service responsibilities have been outsourced – in the State Data Centre as well as in relation to the functioning, operation and maintenance of the Gujarat State Wide Area Network (GSWAN), to be an essential service for purposes of the said Act.

**(B) For Management seats:** (1) For the MBBS and BDS courses, the merit list of the candidates who have applied in the prescribed form, within prescribed time and who are found eligible under these rules shall be prepared by the consortium in the order of percentile obtained by the candidates in the NEET conducted for the current academic year:

Provided that for management seats of courses other than those mentioned above, merit list shall be prepared on the basis of inter se merit.

(2) In case of equivalence of percentile, criterion mentioned in clause (3) of sub-rule (A) of this rule shall be used to prepare merit list.

## 12. Admission Procedure-

(1) **(A) Admission to the Government seats** shall be given in the following manner, namely:-

- (i) All the applications duly received shall be scrutinized by the Admission Committee in accordance with the provisions of these rules and the admission committee shall prepare merit list of the eligible candidates who have applied under rule 9 and sub rule (A) of rule 11.
- (ii) The merit list shall be displayed on its official website and by such other means, as the Committee may consider necessary.
- (iii) The Admission Committee shall publish the admission programme, by an advertisement in the prominent newspapers widely circulated in the State and by such other means as the Committee may consider convenient. The candidate shall obtain call letter from official website of committee with the help of his GUJCET number or merit number.
- (iv) The candidate whose name appears in the merit list shall have to remain present personally for counseling for the purpose of admission at the scheduled date, time and place.
- (v) A candidate seeking admission to the professional medical educational course shall be required to produce a Certificate of physical fitness to undergo such course in the prescribed form obtained from a registered medical practitioner along with the undertaking. The candidate shall submit the certificate to the Dean/Principal of the respective College or institution, at the time of joining where he has been offered admission. The admission of a candidate shall be confirmed subject to the production of certificate of his physical fitness.
- (vi) In case the candidate is unable to remain present personally, on the date, time and place of counseling, due to serious illness, accident or unavoidable circumstances, his parents or guardian shall, after obtaining prior approval of the Admission Committee or any officer authorized by the Committee, remain present on the scheduled date, time and place. An authority letter signed by the parents and candidate showing his order of preference and choice of branches and Colleges or Institutions shall have to be produced by the parents or

guardian who remain present in his behalf, along with the documentary evidence showing reason for the absence or inability of the candidate to remain present personally;

- (vii) After getting admission the candidate shall report, within a stipulated time period declared by the admission committee to his respective College or Institution with certificate of physical fitness. In case the candidate fails to get himself registered, within the time limit, the admission granted shall be liable to be cancelled;
- (viii) In case the candidate fails to get himself registered, within the time limit due to unavoidable circumstances, the candidate shall, after obtaining prior approval of the Admission Committee or any officer authorized by the Committee within three days after the expiry of the time limit, produce documentary evidence showing reason for such failure. If the Admission Committee is satisfied, it may grant him further period of not more than three days to; report to the College or Institution for the purpose of joining;
- (ix) In case the candidate does not remain present for counseling for the purpose of admission at the scheduled date and time and approaches the Admission Committee on later date, with an application in writing, to allow him for admission, he may be permitted for counseling and granted admission, in the branch, College or Institution and in the respective category available at such later date. He shall have no right to claim for the admission in the branch, College or Institution in the respective category available on the scheduled date and time;
- (x) The candidate belonging to reserved category may be allowed to remain present at the scheduled date and time of counseling for admission of the candidates of unreserved category, as per his merit number in the unreserved category. The admission shall be granted to such candidate in unreserved category, only if he is eligible to get admission, in the higher order of preference of courses than that in the reserved category;
- (xi) In case, where considerable number of seats fall vacant, and it appears to the Admission Committee to fill such vacant seats, it may conduct the admission process for readjustment (reshuffling) of seats for higher options than the options available to the candidate during the previous counseling. In such readjustment (reshuffling) of seats, the candidate who opts for the available higher option, he shall be allowed admission on such higher available option. The candidate who does not remain present during the readjustment (reshuffling) process, the admission granted to such candidate during previous counseling shall continue;
- (xii) The Admission Committee shall, by advertisement in the prominent newspapers widely circulated in the State, and by such other means, as the Committee may consider necessary, publish the date of subsequent counseling or readjustment (reshuffling) instead of sending individual call letters to the candidates. The candidate shall require to remain present on scheduled date, time and place as published in the public advertisement in leading daily news papers of the State. The candidate who fails to remain present on the scheduled date and time for readjustment (reshuffling) either in person or by a duly authorized representative and does not pay the fees on the same day shall be deemed to have forfeited his claim for admission in that reshuffling;

**(B) Admission to Management seats:** Admission to management seats shall be given in the following manner, namely:-

- (i) All the applications duly received shall be scrutinized by the Consortium in accordance with the provisions of these rules and prepare a merit list of the candidates who are found eligible for admission. The merit list so prepared shall require approval of the Admission Committee.
- (ii) The merit list shall be displayed, on the notice board of the office of the consortium and college or Institution which are members of the consortium, its official *website* and by such other means.
- (iii) The Consortium shall publish the admission programme, by an advertisement in the prominent newspapers widely circulated in the State, and by such other means, as it consider necessary. The candidates shall also be informed separately and individually of their merit rank and the date and time of counseling.
- (iv) The candidates whose name appear in the merit list shall require to remain present personally for counseling for the purpose of admission at the scheduled date, time and place.

- (v) The admission process shall be carried out under the supervision and control of the Admission Committee.
  - (vi) In case the candidate who does not remain present for counseling for the purpose of admission at the scheduled date and time either in person or by a duly authorized representative and do not pay the fees on the same day shall be deemed to have forfeited his claim for admission in that counseling.
- (2) (a) The candidate seeking admission on local quota seats of NHLMMC, Ahmedabad or SMIMER, Surat shall require to obtain the certificate of local candidate from the Dean's of NHLMMC, Ahmedabad or, as the case may be, from SMIMER, Surat and shall attach the certificate with the application.
- (b) The candidates seeking admission on local quota seats of NHLMMC, Ahmedabad or SMIMER, Surat shall be considered first for the admission to the available local quota seats of NHLMMC, Ahmedabad or SMIMER, Surat as the case may be and thereafter they shall be considered for admission on the seats of other than local quota of the same institute.
- (3) The candidate shall require to produce the original certificates for verification before the Admission Committee or, as the case may be, the Consortium, at the time of counseling.
- (4) If any difficulty or question arises as to the implementation of the provisions of this rule, the decision of the Admission Committee shall be final.
- 13. No Admission on Vacant Seats After Specific Date :-**
- Admission shall be granted in any professional medical educational colleges or institutions on or before the date specified by concerned council or university as the case may be for the concerned admission year. No admission shall be granted on the vacant seats after the said date.
- 14. Correction of Marks :-**
- (1) In case of change in marks of a candidate in the qualifying examination, such candidate shall produce a letter to that effect or the corrected mark sheet issued by the Board, before the Admission Committee at least one day before the commencement of admission process (counseling programme) but not later than seven days from the receipt of letter, or as the case may be, corrected mark-sheet. In such case he shall be placed at an appropriate order in the merit list.
- (2) The candidate who was declared failed initially in the qualifying examination, but later on declared passed after rechecking of marks by the Board, such candidate shall be allowed to apply for the admission before the commencement of admission process, provided he produces a letter to that effect or the corrected mark sheet issued by the Board, within seven days of the receipt of letter, or as the case may be, corrected mark-sheet.
- 15. Fee:- (A) For Government seats:**
- (1) A candidate who gets admission shall, at the time of admission, pay such fee as may be determined by the Fee Regulatory Committee, constituted under Section 9 of the Act.
- (2) In case the candidate who having paid the fees after getting admission, gets his admission cancelled and that the seat vacated by him is filled by another candidate, then such candidate shall be paid back the fees paid by him after the completion of admission process.
- (3) In case the candidate who having paid the fees after getting admission and gets his admission changed in another course or College or Institution in the readjustment (reshuffling) process, the difference of fees, if any, shall be payable by the candidate at the time getting admission in the readjustment (reshuffling), or as the case may be, shall be refunded to him after the completion of admission process.
- (B) For management seat:** (1) A candidate who gets admission shall, at the time of admission, pay such fees as may be determined by Fee regulatory committee, constituted under section 9 of the Act.
- (2) In case the candidate who having paid the fees after getting admission gets his admission cancelled and that the seat vacated by him is filled by another candidate, the such candidate shall be paid back the fees paid by him after the completion of admission process.
- (3) In case the candidate who having paid the fees after getting admission and gets his admission changed in another course or College or Institution in the readjustment (reshuffling) process, the difference of fees, if any, shall be payable by the candidate at the time getting admission in the

readjustment (reshuffling), or as the case may be, shall be refunded to him after the completion of admission process.

**16. Cancellation of Admission and Refund of Fee:-**

(1) In case of cancellation of admission or transfer of candidates by the Admission Committee, due to administrative reasons, the College or Institution in which the candidate was granted admission shall refund the amount of fee collected by it, to such candidate.

(2) In case of cancellation of admission due to failure of candidate to get himself registered within the specified time limit, as prescribed in sub-clauses (vii) and (viii) of clause (A) of sub-rule (1) of Rule 12, the fees collected from such candidate shall be refunded after completion of the admission process or after completion of such period as may be determined by the Admission Committee.

(3)(a) In case of a candidate withdrawing his candidature before completion of admission process, for any reason whatsoever, he may request in writing to the Admission Committee for such withdrawal. In such case, the fee collected, if any, by the Admission Committee shall be refunded to such candidate;

(b) In case of a candidate withdrawing his candidature after completion of admission process, for any reason whatsoever, he may request in writing to the college or institution in which he is granted admission, for refund of fee paid by him. In such case the fee may be refunded, by such college or institution.

**17. Vacant Seats: -(A) for government seats:** After the admission process is declared as completed by admission committee, if the seats remain vacant or vacancy arises due to any circumstances, such vacant seats shall be displayed on the official website, and on the notice board of the office of the Admission Committee and the same shall be intimated to the Colleges or Institutions wherein the seats are vacant. In case any candidate requires admission on such vacant seats he shall apply directly to such Colleges or Institutions. The vacant seats shall be filled by giving priority to the candidates of Gujarat State. The Colleges or Institutions shall admit the candidates on the basis of inter-se merit of the applicants; subject to the eligibility criteria, in respect of the course the candidate is granted admission, as laid down by the respective council or as the case may be, the respective university.

**(B) For Management seats:** If management seats remain vacant in the MBBS and BDS courses after completion of admission process, the government may grant exemption from the provisions of these rules as it deems appropriate. For other courses, Colleges or Institutions shall admit the candidates on the basis of inter-se merit of the applicants; subject to the eligibility criteria, in respect of the course the candidate is granted admission, as laid down by the respective Council or as the case may be, the respective University. The vacant seats shall be filled by giving priority to the candidates belonging to Gujarat State.

**18. Change of Course or Institution:-** Except as provided in these rules, no candidate shall, after getting admission, be allowed to change his course, or as the case maybe, College or Institution in any circumstance.

**19. Cancellation of admission on production of false documents:-** During verification of documents, if the Admission Committee finds any certificate or testimony or information submitted by any candidate, incorrect or false, the candidature of such candidate shall be cancelled for that year and he shall be disqualified for admission for the period of next two years.

**20. Penalty:-** In case any admission is given or fee is collected in breach of any of the provisions of the Act, rules or any directions issued by the State Government, the Admission Committee, or as the case may be, the Fee Regulatory Committee, by any person, shall be liable for penalty as provided in the Act.

**21. Interpretation:-** If any difficulty or question arises in implementation or interpretation of the provisions of these rules, the decision of the State Government shall be final.

By order and in the name of the Governor of Gujarat,

**V. G. VANZARA,**  
Joint Secretary to Government

ક્રમાંક:-જાએચકેએચ/૭૦/૨૦૧૬/એપીએમ/૧૦.૨૦૧૫/૮૫૮/ગ,

ગુજરાત ખેત ઉત્પન્ન બજાર અધિનિયમ, ૧૯૬૩ (સને ૧૯૬૪ના ગુજરાત અધિનિયમ-૨૦) જેનો આમાં હવે પછી સદરહુ અધિનિયમ તરીકે ઉલ્લેખ કર્યો છે. તેની કલમ-૫૨ તથા કલમ-૫ થી મળેલ સત્તાની રૂએ ગુજરાત સરકારના કૃષિ અને સહકાર વિભાગના તા.૧૫/૦૪/૨૦૧૫ના જાહેરનામા ક્રમાંક: જાએચકેએચ / ૫૧/ એપીએમ/૧૦.૨૦૧૫/૮૫૮ / ગ, (જેનો આમાં હવે પછી સદરહુ જાહેરનામા તરીકે ઉલ્લેખ કર્યો છે) બનાસકાંઠા જિલ્લાની ખેતીવાડી ઉત્પન્ન બજાર સમિતિ, ડીસા વિસ્તારનો બે જુદા જુદા બજાર વિસ્તારો એટલે કે, બનાસકાંઠા જિલ્લાના (૧) ડીસા તાલુકાના બનેલા બજાર વિસ્તાર અને (૨) લાખણી તાલુકાના બનેલા બજાર વિસ્તારના વિભાજન કરવાનો ઇરાદો જાહેર કરેલ છે. ત્યાર બાદ તા.૩/૧૨/૨૦૧૫ના જાહેરનામાથી આખરી કરીને ખેતીવાડી ઉત્પન્ન બજાર સમિતિ, ડીસાની હાલની કમિટીને તા.૩/૧૨/૨૦૧૫ થી એક વર્ષ સુધી ચાલુ રાખવામાં આવેલ છે તથા નવ રચિત ખેતીવાડી ઉત્પન્ન બજાર સમિતિ, લાખણીમાં નિયુક્ત કમિટીના સભ્યોની નિમણૂક ના થાય ત્યાં સુધી તેના સંચાલન માટે જિલ્લા રજિસ્ટ્રારશ્રી, સહકારી મંડળીઓ, પાલનપુરની વહીવટદાર તરીકે નિમણૂક કરેલ છે.

આથી ગુજરાત ખેત ઉત્પન્ન બજાર અધિનિયમ-૧૯૬૩ની કલમ-૫૨ થી મળેલ સત્તાની રૂએ ગુજરાત સરકાર સદરહુ જાહેરનામામાં નિર્દિષ્ટ કરેલ ખેત ઉત્પન્નના ખરીદ અને વેચાણના સંબંધમાં ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-ડીસા, જિલ્લો-બનાસકાંઠા બજાર વિસ્તારને બે જુદા જુદા બજાર વિસ્તારો એટલે કે, (૧) ડીસા તાલુકાની બનેલા બજાર વિસ્તાર અને (૨) લાખણી તાલુકાના બનેલા બજાર વિસ્તારમાં વિભાજન કરેલ છે. હવે તેથી સદરહુ અધિનિયમની કલમ-૫૪ અન્વયે મળેલ સત્તાની રૂએ ગુજરાત સરકાર આથી (ક) ખેતીવાડી ઉત્પન્ન બજાર સમિતિ, ડીસા, જિલ્લો-બનાસકાંઠા વિસર્જન કરે છે અને (ખ) આદેશ કરે છે, કે (૧) વિસર્જિત ખેતીવાડી ઉત્પન્ન બજાર સમિતિ, ડીસા, જિલ્લો-બનાસકાંઠાના સભ્યોએ હુકમની તારીખથી તેમના હોદ્દા ખાલી કરવા. (૨) એ રીતે વિસર્જિત ખેતીવાડી ઉત્પન્ન બજાર સમિતિના બજાર વિસ્તારનું વિભાજન કરવામાં આવેલ છે.

તેવા બંને ખેતીવાડી ઉત્પન્ન બજાર સમિતિઓના બે જુદા જુદા બજાર વિસ્તાર માટે એટલે કે ડીસા તાલુકાનો બનેલો બજાર વિસ્તાર તથા લાખણી તાલુકાના બનેલા બજાર વિસ્તાર માટે એક એક બજાર સમિતિ રચવી.

(ગ) આ હુકમથી નીચે દર્શાવેલ અનુસુચિ-૧માં નિર્દિષ્ટ કરેલ વ્યક્તિઓને ખેતીવાડી ઉત્પન્ન બજાર સમિતિ, ડીસા અને અનુસુચિ-૨ માં નિર્દિષ્ટ કરેલ વ્યક્તિઓને ખેતીવાડી ઉત્પન્ન બજાર સમિતિ, લાખણી વ્યવસ્થાપક સમિતિના સભ્યો તરીકે નિયુક્ત કરે છે. (ઘ) ઉપર્યુક્ત ખેતીવાડી ઉત્પન્ન બજાર સમિતિઓમાં એવી રીતે નિયુક્ત કરાયેલ સભ્યો આ હુકમની તારીખથી બે વર્ષથી વધુ નહીં તેટલી મુદત સુધી હોદ્દો ધરાવશે.

સચિવાલય, ગાંધીનગર, તા.૧૮મી જુલાઈ, ૨૦૧૬.

**ક્રમાંક :** જીએચકેએચ/ ૭૨/૨૦૧૬/એપીએમ/૧૦.૨૦૧૫/૧૧૬૧/ગ.-- ગુજરાત ખેત ઉત્પન્ન બજાર અધિનિયમ, ૧૯૬૩ (સને ૧૯૬૪ના ગુજરાત અધિનિયમ-૨૦) જેનો આમાં હવે પછી સદરહુ અધિનિયમ તરીકે ઉલ્લેખ કર્યો છે. તેની કલમ ૧૧ તથા ગુજરાત ખેત બજાર ઉત્પન્ન બજારો બાબતના નિયમો-૧૯૬૫ના નિયમ-૨૭ની જોગવાઈ હેઠળ ખેતીવાડી ઉત્પન્ન બજાર સમિતિઓની ચૂંટણીઓ કરવામાં આવે છે.

નિયામકશ્રી, ખેત બજાર અને ગ્રામ્ય અર્થતંત્ર, ગુજરાત રાજ્ય ગાંધીનગરના તા. ૧૩/૧૦/૨૦૧૫ના પત્ર ક્રમાંક બસર/ધ/સ-૧/૧૭૯૭/૨૦૧૫ના પત્રમાં જણાવ્યા અનુસાર ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-ડેસરની કમિટિની મુદત તા. ૧૪/૮/૨૦૧૫ ના રોજ પૂર્ણ થયેલ છે. આ નવરચિત ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-ડેસર ને હજુ પૂર્ણ કક્ષાનો ચાર્જ મળેલ નથી જેમ કે સાવલી ખેતીવાડી ઉત્પન્ન બજાર સમિતિમાંથી વિભાજન થતાં સ્ટાફ તેમજ મિલકત અંગેનું વિભાજન થયેલ નથી. તેમજ વિકાસના કામો હાથ પર લીધેલ છે. તે હજુ કાર્યરત થયેલ નથી તેમજ બજાર સમિતિને હજુ ઓફિસ મકાન જેવી કોઈ સગવડ ઉપલબ્ધ નથી અને ઉક્ત કામોનો તેમજ નવા પેટા નિયમોની દરખાસ્તો પેન્ડીંગ રહેલ છે. જેથી આ તમામ હકીકતો ધ્યાને લઈ બીજુ એક વર્ષ સરકારશ્રી દ્વારા નિયુક્ત બોર્ડની મુદત વધારો કરી આપવામાં આવે તો આગામી ચૂંટણી યોજવા તમામ પ્રકારની સગવડો ઉપલબ્ધ થઈ જવાથી યોગ્ય વાતાવરણ અને વ્યવસ્થા જળવાઈ રહે તેમ છે.

આ સંજોગોમાં હાલ ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-ડેસરની કમિટિની મુદત તા. ૧૪-૮-૨૦૧૫ના રોજ પૂર્ણ થઈ ગયેલ હોઈ, ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-ડેસરની મુદત તા. ૧૪-૮-૨૦૧૫ થી વધુ એક વર્ષ સુધી વધારવા અંગે દરખાસ્ત રજુ કરાયેલ છે.

આ વિગતો ધ્યાને લેતાં આથી પુખ્ત વિચારણાના અંતે ગુજરાત ખેત ઉત્પન્ન બજાર અધિનિયમની કલમ-૧૧ (૪) (૧) (કક) હેઠળ મળેલ સત્તાની રૂએ ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-ડેસરની મુદત તા. ૧૪-૮-૨૦૧૫થી વધુ એક વર્ષ સુધી લંબાવવામાં આવે છે.

ગુજરાતના રાજ્યપાલશ્રીના હુકમથી અને તેમના નામે,

વી. એમ. શેઠવાલા,

સરકારના ઉપસચિવ(ધિરાણ).
